

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the journal's web page at <http://journals.cambridge.org/pns> or contact the Publications Office on +44 1223 347922 (telephone), or pns.edoffice@cambridge.org (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing

their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Oraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2–4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

Conference on 'Getting energy balance right'

Editorial

Getting energy balance right in an obesogenic world
J. B. Moore & C. Boesch 259–261

Plenary Lecture 1: Rank Prize Lecture

Effects of consuming sugars and alternative sweeteners during pregnancy on maternal and child health: evidence for a secondhand sugar effect
M. I. Goran, J. F. Plows & E. E. Ventura 262–271

Symposium 1: Regulation of energy balance and whole body metabolism

Role of hypothalamic tanycytes in nutrient sensing and energy balance
M. Travaglio & F. J. P. Ebling 272–278

Metabolic adaptations during negative energy balance and their potential impact on appetite and food intake
N. Casanova, K. Beaulieu, G. Finlayson & M. Hopkins 279–289

Silver Medal Lecture

From sugar to liver fat and public health: systems biology driven studies in understanding non-alcoholic fatty liver disease pathogenesis
J. B. Moore 290–304

Plenary Lecture 3: Boyd Orr Trust Fund Lecture

Nutritional modulation of the epigenome and its implication for future health
M. A. Burton & K. A. Lillycrop 305–312

Symposium 2: Molecular mechanisms contributing to energy balance

Dietary modulation of energy homeostasis and metabolic-inflammation
H. M. Roche 313–318

Contribution of the gut microbiota to the regulation of host metabolism and energy balance: a focus on the gut–liver axis
N. M. Delzenne, C. Knudsen, M. Beaumont, J. Rodriguez, A. M. Neyrinck & L. B. Bindels 319–328

Symposium 3: Dietary factors in energy metabolism

Oral processing in elderly: understanding eating capability to drive future food texture modifications
A. Sarkar 329–339

The role of bioactives in energy metabolism and metabolic syndrome
A. Bordoni, C. Boesch, C. Malpuech-Brugère, C. Orfila, L. & Tomás-Cobos 340–350

Symposium 4: Nutritional epidemiology and risk of chronic disease

The influence of maternal and infant nutrition on cardiometabolic traits: novel findings and future research directions from four Canadian birth cohort studies
R. J. de Souza, M. A. Zulyniak, J. C. Stearns, G. Wahi, K. Teo, M. Gupta, M. R. Sears, P. Subbarao & S. S. Anand 351–361

Understanding susceptibility and targeting treatment in non-alcoholic fatty liver disease in children; moving the fulcrum
E. Fitzpatrick 362–371

Malnutrition in older adults: screening and determinants
C. A. Corish & L. A. Bardon 372–379

Symposium 5: Sustainability of food production and dietary recommendations

Nutrition from a climate change perspective
J. I. Macdiarmid & S. Whybrow 380–387

Addressing malnutrition in low- and middle-income countries with double-duty actions
R. Pradeilles, K. Baye & M. Holdsworth 388–397

Blaxter Award Lecture

Turning over our fat stores: the key to metabolic health
K. N. Frayn 398–406

Postgraduate Symposium

Strategies for online personalised nutrition advice employed in the development of the eNutri web app
R. Z. Franco, R. Fallaize, F. Hwang & J. A. Lovegrove 407–417

Identifying and improving adherence to the gluten-free diet in people with coeliac disease
H. Muhammad, S. Reeves & Y. M. Jeanes 418–425

Effects of obesity and weight loss on mitochondrial structure and function and implications for colorectal cancer risk
S. P. Breininger, F. C. Malcomson, S. Afshar, D. M. Turnbull, L. Greaves & J. C. Mathers 429–437

Diet, menopause and the risk of ovarian, endometrial and breast cancer
Y. Dunneram, D. C. Greenwood & J. E. Cade 438–448

Ulster University, Coleraine, 20–22 June 2018

Conference on 'Targeted approaches to tackling current nutritional issues'

Symposium 1: Current nutritional issues at the population level

Addressing optimal folate and related B-vitamin status through the lifecycle: health impacts and challenges
H. McNulty, M. Ward, L. Hoey, C. F. Hughes & K. Pentieva 449–462

Symposium 2: Developing and using novel health and nutritional biomarkers

Biomarker approaches to assessing intakes and health impacts of sweeteners: challenges and opportunities
A. M. Gallagher & C. Logue 463–472

Erratum

The influence of dietary fatty acids on liver fat content and metabolism – ERRATUM
L. Hodson, F. Rosqvist & S. A. Parry 473
