F. SMITHIES

1. Four parts of the *Proceedings* are issued each year.
2. Communications for the *Proceedings* should be sent to *The Librarian, Cambridge Philosophical Society, Free School Lane, Cambridge*. Papers by Fellows and Associates of the Society should be communicated directly by the author. **Other papers must be communicated by a Fellow**, who in doing so should give his opinion on the suitability of the paper for publication.
3. Papers occupying more than twenty pages of print can only rarely be accepted.
4. It is recommended that each paper be prefaced by a short abstract. Copies of a *Guide for the Preparation of Synopses*, prepared by the Abstracting Services Consultative Committee and issued by the Royal Society, may be obtained from the Librarian.
5. Drawings for illustration and diagrams should be on a large scale and on smooth white Bristol board in Indian ink. Lettering should be written clear of the diagram, and the desired position of the lettering indicated by pencilled lines.
6. References should be listed at the end of each paper. Titles of journals listed in *Mathematical Reviews* should be abbreviated as in *Mathematical Reviews*, except that proper names should be given in full. First and last page numbers should be given where relevant.
7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. A pamphlet on the preparation of papers may be obtained from the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**
8. Authors may receive, on request, free offprints of *Proceedings* papers (fifty for a sole author, and a smaller number for each joint author).

THE JOURNAL

The monthly JOURNAL goes to all members of The Institution, to non-members and subscribers. It contains authoritative articles dealing with all realms of electrical and electronic engineering. It also presents a synoptic review of Institution events and serves as the main channel of communication with the professional electrical and electronics engineer. Circulation A.B.C. 46,692.

THE PROCEEDINGS

Part 'A'. Contains original academic papers describing new work in the heavy-current sphere of electrical engineering, covering power generation—transmission—distribution—installation; as well as reviews of progress. Published bimonthly (February, April, June, August, October and December) with a wholly subscribed circulation of 17,800.

Part 'B'. Contains original academic papers describing new work in the light-current sphere of electrical engineering, covering telecommunication—radio engineering—electronics; as well as reviews of progress. Published bimonthly (January, March, May, July, September and November) with a wholly subscribed circulation of 14,900.
