## Editor-in-Chief

Adam Oliver, *London School of Economics and Political Science, UK*

International trends highlight the confluence of economics, politics and legal considerations in the health policy process. *Health Economics, Policy and Law (HEPL)* provides a forum for inter-disciplinary health policy studies, and will be of use to academics, policy makers, health care managers and professionals. *HEPL* is international in scope, publishing both theoretical and applied work, with articles on all aspects of health policy. *HEPL* is particularly interested in publishing innovative ideas that promise to contribute to improving health and healthcare policy. Considerable emphasis is placed on rigorous conceptual development and analysis, and on the presentation of empirical evidence that is relevant to the policy process. Review articles and debate sections bring readers in touch with current research developments and issues.

## Cover Artwork

*Red Crowned Crane, Morning 7*, photograph by Jim Stewart

Jim Stewart is an associate professor in the Department of Pathology and Lab Medicine at the University of Wisconsin (Madison, Wisconsin USA). He photographs nature scenes around the world during his travels with his wife as Natural Focal Point Photography.

Natural Focal Point Photography is a husband and wife photography team, sharing a passion for photography and an appreciation for nature, wildlife, and beautiful vistas. They enjoy taking pictures of the things they encounter on their travels. They especially enjoy seeing and capturing images of all types of wildlife. While searching and waiting for wildlife photo opportunities, their subject is the surrounding vistas and scenes of where ever they happen to be. Whether it's fall foliage, flowers, mountains, seashores, prairies, marshes, waterfalls, lakes, or stream edges, they enjoy capturing the view. They have been photographing nature for about seven years. Their work can be viewed at <http://www.naturalfocalpoint.com/>.

**Aims and Scope:** The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
