Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 18, 2015 (18 issues):
Internet/print package: £1276/\$2448 Americas only/€2045 EU only
Internet only: £924/\$1752 Americas only/€1469 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Windows of opportunity for setting the critical path for healthy growth
K Baye and M Faber 1715

HOT TOPIC – Child growth

Changing childhood malnutrition in Bangladesh: trends over the last two decades in urban–rural differentials (1993–2012)
S Kumar Das, M Jobayer Chisti, M Abdul Malek, J Das, M Abdus Salam, T Ahmed, A Al Mamun and A Syed Golam Faruque 1718

Forecasting the progress towards the target of Millennium Development Goal 1C in children under 5 years of age in Bangladesh
M Tanvir Hasan, RJ Soares Magalhaes, GM Williams and AA Mamun 1728

Stunting at birth: recognition of early-life linear growth failure in the western highlands of Guatemala
NW Solomons, M Vossenaar, A-M Chomat, CM Doak, KG Koski and ME Scott 1737

Tracking of body size from birth to 7 years of age and factors associated with maintenance of a high body size from birth to 7 years of age – the Norwegian Mother and Child Cohort study (MoBa)
AL Kristiansen, M Bjelland, AL Brantsæter, M Haugen, HM Meltzer, W Nystad and LF Andersen 1746

Breast-feeding and hospitalization for asthma in early childhood: a nationwide longitudinal survey in Japan
M Yamakawa, T Yorifuji, T Kato, Y Yamauchi and H Doi 1756

The interactive association of dietary diversity scores and breast-feeding status with weight and length in Filipino infants aged 6–24 months
MJ Wright, ME Bentley, MA Mendez and LS Adair 1762

The influence of early feeding practices on healthy diet variety score among pre-school children in four European birth cohorts
L Jones, G Moschonis, A Oliveira, B de Lauzon-Guillain, Y Manios, P Xepapadaki, C Lopes, P Moreira, M Aline Charles and P Emmett 1774

A cluster-randomized trial determining the efficacy of caterpillar cereal as a locally available and sustainable complementary food to prevent stunting and anaemia
M Bauserman, A Lokangaka, J Gado, K Close, D Wallace, K-K Kodondi, A Tshetu and C Bose 1785

Monitoring and surveillance

Physical activity and dietary habits among Moroccan adolescents
A Hamrani, S Mehdad, K El Kari, A El Hamdouchi, I El Menchawy, H Belghiti, M El Mzibri, AO Musaiger, HM Al-Hazzaa, AP Hills, N Mokhtar and H Aguenou 1793

Nutrition communication

Acceptability of delivery of dietary advice in the dentistry setting to address obesity in pre-school children: a case study of the Common Risk Factor Approach
EJ Henderson 1801

Behavioural nutrition

Parental motivation to change body weight in young overweight children
RW Taylor, SM Williams, AM Dawson, JJ Haszard and DA Brown 1807

The home food environment of overweight gatekeepers in the Netherlands
MP Poelman, E de Vet, E Velema, JC Seidell and IJM Steenhuis 1815

Nutritional epidemiology

Low dietary intake of magnesium is associated with increased externalising behaviours in adolescents
LJ Black, KL Allen, P Jacoby, GS Trapp, CM Gallagher, SM Byrne and WH Oddy 1824

The potential impact of animal protein intake on global and abdominal obesity: evidence from the Observation of Cardiovascular Risk Factors in Luxembourg (ORISCAV-LUX) study
A Alkerwi, N Sauvageot, JD Buckley, A-F Donneau, A Albert, M Guillaume and GE Crichton 1831

BMI and all-cause mortality among middle-aged and older adults in Taiwan: a population-based cohort study
W-S Chung, F-M Ho, N-C Cheng, M-C Lee and C-J Yeh 1839

Bisphenol A exposure and associations with obesity among adults: a critical review
SJ Oppeneer and K Robien 1847

Community nutrition

Community pharmacy as a setting for public health nutrition action: Australian nutritionists' perspectives
JH Maher, J Lowe and R Hughes 1864

Barriers to access for severe acute malnutrition treatment services in Pakistan and Ethiopia: a comparative qualitative analysis
C Puett and S Guerrero 1873

Public policies

Stabilization of overweight prevalence and improvement of dietary habits in French children between 2004 and 2008
C Carriere, C Langevin, E Kossi Déti, P Barberger-Gateau, S Maurice and H Thibault 1883

Workforce development

A decade of nutrition research in Africa: assessment of the evidence base and academic collaboration
C Lachat, D Roberfroid, L Van den Broeck, N Van den Briel, E Nago, A Kruger, M Holdsworth, C Garimoi Orach and P Kolsteren 1890

Practitioner consensus on the determinants of capacity building practice in high-income countries
E Swanepoel, A Fox and R Hughes 1898
