# Nutrition Research Reviews

Volume 27, 2014 ISSN: 0954-4224

## Aims and Scope

*Nutrition Research Reviews* publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

*Nutrition Research Reviews* is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at [www.cambridge.org/nrr](http://www.cambridge.org/nrr)

---

## Editor-in-Chief

J V Woodside, *Belfast, UK*

## Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

## Editorial Board

M Ashwell, *Baldock, UK*

D A Bender, *London, UK*

N Binns, *Drogheda, Ireland*

J L Black, *Warrimoo, Australia*

D Dardevet, *Theix, France*

C Edwards, *Glasgow, UK*

J M Hibbert, *Atlanta, GA, USA*

T Hill, *Newcastle-upon-Tyne, UK*

J K Lodge, *Newcastle-upon-Tyne, UK*

H C Lukaski, *Grand Forks, ND, USA*

S McCann, *Buffalo, NY, USA*

M Pufulete, *Bristol, UK*

P Rogers, *Bristol, UK*

N W Solomons, *Guatemala City, Guatemala*

M Verstegen, *Wageningen, Netherlands*

C M Weaver, *West Lafayette, IN, USA*

K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: [office@nutsoc.org.uk](mailto:office@nutsoc.org.uk)

The Nutrition Society Home Page is at <http://www.nutrition society.org>

Editor-in-Chief

J V Woodside  
Belfast, UK

**CAMBRIDGE**  
UNIVERSITY PRESS

**Nutrition Research Reviews**  
*Volume 27, 2014 ISSN: 0954-4224*

**Publishing, Production, Marketing, and**

**Subscription Sales Office:**

Cambridge University Press  
The Edinburgh Building  
Shaftesbury Road  
Cambridge CB2 8RU, UK

**For Customers in North America:**

Cambridge University Press  
Journals Fulfillment Department  
100 Brook Hill Drive  
West Nyack  
New York 10994-2133  
USA

**Publisher:** Katy Christomanou

*Nutrition Research Reviews* is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

**Subscription information:**

Volume 27 2014 (2 issues)  
Internet/print package: £260/\$508 American only/€404 EU only  
Internet only: £169/\$313 Americas only/€253 EU only

**Back volumes** are available. Please contact Cambridge University Press for further information.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**US POSTMASTERS:** please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

**Information for Authors:** The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Professor Jayne Woodside  
Centre for Public Health  
Queen's University Belfast  
Institute of Clinical Science B  
Grosvenor Road  
Belfast, BT12 6BJ  
UK  
Tel: 44(0)2890632585  
Fax: 44(0)2890235900  
Email: j.woodside@qub.ac.uk

**Directions to Contributors:** are available from the Editor-in-chief.

**Offprints:** The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

**Copyright:** As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Disclaimer:** The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

Subscribers may register for free access to the electronic version of *Nutrition Research Reviews*. For more information visit the website at [journals.cambridge.org](http://journals.cambridge.org)

*Nutrition Research Reviews* is covered by the Science Citation Index<sup>®</sup>, Current Contents<sup>®</sup> / Agriculture, Biology & Environmental Sciences, SciSearch<sup>®</sup>, Research Alert<sup>®</sup>, Index to Scientific Reviews<sup>®</sup>, EMBASE/Excerpta Medica, Chemical Abstracts Services, CINAHL<sup>®</sup> Database, CAB ABSTRACTS<sup>®</sup>, Global Health, BIOSIS<sup>®</sup> Database, SIIC Databases

Interaction of plant phenols with food macronutrients: characterisation and nutritional–physiological consequences <i>Hao Zhang, Dandan Yu, Jing Sun, Xianting Liu, Lu Jiang, Huiyuan Guo &amp; Fazheng Ren</i>	
Introduction	1
Nature, intake and health benefits of polyphenols	2
Nature of dietary phenols	2
Content of polyphenols in food and their absorption after intake	2
Health benefits of polyphenols	3
Antioxidant activity	3
Anticarcinogenic activity	3
Other bioactivities	3
Interaction of plant phenols with food macronutrients: <i>in vitro</i> evidence	4
Interaction of plant phenols with proteins	4
Interaction of plant phenols with carbohydrates	5
Interaction of plant phenols with fats	5
Interaction of plant phenols with food macronutrients: <i>in vivo</i> results	5
Interaction of plant phenols with proteins	5
Interaction of plant phenols with carbohydrates	6
Interaction of plant phenols with fats	7
Conclusions and future directions	9
Acknowledgements	9
References	10
Food-derived bioactive peptides – a new paradigm <i>Paul J. Moughan, Shane M. Rutherford, Carlos A. Montoya &amp; Lakshmi A. Dave</i>	
Introduction	16
Physiological significance of the food-derived bioactive peptides	17
A quandary	17
A new paradigm	18
Evidence for bioactive peptides derived from gut endogenous proteins	18
Conclusions	19

Nutritional regulation of glucokinase: a cross-species story <i>Stéphane Panserat, Nicole Rideau &amp; Sergio Polakof</i>	
Introduction	21
Glucokinase in mammals	22
Glucokinase function and regulation in mammals	22
Nutritional regulation of glucokinase in mammals	23
Carbohydrate-dependent mammalian species	25
Glucokinase regulation by nutritional status: focus on fed–fasted–refeeding cycles and postprandial changes – liver	25
Glucokinase regulation by nutritional status: focus on fed–fasted–refeeding cycles and postprandial changes – pancreas	26
Regulation of glucokinase by dietary carbohydrates: liver	27
Regulation of glucokinase by dietary carbohydrates: pancreas	28
Regulation of glucokinase by dietary proteins: liver	28
Regulation of glucokinase by dietary proteins: pancreas	28
Regulation of glucokinase by dietary fat: liver	28
Regulation of glucokinase by dietary fat: pancreas	29
Regulation of glucokinase by feeding-related hormones. Glucokinase in the diabetic state and other metabolic-related disorders: liver	29

## Contents

Regulation of glucokinase by feeding-related hormones. Glucokinase in the diabetic state and other metabolic-related disorders: pancreas	29
Carbohydrate-independent mammalian species	30
Glucokinase in carnivorous species: the example of the cat	30
Glucokinase in carnivorous species: the example of the dog	31
Glucokinase in ruminants	31
Glucokinase in birds	32
Peculiarities of glucose metabolism in avian species	32
Characterisation of glucokinase at the biochemical and molecular level in avian species	32
Liver glucokinase activity	32
Comparison of glucokinase-like activity levels	33
Chicken–duck comparison	33
Chicken–owl comparison	33
Pancreas glucokinase	33
Liver and pancreatic glucokinase messenger RNA and protein	33
Nutritional regulation of avian hepatic glucokinase: glucokinase regulation in chickens	34
Nutritional regulation of avian hepatic glucokinase: glucokinase regulation in ducks	34
Glucokinase-regulatory protein in chickens	34
What is the relationship between hepatic glucokinase, plasma glucose and insulin levels in birds?	35
Glucokinase in fish	36
No existence of glucokinase in fish: a (false) hypothesis to explain poor dietary carbohydrate use in carnivorous fish	36
Characterisation of hepatic glucokinase at biochemical and molecular levels	36
Nutritional regulation of hepatic glucokinase	37
Regulation of hepatic glucokinase by dietary carbohydrates	37
Regulation of hepatic glucokinase expression by dietary proteins and lipids	37
Nutritional regulation of hepatic glucokinase expression in fish larvae	37
Particular case of glucokinase regulation by alternative diets recently developed for aquaculture	37
Mechanisms of nutritional regulation of hepatic glucokinase in fish: insulin, glucose and amino acids	38
Nutritional regulation of extra-hepatic glucokinase (intestine, pancreas and hypothalamus) in fish	38
Expression of glucokinase in $\beta$ -pancreas of fish and its regulation by feeding	38
Expression of glucokinase in brain (hypothalamus) and intestine and its regulation by feeding	38
Conclusions and perspectives	39
Acknowledgements	40
References	40
Nutrient regulation of glucagon secretion: involvement in metabolism and diabetes	
<i>Laura Marroquí, Paloma Alonso-Magdalena, Beatriz Merino, Esther Fuentes, Angel Nadal &amp; Ivan Quesada</i>	
Introduction	48
Nutrient regulation of pancreatic $\alpha$ -cells	49
Glucose	49
Amino acids	50
Fatty acids	50
Other nutrients	51
Other levels of regulation	51
Actions of glucagon on nutrient metabolism	52
Glucagon synthesis	52
Glucagon receptor and intracellular signalling	52
Effects of glucagon on hepatic nutrient metabolism	52
Effects of glucagon on food intake, body weight and body energy	54
Other effects of glucagon	54
Involvement of glucagon in diabetes pathophysiology	55
Role of glucagon in the control of glycaemia during diabetes mellitus	55
Therapeutic potential of modulating glucagon secretion and action in diabetes	56
Conclusions and future directions	57
Acknowledgements	57

Regulation of adipocyte lipolysis	
<i>Gema Frühbeck, Leire Méndez-Giménez, José-Antonio Fernández-Formoso, Secundino Fernández &amp; Amaia Rodríguez</i>	
Introduction	63
Control of lipolysis	64
Classic factors	65
Catecholamine-induced regulation	65
Hormone-mediated control	65
Hormone-mediated control: insulin	65
Hormone-mediated control: growth hormone	65
Hormone-mediated control: other hormones	66
Cytokines and other 'newcomers'	67
Cytokine regulation of lipolysis	67
Cytokine regulation of lipolysis: TNF- $\alpha$	67
Cytokine regulation of lipolysis: IL-6 and IL-15	68
Cytokine regulation of lipolysis: leptin	68
Cytokine regulation of lipolysis: adiponectin	68
Other elements involved in lipolysis	69
Other elements involved in lipolysis: nitric oxide	69
Other elements involved in lipolysis: natriuretic peptides	69
Other elements involved in lipolysis: endocannabinoid system	69
Other elements involved in lipolysis: ghrelin	70
Other elements involved in lipolysis: other miscellaneous agents	70
Influence of subcellular compartmentalisation of lipases	71
TAG hydrolysis	71
Diacylglycerol hydrolysis	72
Monoacylglycerol hydrolysis	74
Other lipases	74
Lipid droplet proteins	74
Lipid droplet proteins: perilipin	74
Lipid droplet proteins: coactivator comparative gene identification-58 (CGI-58) or $\alpha/\beta$ -hydrolase domain-containing protein 5 (ABHD5)	75
Lipid droplet proteins: Cide domain-containing proteins	75
Lipid droplet proteins: other proteins (GPIHBP1 and Rab)	75
Integral membrane proteins and transporters	76
Integral membrane proteins and transporters: aquaporin-7	76
Integral membrane proteins and transporters: caveolin-1	76
Integral membrane proteins and transporters: fatty acid translocase (CD36)	76
Integral membrane proteins and transporters: adipose fatty acid binding protein	76
Integral membrane proteins and transporters: fatty acid transport protein 1	77
Integral membrane proteins and transporters: fatty acid transport protein 4	77
Integral membrane proteins and transporters: acyl-CoA synthetase long-chain 1	77
Depot-specific differences	78
Lipophagy: role of autophagy in lipid metabolism	79
Lipolysis in human obesity	80
Concluding remarks and future perspectives	82
Acknowledgements	82
References	82
The role of vitamins and minerals in modulating the expression of microRNA	
<i>Emma L. Beckett, Zoe Yates, Martin Veysey, Konsta Duesing &amp; Mark Lucock</i>	
Introduction	94
MicroRNA	94
MicroRNA in epigenetics	95
Nutritional modulation of epigenetic traits	97
Modulation of microRNA expression by micronutrients	97
Vitamin D	97
Folate and related vitamins involved in methyl group metabolism	98
Retinoic acid	99
