

Take the Lead in Infection Control

Practical Handbook for Healthcare Epidemiologists, Second Edition

Ebbing Lautenbach MD, MPH, MSCE,
University of Pennsylvania, Philadelphia, PA
and Keith Woeltje MD, PhD,
Washington University School of Medicine,
St. Louis, MO

400 pp., Hard Cover, 2004,
ISBN 1-55642-677-1
Order#16771, **\$94.95**

If you work in today's healthcare epidemiology programs **you will need** the latest edition of *Practical Handbook for Healthcare Epidemiologists*. Situations that are encountered daily can be challenging, and now the answers needed are available in one solid resource.

Extensively updated and revised, this **best selling** handbook is concise

and user-friendly, and will provide practical information regarding many aspects of establishing and managing a healthcare epidemiology program.

The Society for Healthcare Epidemiology of America (SHEA) has recruited over 50 recognized leaders in the field to share their expertise. They discuss overarching goals, as well as successful strategies for handling specific situations and problems. There is also extensive information on infection control in the outpatient setting and measures to take after exposure to infectious agents. *This is the most complete hands-on source about healthcare epidemiology and infection prevention and control.*

Hands and germs hang out in the same places. Especially in your hospital.

Hands are the first, and last, lines of defense against the spread of pathogens. It's not a job for just any antiseptic. The CDC advises that alcohol alone is not appropriate when hands are visibly dirty or contaminated with proteinaceous materials.¹

Compare washing with Hibiclens to using other antiseptic solutions like alcohol, iodine and PCMX:

- Broad-spectrum residual action lasts up to 6 hours after washing.²
- Efficacy is **not** compromised by contact with organic matter like blood.³
- Proprietary formulation is gentler on your skin.⁴
- For 34 years, the standard by which all others are compared.
- Removes dirt and debris leaving hands clean.
- With Hibiclens as your first, and last, wash of the day, you'll have one less thing to worry about.

Kill the Hibigeebies with

THINK

rapid, persistent, superior

INTRODUCING ChloroPrep® 26mL THE MOST RAPID-ACTING, MOST PERSISTENT AND SUPERIOR PREOPERATIVE SKIN PREPARATION AVAILABLE IN THE OR SUITE

- Rapid activity against gram-positive and gram-negative bacteria
- Persistent antimicrobial activity—prevents regrowth of micro-organism on the skin for at least 48 hours
- Unlike povidone-iodine, Chlorhexidine (CHG) remains active in presence of blood, serum, and other protein-rich biomaterials¹
- Use of CHG has demonstrated a 50% reduction in the incidence of catheter-related bloodstream infections compared to povidone iodine¹

A tinted and clear 10.5 mL applicator is also available.

The new, single-use applicator is convenient, latex-free, hands-off and sterile to help prevent cross-contamination
