Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 18, 2015 (18 issues):
Internet/print package: £1276/\$2448 Americas only/€2045 EU only
Internet only: £924/\$1752 Americas only/€1469 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Assessment and methodology

Validation of a BMI cut-off point to predict an adverse cardiometabolic profile with adiposity measurements by dual-energy X-ray absorptiometry in Guatemalan children
O Redondo, E Villamor, J Valdés, U Bilal, B Caballero, D Roche, F Kroker, M Ramírez-Zea and M Franco 951

Design and development of an instrument to measure overall lifestyle habits for epidemiological research: the Mediterranean Lifestyle (MEDLIFE) index
M Sotos-Prieto, B Moreno-Franco, JM Ordovás, M León, JA Casasnovas and JL Peñalvo 959

The relative validity and repeatability of an FFQ for estimating intake of zinc and its absorption modifiers in young and older Saudi adults
HM Alsufiani, F Yamani, TA Kumosani, D Ford and JC Mathers 968

Field validation of food outlet databases: the Latino food environment in North Carolina, USA
PE Rummo, P Gordon-Larsen and SS Albrecht 977

Nutrition communication

Televised obesity-prevention advertising across US media markets: exposure and content, 2010–2011
R Kornfield, G Szczypka, LM Powell and SL Emery 983

A qualitative study of shopper experiences at an urban farmers' market using the Stanford Healthy Neighborhood Discovery Tool
MP Buman, F Bertmann, EB Hekler, SJ Winter, JL Sheats, AC King and CM Wharton 994

Behavioural nutrition

Let's talk about health: shoppers' discourse regarding health while food shopping
MC O'Brien, A McConnon, LE Hollywood, GJ Cuskelly, J Barnett, M Raats and M Dean 1001

Away-from-home eating: nutritional status and dietary intake among Brazilian adults
I Nogueira Bezerra, E Verly Junior, R Alves Pereira and R Sichieri 1011

Parents' food choice motives and their associations with children's food preferences
CG Russell, A Worsley and DG Liem 1018

Predicting use of ineffective vegetable parenting practices with the Model of Goal Directed Behavior
T Baranowski, A Beltran, T-A Chen, D Thompson, T O'Connor, S Hughes, C Diep and JC Baranowski 1028

Associations between parental feeding practices, problem food behaviours and dietary intake in New Zealand overweight children aged 4–8 years
JJ Haszard, PML Skidmore, SM Williams and RW Taylor 1036

The proof is in the eating: subjective peer norms are associated with adolescents' eating behaviour
F Marijn Stok, E de Vet, JBF de Wit, A Luszczynska, M Safron and DTD de Ridder 1044

Exploration and forecasting of behaviours and factors relating to fruit and vegetable intake among seniors in the community
P-T Hsu, P-H Liao, W Chu, S-Y Yang and I-J Chen 1052

Opposites don't attract: high spouse concordance for dietary supplement use in the European Prospective Investigation into Cancer in Norfolk (EPIC-Norfolk) cohort study
MAH Lentjes, AA Welch, RH Keogh, RN Luben and K-T Khaw 1060

Nutritional epidemiology

Body size dissatisfaction among young Chinese children in Hong Kong: a cross-sectional study
G Knowles, FC Man Ling, G Neil Thomas, P Adab and AM McManus 1067

Body weight and body shape concerns and related behaviours among Indian urban adolescent girls
N Som and S Mukhopadhyay 1075

A case-control study on red meat consumption and risk of stroke among a group of Iranian adults
P Saneei, M Saadatnia, F Shakeri, M Beykverdi, A Hassanzadeh Keshteli and A Esmailzadeh 1084

Economics and environment

The inverse relationship between food price and energy density: is it spurious?
GC Davis and A Carlson 1091

Community nutrition

Water from fruit or the river? Examining hydration strategies and gastrointestinal illness among Tsimane' adults in the Bolivian Amazon
A Rosinger and S Tanner 1098

Risk perception is not associated with attendance at a preventive intervention for type 2 diabetes mellitus among South Asians at risk of diabetes
EMA Vlaar, V Nierkens, M Nicolaou, BJC Middelkoop, K Stronks and IGM van Valkengoed 1109

Interventions

Effects of a simple educational intervention in well-baby clinics on women's knowledge about and intake of folic acid supplements in the periconceptional period: a controlled trial
DJ de Smit, SS Weinreich and MC Cornel 1119

Adherence in a pragmatic randomized controlled trial on prophylactic iron supplementation during pregnancy in Maputo, Mozambique
BI Nwaru, G Salomé, F Abacassamo, O Augusto, J Cliff, C Sousa, E Regushevskaya, S Parkkali and E Hemminki 1127

Effect of dried California Mission figs on mineral status and food replacement
HK Alshaeri, ZS Natto, S Tonstad, E Haddad and K Jaceldo-Siegl 1135

Erratum

Field validation of food outlet databases: the Latino food environment in North Carolina, USA – ERRATUM
PE Rummo, P Gordon-Larsen and SS Albrecht 1141
