Environmental Conservation

An International Journal of Environmental Science

Editor: Nicholas V. C. Polunin
University of Newcastle, UK

Published by Cambridge University Press from 1996, **Environmental Conservation** is the longest-standing and most authoritative of the journals which deal comprehensively with the science underpinning environmental conservation concerns at the global level. This is essential reading for all environmentalists, managers and scientists wishing to keep abreast of current developments in environmental science.

Features

- Published quarterly
- Rapid publication
- Includes short papers and comments as well as longer articles
- Book reviews, subject reviews and meeting reports are also welcomed

Recent and Forthcoming Papers

Hydroelectric dams in the Brazilian Amazon as sources of 'greenhouse' gases

P. M. FEARNside

Rain-forest policies and United States NGOs – Targets and tactics of influence

R. B. MOHD & J. G. LAARMAN

Natural resource exploitation and the role of new technology: a case-history of the UK herring industry

D. J. WHITMARSH ET AL.

Proposing a new mechanism to strengthen the equitable and sustainable use of biodiversity

A. F. KRATTIGER & W. H. LASSER

Coverage includes:

- human institutions and attitudes
- biodiversity, species losses and introductions
- industry, pollution and habitat degradation
- energy and materials sources
- dynamics of populations and ecosystems
- atmospheric and oceanic processes
- international environmental law
- environmental economics

Subscription Information

Environmental Conservation is published quarterly in March, June, September and December. Volume 23 in 1996 costs £150 for institutions and £68 for individuals; delivery by airmail is £18 extra. ISSN 0376-8929.
