Series B — Applied Mathematics

Volume 22 Part 3

JANUARY 1981

On the evolution of shock-waves in mathematical models of the aorta L. K. Forbes	257
On error bounds in strong approximations for eigenvalue problems R. P. Kulkarni and B. V. Limaye	270
Flow in the porous region between slowly rotating prolate spheroids N. K. Agarwal and Sunil Datta	284
Extended optima and equilibria for continuous games. I. General results D. J. Gates and M. Westcott	291
Some remarks on set-valued dynamical systems J. W. Nieuwenhuis	308
Solution of a general linear difference equation S. A. H. Rizvi	314
Mean flows generated by a progressing water wave packet R. Grimshaw	318
The asymptotic response of a calorimeter A. McNabb	348
Love's integral and other relations between solutions to mixed boundary-value problems in potential theory A. H. England	353
Non-classical integrals of Bessel functions S. N. Stuart	368

The Journal of the Australian Mathematical Society began publication in 1959, and from 1975 appears in two series, Series A (Pure Mathematics and Statistics) and Series B (Applied Mathematics). Information about Series A may be found on the inside back cover.

SERIES B APPLIED MATHEMATICS

This series is published in volumes, comprising four parts, starting with Volume 19 Part I in 1975. From 1980, four parts are published annually. Subscriptions may be arranged through the Business Manager (see inside back cover). The annual cost for 1981 is A\$60.

It is the editorial policy of Series B to accept papers in any field of applied mathematics and related mathematical sciences. Novel applications of mathematics in real situations are welcomed. Authors are encouraged to write an introduction accessible to the whole applied mathematical community. Every effort will be made to publish suitable material with a minimum of delay.

Manuscripts (two copies) for publication should be sent to the editor or to an appropriate associate editor at the address given above. Such action is a representation by the author that the manuscript has not been copyrighted or published, and that it is not being considered for publication elsewhere.

Authors are asked to read the section "Preparation of Manuscripts" on the outside cover.

Irrespective of the number of authors, 100 free offprints of each paper are provided; additional offprints may be ordered at the expense of the authors.

Excessive costs incurred by the Society through corrections to or withdrawal of articles may be charged to the authors concerned.
