*Theory Culture & Society* was launched to cater for the resurgence of interest in culture within contemporary social science. The journal provides a forum for articles which theorise the relationship between culture and society.

The journal features papers by and about the work of a wide range of modern social and cultural theorists such as Foucault, Bourdieu, Baudrillard, Goffman, Bell, Parsons, Elias, Gadamer, Luhmann, Habermas and Giddens.

*'TCS carries some of the liveliest and most stimulating articles currently being published in social science. The review articles contain theoretical commentary and controversy at the cutting edge of intellectual development.'* — Randall Collins, UCLA Riverside

*'TCS has in a very short period of time established itself as a major new presence. Its contributors include scholars of the highest international prestige'* — Anthony Giddens, Cambridge University

*'It seems to me that Mike Featherstone and his editorial group have done more than any other sociological group to move sociology forward into new terrains of thought and discourse and they have done so with power, grace and insight. The presence of TCS can no longer be denied.'* — Professor Norman Denzin, University of Illinois

*Theory Culture & Society* is published quarterly by SAGE Publications in association with the Department of Administrative and Social Studies, Teesside Polytechnic

RILM Abstracts is the world's most complete continuously updated bibliography of music literature. Through its printed and online formats, RILM provides general readers and scholars with easy access to all significant music literature—a service supplied nowhere else.

Anyone who needs quick access to recent music literature, from the latest reviews of blues recordings to the origins of Byzantine church music will find it in RILM. Students, performers, and music historians in all areas (including authentic performance of early music, theory and analysis, world musics, religious music, instruments, aesthetics, source studies, music iconography, music sociology, music pedagogy, popular and folk musics) will benefit from RILM's in-depth coverage.

Using information compiled in its member countries, RILM's staff of professional editors, musicologists, and indexers produces three major research tools:

**RILM Abstracts:** A cornerstone of every complete music reference collection. Each annual volume of this fully annotated bibliography contains references to virtually all serious writing on music within a given year. Its references form the most complete guide available to current publications worldwide, and its abstracts provide summaries of the most significant books and articles of the year.

**RILM Cumulative Index:** Three separate index volumes, each covering a full five years of the RILM Abstracts. Designed so that even the novice researcher can use it, the index can also be employed for the most sophisticated searches devised by a music librarian, sifting through various layers of music knowledge to find exact information.

**RILM Music Thesauruses:** A standard vocabulary for music terminology and place names. The RILM Thesaurus enables the serious researcher to use the indexes most thoroughly and efficiently. The Thesaurus is indispensable to researchers who use RILM online.
