Protection is our line.

NEUTRALON® Brown Surgical Glove MICRO-TOUCH® Latex Surgical Glove MAXXUS® Orthopaedic Surgical Glove MICRO-TOUCH® XP Latex Medical Glove MICRO-TOUCH® Latex Medical Glove

Artist interpretation of microorganisms.

Protection. The key to our superior glove line. At Johnson & Johnson Medical, Inc., we have a reputation that spans more than 20 years — years dedicated to the research and development of quality gloves that provide maximum protection, optimum fit and excellent touch sensitivity.

We engineer quality into every aspect of our gloves beginning with 100 percent on-line visual inspection of all latex gloves, and quality standards that far exceed those required by the FDA.

Our protection line includes NEUTRALON®

SOME PEOPLE TAKE DRUG ABUSE TO HEART.

Most cocaine-users are so dedicated to the drug that what it does to their hearts never enters their minds. They don't realize that every time they use cocaine, they put themselves at risk for such potentially fatal cardiovascular complications as hypertensive crisis.. . myocarditis.. .myocardial infarction . . . ventricular tachycardia.. .ventricular fibrillation.. .even cardiac arrest.

Chances are, at least some of these people are your patients. And many of them may feel more comfort-

able telling a nurse what they can't-or won't-tell a doctor. That's why your role becomes critical in helping suspected drug abusers understand what illegal drug use does to their bodies.

As key members of the health care team, nurses *can* make a difference in helping to curb drug abuse, and in preventing some of its deadliest consequences. The next time you suspect a patient may be using cocaine-or *any*

illegal substance—have a heart-to-heart talk about the damage these drugs can do.

**A short talk
can go a long way.**

THE PUBLICATION OF ADVERTISING IN THE JOURNAL DOES NOT CONSTITUTE ANY GUARANTEE OR ENDORSEMENT BY THE SOCIETY FOR HOSPITAL EPIDEMIOLOGY OF America OR Slack INCORPORATED OF THE ADVERTISED PRODUCT OR SERVICE OR OF CLAIMS MADE BY THE ADVERTISER. THE PUBLICATION OF ARTICLES AND OTHER EDITORIAL MATERIAL IN THE JOURNAL DOES NOT NECESSARILY REPRESENT THE POLICY RECOMMENDATIONS OR ENDORSEMENT BY THE SOCIETY

PUBLISHER: Infection Control and Hospital Epidemiology (ISSN-0899-823X) is published exclusively by SLACK Incorporated 12 times a year. Address: 6900 Grove Rd., Thorofare, NJ 08086. Telephone: (609) 848-1000.

COPYRIGHT 1991 by The Society for Hospital Epidemiology of America, Inc. and SLACK Incorporated. All rights reserved. No part of this publication may be reproduced without written permission from the publisher.

SUBSCRIPTIONS: Requests should be addressed to the publisher (except Japan). In Japan, contact Woodbell Incorporated, 4-22-11, Kitakasai, Edogawaku, Tokyo 134, Japan. Subscription rates in the United States and possessions: Individual: One year—\$70.00; Two years—\$105.00; Three years—\$135.00; Institutional: One year—\$80.00; Two years—\$120.00; Three years—\$160.00. Canada: \$18.00 additional each year; all other countries: \$36.00 additional each year. Single copies of current issues may be obtained for \$8.00, United States and possessions; \$16.00 all other countries.

REPRINTS: All requests to reprint or use material published herein should be addressed to Lester J. Robeson, SLACK Incorporated, 6900 Grove Rd., Thorofare, NJ 08086. For reprint orders and prices, contact Fran Micaletti at (609) 848-1000. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by SLACK Incorporated, provided that the base fee of \$1.00 per copy, plus \$15 per page is paid directly to Copyright Clearance Center, 27 Congress St., Salem, MA 01970. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotional purposes, or for creating new collective works.

CHANGE OF ADDRESS: Notice should be sent to the publisher six weeks in advance of effective date. Include old and new addresses with zip codes. The publisher cannot accept responsibility for undelivered copies. Second-class postage is paid at Thorofare, New Jersey 08086, and additional entry points. **POSTMASTER:** Send address changes to SLACK Incorporated, 6900 Grove Rd., Thorofare, NJ 08086.

As of Volume 1, Number 1, INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY is listed in Index Medicus, Current Contents-Clinical Practice, Hospital Literature Index, Cumulative Index to Nursing and Allied Health Literature, and Nursing Abstracts.

DO YOU REALLY KNOW WHAT YOU'RE GETTING INTO?

If you work in a high-risk medical area, you know the hazards. So does **Ansell**. That's why we've introduced our new E.P.[™] Gloves. They provide the extra protection you need because E.P. Gloves are manufactured and tested to even tighter requirements than the current industry standards for surgical gloves. They also provide features for added protection not available with other gloves in the marketplace today.

Ansell E.P. Gloves Provide Extra Protection By:

- Testing to ten times tighter **AQL** than the industry standard for surgical gloves*
- **100%** electronic inspection for pinholes
- No powder added
- **Thicker** latex
- long, **12"** cuff
- Textured wet-grip surface
- Meeting industry guidelines for handling cytotoxic drugs**
- Availability in four sizes, **petite**, small, medium, and **large**

So get your hands into **Ansell's** new E.P. Gloves — before you get into anything else. For more information and a FREE pair of E.P. Gloves, call today.

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. Copyright and Republication Policy

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. hold copyright on *Infection Control and Hospital Epidemiology*. We request that all authors of works transfer to SHEA and SLACK Inc. all rights, title, and interest to such works, including copyright. In accord with the Copyright Act of 1976, we must acquire every author's signature to effect the transfer. A written work cannot be considered for publication until the 'Assignment of Copyright' form is signed by the author or authors and is on file at the editorial offices. Please submit this signed form with your manuscript. In the event that a manuscript is not accepted for publication, this agreement will be returned to the authors.

Signed 'Assignment of Copyright' forms confirm that a work submitted has not previously been published, is not subject to copyright or other rights except those of the author to be transferred to SHEA and SLACK Inc., and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.

Permission to reproduce any part of the works published by SHEA and SLACK Inc. in *Infection Control and Hospital Epidemiology* in any form or by any means, electronic or mechanical, is not permitted without written permission from SLACK Inc.

Assignment of Copyright

In consideration of SLACK Incorporated and The Society for Epidemiology of America (collectively called the 'Publisher') in publishing my (our) submitted manuscript, the undersigned hereby transfer(s), assign(s), and otherwise convey(s) all copyright in the manuscript to the Publisher. The undersigned declares that the manuscript is original and, to the best of the undersigned's knowledge, contains no matter that is libelous or unlawful or that infringed upon anyone else's rights of copyright.

In addition, we affirm that the work is the work of every author listed, and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.

OSHA VAPOR LIMIT

OSHA has set
0.2 ppm as the
permissible exposure limit
for glutaraldehyde.¹

Sporicidin offers important
advantages. When diluted for 100%
hospital level disinfection, it contains
0.13% glutaraldehyde. With good cross-
ventilation, this can avoid the need for special
ventilation equipment to stay within the never-to-
be exceeded ceiling of 0.2 ppm.

Greater ventilation and space areas are required
when using 2% glutaraldehyde solutions. It is
reported that a room volume of air 550 times greater
than that of the soaking container is needed for 2%
glutaraldehyde, while only 33 times greater is
needed for Sporicidin.²

It's reassuring to know that you can
lessen the risk of over-exposure to
glutaraldehyde, offer greater
protection to your staff
and reduce your space
and ventilation
requirements as
well, by using
Sporicidin.

**ANOTHER REASON
TO DISINFECT WITH
SPORICIDIN**
