

CAMDEN FIFTH SERIES

The Papers of Admiral George Grey

The Papers of Admiral George Grey presents the memoir, journal, and correspondence of George Grey, son of the Whig prime minister Earl Grey. By documenting the Grey family's experience of the Whig ministry of 1830–1834, and George Grey's own naval career – which took him from the Battle of Navarino during the Greek War of Independence, to a decisive survey of the Falkland Islands, and then to the capital cities of South America during their pivotal early decades of independence – this volume sheds new light on the political, diplomatic, naval, and imperial histories of the early and mid-nineteenth century.

MICHAEL TAYLOR is a historian of the eighteenth and nineteenth centuries. He completed his PhD at Gonville & Caius College, Cambridge, and his previous books *The Interest* (2020) and *Impossible Monsters* (2024) have concerned the campaign to defend British colonial slavery from abolitionism, and the intellectual changes wrought by the discovery of dinosaur fossils, respectively.
