

NOTES FOR AUTHORS

Submitting a paper

Full details on submitting a paper, including the style guide and L^AT_EX class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

Proceedings of the Royal Society of Edinburgh: Section A considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- Proceedings A has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

CONTENTS

Y. LIU AND P. ZHOU Abelian categories arising from cluster tilting subcategories II: quotient functors	2721–2756
C. O. R. SARRICO AND A. PAIVA Distributions as initial values in a triangular hyperbolic system of conservation laws	2757–2775
T. D. DRIVAS AND D. D. HOLM Circulation and Energy Theorem Preserving Stochastic Fluids	2776–2814
J. CIRICI, D. E. SANTANDER, M. LIVERNET, AND S. WHITEHOUSE Model category structures and spectral sequences	2815–2848
K. M. HUI Uniqueness and time oscillating behaviour of finite points blow-up solutions of the fast diffusion equation	2849–2870
S. A. NAZAROV, N. POPOFF, AND J. TASKINEN Plummeting and blinking eigenvalues of the Robin Laplacian in a cuspidal domain	2871–2893
C. CAZACU A new proof of the Hardy–Rellich inequality in any dimension	2894–2904,
C. AUDIARD Existence of multi-travelling waves in capillary fluids	2905–2936
N. HODA, D. T. WISE, AND D. J. WOODHOUSE Residually finite tubular groups	2937–2951
V. H. NGUYEN New sharp Hardy and Rellich type inequalities on Cartan–Hadamard manifolds and their improvements	2952–2981
D. KISHIMOTO AND T. MIYAUCHI Higher homotopy associativity in the Harris decomposition of Lie groups	2982–3000
A. I. SUCIU Poincaré duality and resonance varieties	3001–3027
M. BARDI, A. CESARONI, AND E. TOPP Cauchy problem and periodic homogenization for nonlocal Hamilton–Jacobi equations with coercive gradient terms	3028–3059
P. LE Liouville theorem for fractional Hénon–Lane–Emden systems on a half space	3060–3073
P. CERDA AND L. ITURRIAGA Existence of solution for quasilinear equations involving local conditions	3074–3086
Y. SUZUKI On pathological properties of fixed point algebras in Kirchberg algebras	3087–3096
L. GIRARDIN Two components is too simple: an example of oscillatory Fisher–KPP system with three components	3097–3120
C. JIN Periodic pattern formation in the coupled chemotaxis–(Navier–)Stokes system with mixed nonhomogeneous boundary conditions	3121–3152
E. BORGHINI AND E. G. MINIAN Simplicial complexity of surface groups	3153–3162
Z. HU AND J. A. VIRTANEN Fredholm Toeplitz operators with VMO symbols and the duality of generalized Fock spaces with small exponents	3163–3186
J. YANG AND J. YANG On supercritical nonlinear Schrödinger equations with ellipse-shaped potentials	3187–3215
R. LÓPEZ Gradient estimates for the constant mean curvature equation in hyperbolic space	3216–3230
M. V. DEMINA AND C. VALLS On the Poincaré problem and Liouvillian integrability of quadratic Liénard differential equations	3231–3251
V. D. DINH Existence, non-existence and blow-up behaviour of minimizers for the mass-critical fractional non-linear Schrödinger equations with periodic potentials	3252–3292
W. LONG, Z. TANG, AND S. YANG Many synchronized vector solutions for a Bose–Einstein system	3293–3320
S. LI AND Y. DONG Uniqueness and multiplicity of positive solutions for a diffusive predator–prey model in the heterogeneous environment	3321–3348
D. BELTRAN AND L. VEGA Bilinear identities involving the k -plane transform and Fourier extension operators	3349–3377
A. BEAULIEU Bounded solutions for an ordinary differential system from the Ginzburg–Landau theory	3378–3408
