Contents Volume 77

No. 1 (February 2010)

Influence of milk yield, stage of lactation and body condition on dairy cattle lying behaviour measured using an automated activity monitoring sensor JM Bewley, RE Boyce, J Hockin, L Munksgaard, SD Eicher, ME Einstein and MM Schutz	1
<i>Lactobacillus plantarum</i> bacteriophages isolated from Kefir grains: phenotypic and molecular characterization GL De Antoni, M Zago, O Vasek, G Giraffa, D Carminati, MB Marcó, J Reinheimer and V Suárez	7
Milk emission and udder health status in primiparous dairy cows during lactation A Tamburini, L Bava, R Piccinini, A Zecconi, M Zucali and A Sandrucci	13
Antioxidant activity, bioactive polyphenols in Mexican goats' milk cheeses on summer grazing HM Cuchillo, DC Puga, OA Navarro and RF Pérez-Gil	20
Retinol binding protein 4 in dairy cows: its presence in colostrum and alteration in plasma during fasting, inflammation and the peripartum period MA Abd Eldaim, A Kamikawa, MM Soliman, MM Ahmed, Y Okamatsu-Ogura, A Terao, T Miyamoto and K Kimura	27
Concentration of penicillin G in mammary tissue and secretion of end-term dairy heifers following systemic prepartum administration of penethamate hydriodide P Passchyn, S Piepers, E Schmitt-Van de Leemput, C Guidarini and S De Vliegher	33
Association of polymorphisms in exons 2 and 10 of the insulin-like growth factor 2 (<i>IGF2</i>) gene with milk production traits in Polish Holstein-Friesian cattle E Bagnicka, E Siadkowska, N Strzałkowska, B Żelazowska, K Flisikowski, J Krzyżewski and L Zwierzchowski	37
Comparative study of heat stability of camel and bovine apo and holo α -lactalbumin SA Atri, AA Saboury, R Yousefi, M Dagalarrondo, J-M Chobert, T Haertlé and AA Moosavi-Movahedi	43
Active coating to prolong the shelf life of Fior di Latte cheese MA Del Nobile, D Gammariello, S Di Guilio and A Conte	50
Divergence at the casein haplotypes in dairy and meat goat breeds J Küpper, S Chessa, D Rignanese, A Caroli and G Erhardt	56
Correlation between mastitis occurrence and the count of microorganisms in bulk raw milk of bovine dairy herds in four selective culture media LIM Souto, CY Minagawa, EO Telles, MA Garbuglio, M Amaku, PA Melville, RA Dias, ST Sakata and NR Benites	63
Casein retention in curd and loss of casein into whey at chymosin-induced coagulation of milk E Hallén, A Lundén, T Allmere and A Andrén	71
Direct versus indirect effects of social rank, maternal weight, body condition and age on milk production in Iberian red deer (<i>Cervus elaphus hispanicus</i>) T Landete-Castillejos, F Ceacero, AJ García, JA Estevez and L Gallego	77
Rapid method for cholesterol analysis in bovine milk and options for applications E Viturro, HH Meyer, C Gissel and M Kaske	85
Evaluation of increased milking frequency as an additional treatment for cows with clinical mastitis V Kroemker, C Zinke, J-H Paduch, D Klocke, A Reimann and G Eller	90
Comparison of two methods of assessing dairy cow body condition score JM Bewley, RE Boyce, DJ Roberts, MP Coffey and MM Schutz	95

Association of milk yield and infection status at dry-off with intramammary infections at subsequent calving KA Newman, PJ Rajala-Schultz, FJ DeGraves and J Lakritz	99
The role of lactate dehydrogenase, alkaline phosphatase and aspartate aminotransferase in the diagnosis of subclinical intramammary infections in dairy sheep and goats PD Katsoulos, G Christodouloupoulos, A Minas, MA Karatzia, K Pourliotis and SK Kritas	107
Comparison of conventional and molecular methods for the routine confirmation of <i>Listeria monocytogenes</i> in milk products produced domestically in Croatia J Frece, K Markov, D Čvek, K Kolarec and F Delaš	112
Comparison of antioxidant defence parameters in colostrum and milk between Berrichon du Cher ewes and Uhrusk ewes J Lipko-Przybylska, E Albera and M Kankofer	117
Effects of acarbose on ruminal fermentation, blood metabolites and microbial profile involved in ruminal acidosis in lactating cows fed a high-carbohydrate ration M Blanch, S Calsamiglia, M Devant and A Bach	123
No. 2 (May 2010)	
Characterization of immune-active peptides obtained from milk fermented by <i>Lactobacillus helveticus</i> A Tellez, M Corredig, L Brovka and MW Griffiths	129
Evaluation of different approaches for the estimation of daily yield from single milk testing scheme in cattle J Jenko, T Perpar, G Gorjanc and D Babnik	137
Study on the combined effects of essential oils on microbiological quality of Fior di Latte cheese D Gammariello, A Conte, M Attanasio and MA Del Nobile	144
Milk production, peripartal liver triglyceride concentration and plasma metabolites of dairy cows fed diets supplemented with calcium soaps or hydrogenated triglycerides of palm oil RG Karcagi, T Gaál, P Ribiczey, G Huszenicza and F Husvéth	151
Relationship between virulence factor genes in bovine <i>Staphylococcus aureus</i> subclinical mastitis isolates and binding to anti-adhesin antibodies M Scarpa, R Piccinini, P Brun, A Grillo, G Palù, C Mengoli, V Daprà, I Castagliuolo and A Zecconi	159
Detection of mastitis and its stage of progression by automatic milking systems using artificial neural networks Z Sun, S Samarasinghe and J Jago	168
Growth inhibitory effects of casein hydrolysates on human cancer cell lines M Phelan, SA Aherne, D O'Sullivan, RJ FitzGerald and NM O'Brien	176
Simultaneous pasteurization and homogenization of human milk by combining heat and ultrasound: effect on milk quality C Czank, K Simmer and PE Hartmann	183
Genetic variation at the goat hormone-sensitive lipase (<i>LIPE</i>) gene and its association with milk yield and composition A Zidi, VM Fernández-Cabanás, J Carrizosa, J Jordana, B Urrutia, O Polvillo, P González-Redondo, D Gallardo, M Amills and JM Serradilla	190
Growth hormone alters lipid composition and increases the abundance of casein and lactalbumin mRNA in the MAC-T cell line TL Johnson, BAS Fujimoto, R Jiménez-Flores and DG Peterson	199
Investigation of mammary blood flow changes by transrectal colour Doppler sonography in an <i>Escherichia coli</i> mastitis model A Potapow, C Sauter-Louis, S Schmauder, J Friker, CP Nautrup, D Mehne, W Petzl and H Zerbe	205
Expression and function of leptin and its receptor in dairy goat mammary gland M Li, Q Li and X Gao	213
Specific IgG activity against diarrheagenic bacteria in bovine immune milk and effect of pH on its antigen-binding activity upon heating W Gao, L Chen, LB Xu and XH Huang	220
Improving the fatty acid profile of dairy cow milk by combining grazing with feeding of total mixed ration E Morales-Almaráz, A Soldado, A González, A Martínez-Fernández, I Domínguez-Vara, B del la Roza-Delgado and F Vicente	225

Efficacy of a teat dip containing the bacteriocin lacticin 3147 to eliminate Gram-positive pathogens associated with bovine mastitis K Klostermann, F Crispie, J Flynn, WJ Meaney, RP Ross and C Hill	231
Effect of forage:concentrate ratio on the quality of ewe's milk, especially on milk fat globules characteristics and fatty acids composition M Martini, GB Liponi and F Salari	239
Effect of CSN1S1 genotype and its interaction with diet energy level on milk production and quality in Girgentana goats fed ad libitum RI Pagano, P Pennisi, B Valenti, M Lanza, A Di Trana, P Di Gregori, A De Angelis and M Avondo	245
Genetic parameters for stayability in Murrah Buffalo PM Galeazzi, MEZ Mercadante, JAIV Silva, RR Aspilcueta-Borquis, GMF Camargo and H Tonhati	252
No. 3 (August 2010)	
The influence of milk composition on pH and calcium activity measured <i>in situ</i> during heat treatment of reconstituted skim milk J Chandrapala, I McKinnon, MA Augustin and P Udabage	257
Pategrás cheese as a suitable carrier for six probiotic cultures C Bergamini, E Hynes, C Meinardi, V Suárez, A Quiberoni and C Zalazar	265
Oxidative stress indicators and metabolic adaptations in response to the omission of the dry period in dairy cows R Mantovani, S Sgorlon, L Marinelli, L Bailoni, G Bittante and G Gabai	273
Cheese liking and consumer willingness to pay as affected by information about organic production F Napolitano, A Braghieri, E Piasentier, S Favotto, S Naspetti and F Zanoli	280
The type of cheese curds determined the colouring capacity of <i>Brevibacterium</i> and <i>Arthrobacter species</i> M-N Leclercq-Perlat and H-E Spinnler	287
Additive effects of <i>trans</i> -10, <i>cis</i> -12 conjugated linoleic acid and propionic acid on milk fat content and composition in dairy cows G Maxin, F Glasser and H Rulquin	295
Relative impact of α -tocopherol, copper and fatty acid composition on the occurrence of oxidized milk flavour J Juhlin, F Fikse, A Lundén, J Pickova and S Agenäs	302
Blood and milk immune and inflammatory profiles in periparturient dairy cows showing a different liver activity index E Trevisi, A Zecconi, G Bertoni and R Piccinini	310
Effect of coagulase-negative staphylococci on somatic cell count in Dutch dairy herds O Sampimon, BHP van den Borne, I Santman-Berends, HW Barkema and T Lam	318
Recovery of <i>Cronobacter sakazakii</i> from environmental surface swabbing materials using a 5-h enrichment procedure D Lindsay, B Somerton, B Hill and O Shrubbs	325
Transfer of linoleic and linolenic acid from feed to milk in cows fed isoenergetic diets differing in proportion and origin of concentrates and roughages R Khiaosa-ard, F Klevenhusen, CR Soliva, M Kreuzer and F Leiber	331
Effect of grazing fresh legumes or feeding silage on fatty acids and enzymes involved in the synthesis of milk fat in dairy cows L Wiking, PK Theil, JH Nielsen and MT Sørensen	337
Differences in sheep and goats milk fatty acid profile between conventional and organic farming systems E Tsiplakou, V Kotrotsios, I Hadjigeorgiou and G Zervas	343
Response surface optimization of the cultivation conditions and medium components for the production of folate by <i>Streptococcus thermophilus</i> R Iyer, SK Tomar and AK Singh	350
Isolation of lactoperoxidase using different cation exchange resins by batch and column procedures LWT Fweja, MJ Lewis and AS Grandison	357
Evolution of the mammary capillary network and carbonic anhydrase activity throughout lactation and during somatotropin treatment in goats MO Nielsen, K Cvek and K Dahlborn	368

Effect of subacute ruminal acidosis on milk fat concentration, yield and fatty acid profile of dairy cows receiving soybean oil O AlZahal, MM Or-Rashid, SL Greenwood and BW McBride	376
No. 4 (November 2010)	
Influence of milk quality and production protocol on proteolysis and lipolysis in Monti Dauni Meridionali Caciocavallo cheese M Albenzio, A Santillo, DE Russo, M Caroprese, R Marino and A Sevi	385
Hygienic and health characteristics of donkey milk during a follow-up study R Pilla, V Daprà, A Zecconi and R Piccinini	392
Composition of poorly and non-coagulating bovine milk and effect of calcium addition E Hallén, A Lundén, A-M Tyrisevä, M Westerlind and A Andrén	398
Assessment of epithelial cells' immune and inflammatory response to <i>Staphylococcus aureus</i> when exposed to a macrolide M Mazzilli and A Zecconi	404
Influenza virus A subtype H1N1 is inhibited by methylated β -lactoglobulin M Sitohy, M Scanu, B Besse, C Mollat, S Billaudel, T Haertlé and J-M Chobert	411
Measurement of thyroid hormones in donkey (<i>Equus asinus</i>) blood and milk: validation of ELISA kits and evaluation of sample collection, handling and storage L Todini, A Malfatti, E Salimei and F Fantuz	419
Relationship between growth behaviour, micro and macroscopic morphologies and freezing sensitivity of the ripening starter <i>Geotrichum candidum</i> is strain specific and mostly related to the morphotypes: the arthrospores/hyphae parameter G Missous, T Bouachanh, G Launay, M Guéguen, V Dieuleveax and J-M Panoff	425
Effects of divergent Holstein-Friesian strain and diet on diurnal patterns of plasma metabolites and hormones S Meier, ES Kolver, GA Verkerk and JR Roche	432
Fluorometric determination of uric acid in bovine milk T Larsen and KM Moyes	438
Characterization of lactoferrin oil-in-water emulsions and their stability in recombined milk A Acero-Lopez, P Schell, M Corredig and M Alexander	445
Immune response of bovine milk somatic cells to endotoxin in healthy quarters with normal and very low cell counts O Wellnitz, A Baumert, M Saudenowa and RM Bruckmaier	452
Efficacy of homeopathic and antibiotic treatment strategies in cases of mild and moderate bovine clinical mastitis C Werner, A Sobiraj and A Sundrum	460
Teat anatomy affects requirements for udder preparation in Mediterranean buffaloes S Ambord, MH Stoffel and RM Bruckmaier	468
Concentrations of bovine lactoferrin and citrate in milk during experimental endotoxin mastitis in early <i>versus</i> late-lactating dairy cows P Hyvönen, T Haarahiltunen, T Lehtolainen, J Heikkinen, R Isomäki and S Pyörälä	474
Association of production factors with milk IgA and IgM concentrations in normal lactating cows S Zhao, C Zhang, J Wang, D Bu, G Liu and L Zhou	481
In situ generation of milk protein-derived peptides in drying-off cows CH Ho, CJ Chang, WB Liu, HC Peh, SE Chen, HY Chen, TH Ho, MT Chen and H Nagahata	487
Rapid and direct quantitative detection of viable bifidobacteria in probiotic yogurt by combination of ethidium monoazide and real-time PCR using a molecular beacon approach XC Meng, R Pang and C Wang	498

Instructions to contributors

Full Directions to Contributors, of which this is a summary, can be found at the following web site
http://titles.cambridge.org/journals/journal_catalogue.asp?mnemonic=dar

General

The *Journal of Dairy Research* publishes reports on all aspects of dairy science from any country. Material for publication should be sent to the Editor: **DG Chamberlain, Hannah Research Park, Mauchline Road, Ayr KA6 5HL, UK**. Receipt of all material will be acknowledged. Submission of a paper will be taken to imply that it reports original unpublished work, that it is not under consideration elsewhere, and that if accepted by the Journal it will not be published elsewhere in any language without the consent of the Editors. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

Submission of Papers

Papers should be written in English using the spelling of the Concise Oxford Dictionary and should as far as possible be comprehensible to the non-specialist reader. They should be concise, but without omitting necessary material, and contain sufficient detail to allow repetition of the work.

Papers may be submitted electronically. The summary should be included as a separate Word file suitable for distribution to potential referees. Electronic submissions may be sent by post on disc or as e-mail attachments (jdr@hannahresearch.org.uk) a Word document file. Submitted manuscripts must be limited in length to a maximum of 6000 words allowing 250 words per fig or table. This is approximately the equivalent of a Word document of 18 A4 pages of doublespaced 12pt Times New Roman font.

Layout of Papers

Authors should consult the most recent issue of the Journal to familiarize themselves with Journal conventions and layout. Attention to these and other details will speed publication.

The paper should generally be divided as follows. (a) **Cover sheet** with the title of the article, names of authors each with one forename, together with their affiliations, a shortened version of the title suitable as a heading, and the name, postal address and e-mail address for correspondence. (b) A brief **Summary** should encapsulate the whole paper, showing clearly the new knowledge acquired. (c) The **introduction**, without heading, should not contain a full literature review, but should indicate why the subject of enquiry is interesting or important, and why the authors have chosen the approach described. (d) The Experimental or **Materials and Methods** section should contain adequate descriptions of procedures or appropriate references; sources of all materials (including address with post code) and sources or strains of animals, microorganisms and so on should be indicated. (e) **Results** should be as concise as possible, without repetition or inclusion of irrelevant material. Tables and illustrations should be used efficiently. (f) The **Discussion** should not repeat the results but discuss their significance. A combined **Results and Discussion** section is quite acceptable. Any acknowledgements are given in a separate paragraph without heading. It is the responsibility of the authors to ensure that individuals or organizations acknowledged as providing materials or otherwise are willing to be identified. (g) **References**. For some types of paper, other divisions may be preferable. **Pages** should be numbered; the addition of line numbers will aid refereeing.

References

References should be given in the text as Brown & Jones (1987) or (Schmidt, 1985; Nakamura et al. 1989); the first author with et al. is used for papers with three or more authors. Where necessary, papers are distinguished as Lenoir (1988a), (Litov et al 1990a, b). When several references appear together in the text, cite them in chronological order, and alphabetically within years. The Reference list at the end of the paper, which should begin on a fresh page, is given in strict alphabetical order. Authors should refer to a recent issue for the format of references.

Tables

Tables should be numbered and carry headings enabling them to be understood without reference to the text. Each Table should be typed on a separate sheet. Symbols for footnotes should be in the order : †, ‡, §, ¶, ††, etc. The use of *, **, etc, should be limited to indicating levels of significance.

Illustrations

Printed originals of figures and photographs should be provided as best possible quality. Figures such as graphs must be supplied in an editable file format, such as Excel. The use of bar graphs and histograms should be restricted, as the information can often be better presented in a table. In the presentation of results, experimental points should be indicated by symbols, used in order: ○, ●, △, ▲, □, ■, ×, +. Scale marks should be on the inside of the axes. Each Figure should be provided with a legend such that with the Figure it is comprehensible without reference to the text. Figure legends should be typed on a separate sheet or sheets, beginning Fig. 1.

Photographs should be glossy black and white prints accompanied by a legend as above. Scale bars on the photograph should be used, not magnifications in the legend. Colour plates can be included but these will normally result in a charge to the authors. Uncompressed electronic copies (e.g. TIFF files) may also be supplied.

Statistical Treatment

Individual results should not normally be given. The methods of statistical analysis should be clearly described; a suitable reference is adequate. Authors should make it clear whether they are quoting (e.g.) SD or SE. Any statement that two groups of values are different should be supported by the level of significance involved, as a single or range of *P* value: (*P* = 0.008) or (*P* < 0.01). Differences should not be claimed or implied if *P* > 0.05.

Gene Sequences

Original DNA sequences reported in JDR must also be submitted to GenBank. Instructions can be found at <http://www.ncbi.nlm.nih.gov/Genbank/index.html>

Ethics of Experiments

Authors are expected to adhere to the relevant codes covering human subjects and the use of animals.

Proofs

Authors will be advised when to expect proofs, which should be returned without delay to the appropriate editor. Proofs are sent for the correction of any printer's or editorial errors, not for addition of new material or revision of the text. Excessive alteration may have to be disallowed or made at the authors' expense, and may delay publication. Order forms for offprints are sent with proofs and should be returned directly to The Cambridge University Press.

journal of dairy research

Volume 77 Number 4 November 2010

Original Articles

- Influence of milk quality and production protocol on proteolysis and lipolysis in Monti Dauni Meridionali Caciocavallo cheese
M Albenzio, A Santillo, DE Russo, M Caroprese, R Marino and A Sevi 385
- Hygienic and health characteristics of donkey milk during a follow-up study
R Pilla, V Daprà, A Zecconi and R Piccinini 392
- Composition of poorly and non-coagulating bovine milk and effect of calcium addition
E Hallén, A Lundén, A-M Tyrisevä, M Westerlind and A Andrén 398
- Assessment of epithelial cells' immune and inflammatory response to *Staphylococcus aureus* when exposed to a macrolide
M Mazzilli and A Zecconi 404
- Influenza virus A subtype H1N1 is inhibited by methylated β -lactoglobulin
M Sitohy, M Scanu, B Besse, C Mollat, S Billaudel, T Haertlé and J-M Chobert 411
- Measurement of thyroid hormones in donkey (*Equus asinus*) blood and milk: validation of ELISA kits and evaluation of sample collection, handling and storage
L Todini, A Malfatti, E Salimei and F Fantuz 419
- Relationship between growth behaviour, micro and macroscopic morphologies and freezing sensitivity of the ripening starter *Geotrichum candidum* is strain specific and mostly related to the morphotypes: the arthrospores/hyphae parameter
G Missous, T Bouachanh, G Launay, M Guéguen, V Dieuleveax and J-M Panoff 425
- Effects of divergent Holstein-Friesian strain and diet on diurnal patterns of plasma metabolites and hormones
S Meier, ES Kolver, GA Verkerk and JR Roche 432
- Fluorometric determination of uric acid in bovine milk
T Larsen and KM Moyes 438
- Characterization of lactoferrin oil-in-water emulsions and their stability in recombined milk
A Acero-Lopez, P Schell, M Corredig and M Alexander 445
- Immune response of bovine milk somatic cells to endotoxin in healthy quarters with normal and very low cell counts
O Wellnitz, A Baumert, M Saudenowa and RM Bruckmaier 452
- Efficacy of homeopathic and antibiotic treatment strategies in cases of mild and moderate bovine clinical mastitis
C Werner, A Sobiraj and A Sundrum 460
- Teat anatomy affects requirements for udder preparation in Mediterranean buffaloes
S Ambord, MH Stoffel and RM Bruckmaier 468
- Concentrations of bovine lactoferrin and citrate in milk during experimental endotoxin mastitis in early versus late-lactating dairy cows
P Hyvönen, T Haarahiltunen, T Lehtolainen, J Heikkinen, R Isomäki and S Pyörälä 474
- Association of production factors with milk IgA and IgM concentrations in normal lactating cows
S Zhao, C Zhang, J Wang, D Bu, G Liu and L Zhou 481
- In situ generation of milk protein-derived peptides in drying-off cows
CH Ho, CJ Chang, WB Liu, HC Peh, SE Chen, HY Chen, TH Ho, MT Chen and H Nagahata 487
- Rapid and direct quantitative detection of viable bifidobacteria in probiotic yogurt by combination of ethidium monoazide and real-time PCR using a molecular beacon approach
XC Meng, R Pang and C Wang 498
