With these 1981 texts from IRWIN

Quantitative Analysis For Business Decisions, Sixth Edition

Harold **Bierman, Jr.**, *Cornell University*, Charles P. **Bonini**,
and Warren H. **Hausman**, *both of Stanford University*

This text is an introductory work in the application of mathematics to business problems. It acts as a connecting force between mathematic courses and applied business courses.

Production and Operations Management: A Life Cycle Approach, Third Edition

Richard B. **Chase**, and Nicholas J. **Aquilano**,
both of the University of Arizona

The text examines operations and production management from the perspective of how the production system evolves and operates over time.

Workbook—includes an outline and synopsis of corresponding chapters, solved and unsolved problems, short case studies, and short reproduced articles.

Production/Operations Management: Fundamental Concepts and Systems

Thomas **Hendrick**, *University of Colorado*

A condensed supplement of Moore & Hendrick's **Production/Operations Management**, to be used in introductory courses.

*Examination copies for adoption consideration available on request;
please indicate course title and text presently used.*
