Details of correction: clarification of potential competing interest

Corrected text should read:

This notice clarifies that at no point during and up to the time of publication of this article was JB offering commercial nutrition consultations for mental health. This was a role taken up subsequently to the article's publication. JB did advertise free consultations in a student nutrition clinic several years prior to the preparation of the article, and skin/dermal therapy and lifestyle coaching consultations, though this was not deemed to constitute a valid conflict of interest when making such declarations upon the article's submission. We would also like to declare that JS works as a consulting Naturopath in private practice.
