A manifesto for a social zooarchaeology. Swans and other beings in the Mesolithic – ERRATUM

Nick J. Overton and Yannis Hamilakis

doi:10.1017/S1380203813000159, Published by Cambridge University Press, 8 November 2013.

In the article by Overton and Hamilakis 2013 a number of proof corrections were not included in the final published article. These corrections are listed below.

On page 111 in the final sentence of the abstract

Instead of:

These ideas are illustrated with two case studies focusing on human–whooper swan interactions in the Danish Later Mesolithic, based on the faunal assemblage from the site of Aggersund in North Jutland, and the whooper swan remains found associated with the Grave 8 at Vedbæk.

It should read:

These ideas are illustrated with two case studies focusing on human–whooper swan interactions in the Danish Later Mesolithic, based on the faunal assemblage from the site of Aggersund in North Jutland, and the whooper swan remains found associated with Grave 8 at Vedbæk.

Page 121, table 3

The total for NISP is published as 223, however this should be 218. The total for MNE is published as 61, however this should be 62. The figure for Cervical Vertebra was placed under the ‘Left’ column, however it should be at the centre. Table 3 is reproduced here.

Table 3 Number of identified specimens (NISP) and minimum number of elements (MNE) of whooper swan.

Element	NISP	MNE	
		Left	Right
Cervical Vertebra	21		20
Carpometacarpus	13	–	2
Coracoid	12	9	2
Femur	4	1	1
Prox. Phalanx (Foot)	1		1
Furcular	2		2
Humerus	113	3	4
Longbone fragment	9		–
Pelvis	7		
Skull	2		1
Synsacrum	2		2
Thoracic vertebra	3		2
Tibiotarsus	10	3	3
Tarsometatarsus	9	3	2
Ulna	1	1 (unside)	
Vertebra Fragment	9		–
Total	218		62
