

Cambridge

Volcanoes of North America

United States and Canada

Edited by **CHARLES A. WOOD** and
JUERGEN KIENLE

A single reference source giving detailed information about volcanoes found in North America. A highly valuable book for anyone interested in natural history or fascinated by volcanoes.

£40.00 net Hardback 0 521 36469 8
500 pp. 1990

Physical Principles of Remote Sensing

W. G. REES

This book explains remote sensing of the earth's surface from air and from space using electromagnetic radiation, and forms the basis of an introductory course for physical and environmental scientists.

£35.00 net Hardback 0 521 35213 4
£13.95 net Paperback 0 521 35994 5
262 pp. 1990

Topics in Remote Sensing 1

Archaeological Prospecting and Remote Sensing

IRVIN SCOLLAR

In this volume some of the highly ingenious non-destructive methods for detecting and mapping remains of ancient cultures that have vanished from the modern surface are surveyed.

£95.00 net Hardback 0 521 32050 X
694 pp. 1990

WHEN THE EARTH MOVES...

EARTHQUAKE HAZARD ANALYSIS Leon Reiter

Leon Reiter, one of the leading authorities on seismic hazard analysis, provides an insightful look into issues that decision-makers, engineers, and scientists must face in earthquake hazard evaluation. Focusing on the basic structure, concepts, and application of deterministic and probabilistic analysis, Reiter also draws upon examples from the literature, case histories, and his own wealth of experience in the evaluation of nuclear power plants and their sites.

JOURNAL OF MARINE SYSTEMS

Journal of the European Association of Marine
Sciences and Techniques

Editors:

K. Kremling, *Institut für Meereskunde, Universität Kiel,
F.R.G.*,

J. Nihoul, *GeoHydrodynamics and Environment Research
(GHER), University of Liège, Belgium*,

M. Vigneaux, *IGBA, Université de Bordeaux, France*,
North American Editor:

G. Rowe, *Department of Oceanography, Texas A&M
University, U.S.A.*

Aims and Scope

The purpose of this European journal is to provide a medium of exchange for those engaged in marine research where there exists an interplay between geology, chemistry, biology, and physics. The *Journal of Marine Systems* welcomes original and state-of-the-art contributions on all aspects of marine sciences. Preference is given to papers which extend beyond the limit of a single discipline and which follow the rationale of system analysis.

Papers in the First Issue (Volume 1, no. 1/2)

Special Issue - Selected papers from the 21st Liège Colloquium on Coupled Ocean-Atmosphere Modeling
Tracer distributions in ocean models with lateral and isopycnal diffusion (*C.A. Lin and W.A. Gough*)

A coupled ocean-atmosphere box model of the Atlantic Ocean: a bimodel climate response (*G.E. Birchfield, M. Wyant and H. Wang*)

Momentum coupling in ocean-atmosphere models (*J.A.T. Bye*)

Simulation of the annual and interannual variation of the tropical Pacific Ocean (*Y. Kitamura*)

Modeling North Pacific SST anomalies as a response to anomalous atmospheric forcing (*U. Luksch, H. van Storch and E. Reimer*)

Sensitivity of wind-driven tropical Pacific Ocean simulations on seasonal and interannual time scales (*A.J. Busalacchi, M.J. McPhaden, J. Picaut and S.R. Springer*)

Sensitivity and realism of wind-driven tropical ocean models (*C. Duchêne and C. Frankignoul*)

The biennial component of ENSO variability (*E.M. Rasmusson, X. Wang and C.F. Ropelewski*)

Impact of prescribed sea surface temperatures on extended range forecasting (*M. Déqué*)

Interannual variability in the tropical Pacific as simulated in coupled ocean-atmosphere models (*M. Latif and A. Villwock*)

Intermediate models of intraseasonal and interannual waves in the tropics (*G.R. Budin and M.K. Davey*)

MARINE MICROPALAEONTOLOGY

Editors:

For the Americas, Pacific and Far East:

J.H. Lipps, *Museum of Paleontology, University of
California, Berkeley, CA, USA*

For Europe, Africa and the Near East:

H.R. Thierstein, *Geological Institute, ETH-Zentrum,
Zürich, Switzerland*

New Broader Scope

including marine biology and evolution

The new Editors of *Marine Micropaleontology* will continue to publish papers on topics which have been the backbone of the journal. However, they also aim for a slight change of emphasis and scope of the journal. In the words of Dr. Jere Lipps and Dr. Hans Thierstein themselves:

"We hope to publish papers that deal with the traditional oceanographic palaeoceanographic topics that have been the mainstay of Marine Micropaleontology, but we would also like to include papers dealing with other topics such as evolution, biochronology, ecology and paleoecology, and biology and paleobiology of marine microorganisms from both oceanic and continental settings. Basically, we want the best marine micropaleontology papers available."

The journal is an international forum for the publication of results of research in all fields of marine micropaleontology and paleoecology, and marine microbiology studies with a bearing on these fields, and of the ocean basins and continents. The journal encourages the publication of articles in which marine micropaleontology is used to solve fundamental geological and biological problems. It also promotes the presentation of innovative, provocative and controversial ideas in these fields.

Recently published papers (Volume 16)

A new planktic foraminifer transfer function for estimating Pliocene-Holocene paleoceanographic conditions in the North Atlantic (*H.J. Dowsett and R.Z. Poore*)

Ecology and paleoecology of triserial planktic foraminifera (*D. Kroon and A.J. Nederbragt*)

Coccoliths in sediment traps from the Norwegian Sea (*C. Samteleben and T. Bickert*)

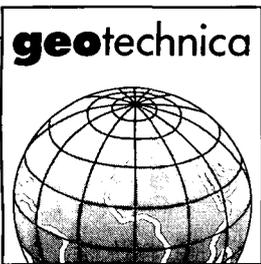

Distribution of coccoliths in surface sediments in the Norwegian-Greenland sea (*L.K. Eide*)

Response of Northern Indian Ocean deep-sea benthic foraminifera to global climates during Pliocene-Pleistocene (*A.K. Gupta and M.S. Srinivasan*)

International Trade Fair and Congress for Geo-sciences and Technology

Cologne, 18–21 September, 1991

The Earth concerns us all!

For the first time in Europe the geosciences and geotechnology achieve comprehensive presentation.

At the trade event some 300 companies from 5 continents will be marketing their machinery, equipment, systems and services for sectors such as civil engineering, mining, mineral prospecting, geochemistry, geodesy, geology and geophysics, water resources management, cartography, reconnaissance, ecology, waste disposal technology, environmental analysis and technology.

At the same time a congress will be taking place sponsored by the Alfred Wegener Foundation.

The topics covered include

- The geobiosphere in the process of change
- Data registration and exploration of the Earth's system
- Exploitation of the geobiosphere
- Adaption of the results for environmental protection.

Highly qualified speakers and over 1,000 participants will ensure the congress is an interdisciplinary information forum for safeguarding our world.

Make a note of the date! Request further information:

The British Journal for the History of Science

Special Issue – Darwin as a Geologist

"Long recognized as a prominent publication in the history of science..."

Magazines for Libraries

Now published by Cambridge University Press, *BJHS* is the official journal of the British Society for the History of Science. One of the premier journals in the field, it publishes high-quality papers and review articles on all aspects of the history of science.

In addition to research papers, *BJHS* includes extended Essay Reviews of important publications and an extensive Book Reviews section.

Subscription:

Volume 24, 1991 published in March, June, September and December: £62 for UK subscribers; £67 elsewhere; £17 for single parts; airmail £15 per year extra ISSN 0007-0874

Contents Volume 24: 2, 1991

Darwin as a Geologist

JAMES A. SECORD: The discovery of a vocation: Darwin's early geology

SANDRA HERBERT: Charles Darwin as a prospective geological author

FRANK H. T. RHODES: Darwin's search for a theory of the earth: symmetry, simplicity and speculation

NOTES FOR CONTRIBUTORS

Contributions for publication should be addressed to The Editors, *Geological Magazine*, Department of Earth Sciences, Downing Street, Cambridge CB2 3EQ, England, or may be submitted through a member of the Editorial Advisory Board (addresses inside front cover). Rapid Communications should be clearly marked as such on the envelope. Submission implies that the manuscript has not been published previously nor currently submitted for publication elsewhere.

All contributions, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. Contributions should follow the general style of papers in recent issues of the *Magazine*. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102. Authors alone are responsible for the correctness of their references.

Rapid Communications should follow the style of articles and must be no more than four printed pages of the *Magazine* (approximately 5000 word-equivalents) including an abstract of no more than 100 words. These contributions will be dealt with by a streamlined schedule and should appear within six months from receipt. To meet this schedule, authors will be required to make revisions with minimal delay.

Discussions of papers which have already appeared in the *Magazine* are welcomed, subject to the four-page limit.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be prepared following the notes for guidance on the facing page. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with double-line spacing on sheets separate from the running text.

References must be double-spaced and spelt out in full, e.g. BROOKS, M. & JAMES, D. G. 1975. The geological results of seismic refraction surveys in the Bristol Channel, 1970–73. *Journal of the Geological Society of London* **131**, 163–82.

Books should be cited as:

AGER, D. V. 1981. *The Nature of the Stratigraphical Record*, 2nd ed. London: Macmillan, 122 pp.

BOTT, M. H. P. 1973. The evolution of the Atlantic north of the Faroe Islands. In *Implications of Continental Drift to the Earth Sciences*, vol. 1 (eds D. H. Tarling and S. N. Runcorn), pp. 175–89. London, New York: Academic Press.

Unpublished work should normally be referred to in the text in parentheses as, for example, 'private communication' or 'unpub. Ph.D. thesis, Univ. London, 1988', and not included in the reference list unless in the press.

Fifty offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned. Rapid Communications will receive 10 free offprints; no further copies may be purchased.

Geological Magazine

CONTENTS

- Extrusive carbonatites: their origins reappraised in the light of new experimental data
GITTINS, J. & JAGO, B. C. 301–305
- Proterozoic geological evolution of the northern Vestfold Hills, Antarctica
PASSCHIER, C. W., BEKENDAM, R. F., HOEK, J. D., DIRKS, P. G. H. M. & DE BOORDER, H. 307–318
- Stratigraphy and morphotectonics of Karoo deposits of the northern Selous Basin, Tanzania
WOPFNER, H. & KAAYA, C. Z. 319–334
- A new early Ordovician Didymograptid, and its bearing on the correlation of the Skiddaw Group of England with the Tøyen Shale of Scandinavia
MALETZ, J., RUSHTON, A. W. A. & LINDHOLM, K. 335–343
- Gravitational collapse and extension along a mid-crustal detachment: the Lough Derg Slide, northwest Ireland
ALSOP, G. I. 345–354
- Palaeoenvironments and palynofacies of a pulsed transgression: the late Devonian and early Dinantian (Lower Carboniferous) rocks of southeast Wales
DAVIES, J. R., MCNESTRY, A. & WATERS, R. A. 355–380
- RAPID COMMUNICATIONS**
- The dimensions of the graptolite zooid
SUDBURY, M. 381–384
- Isotopic evidence for the extent of early Proterozoic basement in Scotland and northwest Ireland
DICKIN, A. P. & BOWES, D. R. 385–388
- REVIEWS** 389–409
- PUBLICATIONS RECEIVED** 411–413
- NOTICES** 415
