

## Erratum

# Charles Darwin's use of theology in the *Origin of Species* – Erratum

STEPHEN DILLEY

doi:10.1017/S000708741100032X, published by Cambridge University Press, 4 May 2011

It is regretted that the originally published paper contained an error. On page 28, the third sentence in the first full paragraph should read:

'*Positiva* theology legitimized everything from the trustworthiness of empirical data, to the famed homology argument, to Darwin's naturalized method.'

We apologise for this oversight.
