CUBA 1933

Prologue to Revolution by LUIS E. AGUILAR

Focusing on a crucial episode in Cuban history—the Revolution of 1933—Professor Aguilar describes the social, economic, and political forces that formed Cuban nationalism, and shows that the ideas, attitudes, and programs that seemed to originate with Fidel Castro’s revolution actually began decades earlier. He explores the early influence of the Communist party, and sheds new light on the interventionist role of the United States government, seriously questioning the actions of American diplomats in Havana. Based on extensive research, as well as on personal interviews, the book analyzes the 1933 Revolution in terms of its accomplishments, frustrations, and effects on the entire Cuban national structure.

Protest and Resistance in Angola and Brazil

Comparative Studies

Edited by Ronald H. Chilcote

Both Angola and Brazil have long histories of protest movements, ranging from guerrilla warfare to messianic popular uprisings. This work describes, analyzes, and compares a variety of these movements which have contributed to the unrest and conflict common to the two countries. Essays on Angola describe African movements against Portuguese colonialism while articles on Brazil present case studies of protest and resistance in the northeastern part of that country.

LBJ's Caribbean Blunder

In April 1965, over 22,000 combat-ready American troops landed in the Dominican Republic. This first direct U.S. military involvement to occur in a Latin American country in nearly forty years provoked a shocked and perplexed response from the observers of American policy. Mr. Lowenthal, who was living in the Dominican Republic at the time of the incident, gives a detailed account of what happened and an analysis of why it occurred. In addition to clarifying the events which took place, this definitive account sheds new light as well on the general process of U.S. foreign policy making.
