*Deputy Secretary:* Sqn. Ldr. K. H. Houghton, D.F.C.

The Journal of the Institute of Navigation

THE *Journal* is published quarterly by the Institute and is edited by M. W. RICHEY. It contains original papers contributing to the science of navigation, including those presented at meetings of the Institute together with the ensuing discussion. In addition the *Journal* includes a record of current navigational work, reviews of important books, and other matters of concern to those interested in navigation. The views expressed in the *Journal* are not necessarily those of the Institute, or of any organization or department to which the authors may belong. In the case of some papers Crown Copyright may be reserved.

The *Journal* is issued free to all members of the Institute. It is sold to the public at thirty shillings per copy or, by subscription, at one hundred and twenty-five shillings per annum (post free) and may be obtained through all booksellers and John Murray (Publishers) Ltd., 50 Albemarle Street, London W1.

Contributions, which are welcomed from both members and non-members, should be addressed to the Editor.

Enquiries for advertising space should be addressed to the Institute offices.

The postal address of the Institute is:

The Institute of Navigation,  
at The Royal Geographical Society,  
1 Kensington Gore, London SW7.

Telephone: 01-589 5021

# Marconi complete naval communications

**A complete range of communications equipment using s.s.b, i.s.b and all other modes of h.f and m.f transmissions, designed specifically for naval communications systems.**

- Simple, precise and highly accurate continuous decade selection of frequencies in 100 Hz steps.
- Rigid stability controlled by a single high accuracy frequency standard.

- Extreme simplicity of operation combined with versatility of service and high quality performance.
- Synthesizers and wideband amplifiers employed in these systems, which make maximum use of semiconductors.
- NATO codified.
- Complete system planning and installation.

This new range of Marconi equipment has already been used in the modernization of the communications of 10 Navies.

You get a good deal from

# Marconi MARINE...

... let's deal with **RADAR**

THE NEW 'RAYMARC' Series offers the finest radar value in the world. Choice of 12-inch or 16-inch displays, with or without true motion, or 12-inch high definition version for canal, river and harbour navigation.

Standard equipment includes variable range marker and electronic bearing indicator with digital readouts, performance monitor, visual tuning indicator and manual override of automatic pulse switching. *Yet these new 'Raymarcs' cost less to buy, less to install, less to hire and maintain than any comparable radar. Make the cost comparison.*

ALL AVAILABLE FOR OUTRIGHT SALE. ECONOMICAL RENTAL/MAINTENANCE TERMS IN THE U.K. AND MOST OTHER COUNTRIES

# NEW Manoverboard light and smoke signal - for reliable day or night use!

Approved by the Board of Trade, and complying with the SOLAS convention, the new Manoverboard signal is compactly designed, incorporating a central smoke candle of impact extruded aluminium supported by a durable High Density polythene float (with foam filling) on which the lights are mounted.

The Manoverboard, connected to lifebuoy, is mounted in the inverted position for protection against sun, weather, etc. Aluminium and polythene construction is corrosion-free.

Release of lifebuoy pulls Manoverboard from spring clip, causing it to fall through 90°. As seal breaks internal nylon cords operate two uncocked strikers which ignite smoke candle. Lanyard removes seal from water-activated batteries which have remained watertight during stowage.

Lights come on 7 to 10 seconds after Manoverboard enters water. Both smoke and lights are safe for oil or petrol covered waters - providing almost foolproof day and night signal in all conditions.

## Scrapped flight schedules are waste paper you can't afford!

Lost revenue through CAT II cancellations can be avoided. Smiths SEP6 Autopilot has full cat 2 capability. With SEP6 you can maintain flight schedule regularity and ensure maximum aircraft utilisation in low weather minimal conditions. This low-cost, lightweight Autopilot—only 55 lbs.—offers the fullest range of automatic capabilities and is based on experience accumulated since the fledgling days of flight. The versatility is such that the pilot's workload is reduced to a minimum while modular construction and inbuilt self-test

facilities make for ease and economy of maintenance. Service support is world-wide. Conforming to ARINC recommendations, the SEP6 Autopilot is part of Smiths Series 6 Flight Control System, which also includes the SFS6 Flight System. The Autopilot can be integrated with this, or any other Flight Director system. SEP6 Autopilot for CAT 2 gives you autopilot monitor, automatic throttle control, go-around guidance, and PVD head-free flight director. It will cost you nothing, and could profit you greatly, to let us tell you more.

Reviews of Recent Books

# A TRAVELLER'S GUIDE TO HEALTH

LT.-COLONEL J. M. ADAM, R.A.M.C.

Explorers, and all who travel by land or air or water, will find this book indispensable. It not only contains a useful compendium of First Aid hints for all emergencies but gives valuable chapters on preparation for travel, the prevention of local diseases as well as their treatment, and a wealth of other essential information. It is being published for the Royal Geographical Society as a direct result of the highly-successful Symposium: "Exploration Medicine".

128 pages, 6 $\frac{7}{8}$  ins.  $\times$  4 $\frac{3}{8}$  ins.

11 pages line illustrations.

12s. 6d. (*postage extra*)

Obtainable from the Office of the Royal Geographical Society, 1 Kensington Gore, London, S.W.7, or from booksellers.

an English and a French edition of

## **THE INTERNATIONAL HYDROGRAPHIC REVIEW**

---

This publication contains articles of topical interest on hydrography, hydrographic surveying and related techniques.

Each volume contains an average of 160 pages, 18 × 27 cm., and numerous illustrations.

Price per number \$6 (U.S.), post free.

Orders should be sent direct to the Bureau's Headquarters in Monaco, but payments can be made to the Bureau's account at Barclays Bank Ltd., Chief Foreign Branch, 152-156 Upper Thames Street, London, E.C.3.

A reduction of 30% on the price quoted is allowed to booksellers. The same reduction is granted to government offices and to naval or merchant marine officers of the Bureau's Member States, provided the order is sent direct to the Bureau.

Decca frees ships' speed and manoeuvring trials from the limitations of the measured mile, and also provides owners and officers with detailed data hitherto unavailable without considerable difficulty and expense. With Decca, trials can be conducted to an accuracy in the order of 0.1%, independent of visibility and free of depth and course restrictions. A complete record of the trial, including turning circles, acceleration and crash stop information, is provided. For ultra-accurate results and for trials outside permanent Decca coverage the Decca Hi-Fix system is used. This is only one field in which Decca brings greater economy, efficiency and accuracy to former methods. For general navigation, fishing, survey and oil exploration, naval operations, air/sea rescue and for the laying and maintenance of cables and buoys Decca's continuous and accurate position fixing information is relied on by 13,000 vessels of all types and sizes. **The Decca Navigator Company Limited, London**
