JOHN SNOW & THE BROAD
STREET PUMP

OUTBREAK RESPONSE TOOL KITS

The SHEA/CDC Outbreak Response Training Program (ORTP) tool kits are your source for quick, concise information and resources to help you and your facility effectively manage outbreaks.

- Expert-selected checklists, flow charts, summaries, and diagrams
- Guidance in implementation and leadership during a crisis
- Downloadable and fillable tables to make sure you have the information you need
- Free access on mobile devices, desktops, and via the Guideline Central app
- And more...

View the tool kits online
ORTP.GuidelineCentral.com

CONTENTS

Original Articles

- 637** Ventilator Bundle Compliance and Risk of Ventilator-Associated Events
Bryan D. Harris, Gale A. Thomas, Matthew H. Greene, Steven S. Spires and Thomas R. Talbot
- 644** *Commentary*: Shifting the Paradigm: Preventing More Than Infection
Kelly A. Cawcutt
- 647** Surveying Cystic Fibrosis Care Centers to Assess Adoption of Infection Prevention and Control Recommendations
Lisa Saiman, Juyan J. Zhou, Xiaotong Jiang, Michael R. Kosorok and Marianne S. Muhlebach
- 652** Nosocomial Outbreak of Upper Respiratory Tract Infection With β -Lactamase-Negative Ampicillin-Resistant Nontypeable *Haemophilus influenzae*
Reiko Miyahara, Motoi Suzuki, Konosuke Morimoto, Bin Chang, Sayaka Yoshida, Shiori Yoshinaga, Miki Kitamura, Mikiko Chikamori, Kazunori Oishi, Tatsuhiko Kitamura and Masayuki Ishida
- 660** Comparison of Predictors and Mortality Between Bloodstream Infections Caused by ESBL-Producing *Escherichia coli* and ESBL-Producing *Klebsiella pneumoniae*
Oded Scheuerman, Vered Schechner, Yehuda Carmeli, Belen Gutiérrez-Gutiérrez, Esther Calbo, Benito Almirante, Pier-Luigy Viale, Antonio Oliver, Patricia Ruiz-Garbajosa, Oriol Gasch, Monica Gozalo, Johann Pitout, Murat Akova, Carmen Peña, Jose Molina, Alicia Hernández-Torres, Mario Venditti, Nuria Prim, Julia Origüen, German Bou, Evelina Tacconelli, Maria Tumbarello, Axel Hamprecht, Ilias Karaiskos, Cristina de la Calle, Federico Pérez, Mitchell J. Schwaber, Joaquin Bermejo, Warren Lowman, Po-Ren Hsueh, Carolina Navarro-San Francisco, Robert A. Bonomo, David L. Paterson, Alvaro Pascual and Jesus Rodríguez-Baño, and the REIPI/ESGBIS/INCREMENT investigators
- 668** Defining the Role of the Environment in the Emergence and Persistence of *vanA* Vancomycin-Resistant Enterococcus (VRE) in an Intensive Care Unit: A Molecular Epidemiological Study
Andie S. Lee, Elizabeth White, Leigh G. Monahan, Slade O. Jensen, Raymond Chan and Sebastiaan J. van Hal
- 676** Impact of Discontinuing Contact Precautions for Methicillin-Resistant *Staphylococcus aureus* and Vancomycin-Resistant *Enterococcus*: An Interrupted Time Series Analysis
Gonzalo Bearman, Salma Abbas, Nadia Masroor, Kakotan Sanogo, Ginger Vanhoozer, Kaila Cooper, Michelle Doll, Michael P. Stevens and Michael B. Edmond
- 683** The Impact of Isolation on Healthcare Worker Contact and Compliance With Infection Control Practices in Nursing Homes
Lisa Pineles, Chris Petrucci, Eli N. Perencevich, Mary-Claire Roghmann, Kalpana Gupta, Jose Cadena, Gio Baracco, Christopher D. Pfeiffer, Graeme Forrest, Suzanne F. Bradley, Chris Crnich, Heather Reisinger and Daniel J. Morgan
- 688** The Risk of Cross Infection in the Emergency Department: A Simulation Study
Vicki Stover Hertzberg, Yuke A. Wang, Lisa K. Elon and Douglas W. Lowery-North
- 694** The Impact of the Medicaid Healthcare-Associated Condition Program on Mediastinitis Following Coronary Artery Bypass Graft
Heather E. Hsu, Alison Tse Kawai, Rui Wang, Maximilian S. Jentsch, Chanu Rhee, Kelly Horan, Robert Jin, Donald Goldmann and Grace M. Lee

Cover image: A replica of the original 1854 Broad Street Pump has stood at the corner of Broadwick and Lexington Streets in Soho, London since 1992. The John Snow Pub can be seen in the background. 701 The Prevalence of Healthcare-Associated Infections in Mainland China: A Systematic Review and Meta-analysis
Jiancong Wang, Fangfei Liu, Ermira Tartari, Jianan Huang, Stephan Harbarth, Didier Pittet and Walter Zingg

710 Patient Involvement in Healthcare-Associated Infection Research: A Lexical Review
Ann Dadich and Mary Wyr

718 Feasibility and Value of Developing a Regional Antibigram for Community Hospitals
Christopher J. Hostler, Rebekah W. Moehring, Elizabeth S. Dodds Ashley, Melissa Johnson, Angelina Davis, Sarah S. Lewis, Daniel J. Sexton and Deverick J. Anderson, for the CDC Prevention Epicenters Program

Concise Communications

723 Infectious Complications of Cryoablation and Microwave Ablation in Metastatic Solid Tumors
Ashish Bhargava, Harsha V. Banavasi and Pranatharthi H. Chandrasekar

727 Changing Epidemiology of Catheter-Related Bloodstream Infections in Cancer Patients
Anne Marie Chaftari, Ray Hachem, Ying Jiang, Pankil Shah, Alawami Hussain, Zainab Al Hamal, Ammar Yousif, Mary Jordan, Majd Michael and Issam Raad

730 Unintended Consequences of Pretransplant Vancomycin-Resistant Enterococcus Screening on Antimicrobial Stewardship Among Allogeneic Hematopoietic Cell Transplant Recipients
Erica J. Stohs, Trenton MacAllister, Steven A. Pergam, Elizabeth M. Krantz, Rupali Jain, Ania Sweet and Catherine Liu

734 Reducing *Clostridium difficile* Colitis Rates Via Cost-Saving Diagnostic Stewardship
Christina Yen, Paul Holtom, Susan M. Butler-Wu, Noah Wald-Dickler, Ira Shulman and Brad Spellberg

737 Reduced *Clostridium difficile* Tests and Laboratory-Identified Events With a Computerized Clinical Decision Support Tool and Financial Incentive
Gregory R. Madden, Ian German Mesner, Heather L. Cox, Amy J. Mathers, Jason A. Lyman, Costi D. Sifri and Kyle B. Enfield

741 Effect of Intranasal Mupirocin Prophylaxis on Methicillin-Resistant *Staphylococcus aureus* Transmission and Invasive Staphylococcal Infections in a Neonatal Intensive Care Unit
Elizabeth H. Ristagno, Kristina A. Bryant, Lynette F. Boland, Gordon G. Stout, Alan D. Junkins, Charles R. Woods, John A. Myers and Claudia M. Espinosa

746 Correlation of Hand Hygiene Compliance Measured by Direct Observation with Estimates Obtained from Product Usage
Westyn Branch-Elliman, Graham M. Snyder, Aleah D. King, Linda M. Baldini, Kaitlyn M. Dooley, David S. Yassa and Sharon B. Wright

750 False-Positive Tuberculin Skin Test Results Among Low-Risk Healthcare Workers Following Implementation of Fifty-Dose Vials of Purified Protein Derivative
Jeffrey M. Collins, Mary Hunter, Wanda Gordon, Russell R. Kempker, Henry M. Blumberg and Susan M. Ray

Commentary

753 Building Implementation Science for Veterans Affairs Healthcare Associated Infection Prevention: VA Healthcare-Associated Infection Prevention Network (VHIN)
Julie A. Keating, Chidi Obasi, Linda McKinley, Jackson Musuuza, Mary Jo Knobloch, Christopher Crnich, Charlesnika T. Evans, Martin Evans, Daniel Livorsi, Daniel J. Morgan, Eli Perencevich, Heather Schacht Reisinger, Marin L. Schweizer, Katie J. Suda and Nasia Safdar

Letters to the Editor

758 Novel Indicators for Enhancing the Clinical Outcome Metrics of Antimicrobial Stewardship Programs
José Molina, Germán Peñalva, José A. Lepe, Raquel Valencia, María V. Gil-Navarro and José M. Cisneros

- 759** Determining the Attributable Costs of *Clostridium difficile* Infections When Exposure Time Is Lacking: Be Wary of “Conditioning on the Future”
Thomas Heister, Martin Wolkewitz and Klaus Kaier
- 760** Got GAS? Ease the Bloat with Real-Time Whole-Genome Sequencing
Emil P. Lesho, Erik Snesrud, Melissa Bronstein, Margaret Pettis, Ana Ong, Rosslyn Maybank, Yoon Kwak, Anthony Jones, Kelly Vore, Patrick McGann and Mary Hinkle
- 762** Bacteriophage M13 May Be Used for the Assessment of Viral Transfer during Doffing of Ebola-Level Personal Protective Equipment
Shu Yuan, Zhong-Wei Zhang and Zi-Lin Li

MICROBIAL SURVEILLANCE TESTING MADE EASY

Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing

SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of
Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

< 10 CFU

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with Nelson Laboratories

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may

be obtained from the Copyright Clearance Center (<http://www.copyright.com>, email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription rate for 2018 is \$260. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's CJO homepage: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Since 2015, the cover format of each volume of *Infection Control & Hospital Epidemiology* has been designed to honor one of the many professionals throughout history who not only recognized how disease might be spread but also how to apply those principles to reduce healthcare-associated infections.

John Snow (1813–1858) was 1 of 9 children born to a working-class family in York, England. At the age of 14, he was apprenticed as a surgeon-apothecary with a family friend in Newcastle. He was sent to tend the afflicted in a nearby mining town during a cholera outbreak in 1832. He pursued his medical degree at the University of London, with the sponsorship of a wealthy uncle, and he initially set up a general practice in Soho. He gained fame as a practitioner of the new discipline of anesthesia and tended to Queen Victoria during the births of her children.

On August 24, 1854, a baby died of cholera on Broad Street near Soho. Shortly thereafter, 700 deaths from cholera occurred within a radius of 250 yards, and Snow happened to live nearby. As an anesthetist, he recognized how gases dissipated, and he rejected the prevailing dogma that cholera was spread through the inhalation of atmospheric vapors from decaying material because it would not explain how patients were affected miles away from the source. Snow hypothesized that water, contaminated with some cholera agent in feces, was the more likely explanation.

Using epidemiological principles, he identified who was affected using death certificates and where the illness was acquired (e.g., where case patients lived), then he determined what water supply they had used. He discovered that most households with a cholera case obtained water from the Broad Street pump. Snow ordered that the pump handle be removed. A local curate, Henry Whitehead, initially sought to disprove Snow's suspicions through further surveillance. Instead, Whitehead found that 8-fold more case patients had drunk from the pump than had not. Furthermore, he revealed that deaths occurred more often among residents who resided closest to the pump than in houses located farther away or that used a different water source. Ultimately, a leak between the Broad Street pump and a neighboring cesspool was discovered.

John Snow continued to carefully study the relationship between water contamination and cholera. Unfortunately, his work in epidemiology was ignored or pilloried in editorials in major journals. Snow would not live long enough to be recognized as a founder of modern epidemiology; he died of "apoplexy" or stroke at the age of 45 years. The John Snow Inn and a replica of the Broad Street pump can still be found in what is now called Broadwick Street in Soho, central London.

Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.
