
Instructions for Contributors

AIMS AND SCOPE. *Palliative & Supportive Care* publishes papers on psychiatric disorders and their management in the palliative care setting, including but not limited to depression, delirium, anxiety, and post-traumatic stress disorder and bereavement. Evolving constructs of particular relevance to the interface of psychiatry/psychology and palliative medicine, such as demoralization, meaning, dignity, hopelessness, will to live, suffering, and developmental growth at the end of life are a major focus of this journal. Research focusing on these issues, including epidemiology, diagnostic screening, assessment, management, and intervention drug and psychotherapy trials, are also addressed. In addition, the journal provides a forum for the discussion of psychosocial and sociocultural matters such as caregiver burden, health care provider burnout, counseling interventions, the impact of psychosocial factors related to intervention of pain and physical symptom control, and communication issues. The journal features full-length research reports and review articles as well as short communications.

ORIGINALITY AND COPYRIGHT. To be considered for publication in *Palliative & Supportive Care* a manuscript cannot have been published previously, nor can it be under review for publication elsewhere. Papers with multiple authors are reviewed with the assumption that all authors have approved the submitted manuscript and concur in its submission to *Palliative & Supportive Care*. A Transfer of Copyright Agreement must be executed before an article can be published. Government authors whose articles were created in the course of their employment must so certify in lieu of copyright transfer. Authors are responsible for obtaining written permission from the copyright owners to reprint any previously published material included in their article.

MANUSCRIPT SUBMISSION AND REVIEW. An original and three high quality photocopies with the Copyright Transfer Agreement should be submitted to:

Theresa Carpenter
Managing Editor, *Palliative & Supportive Care*
Memorial Sloan Kettering Cancer Center
Department of Psychiatry and Behavioral Sciences, Box 421
641 Lexington Avenue, 7th Floor
New York, NY 10022
Phone: (646) 888-0020
Fax: (212) 888-2356

Contributors may choose to submit their manuscript electronically by sending an email to palliati-ve@mskcc.org.

Each manuscript will normally be reviewed by at least two referees with relevant scientific experience. Authors may suggest appropriate reviewers, but final selection of referees will be made by the Editor. Reviewers are asked to

evaluate manuscripts for their scientific merit and clarity of presentation.

MANUSCRIPT PREPARATION AND STYLE. Manuscripts must be in English and typed double-spaced on one side only of 8 1/2 x 11" or A4 size good quality paper. Allow margins of at least 1" (20 mm); use a 5-space paragraph indent; do not hyphenate words at the end of lines and do not justify right margins. Minor corrections to the manuscript may be typed or neatly printed in ink; retyping is required for significant changes. Numbers should be spelled out when they occur at the beginning of a sentence; use Arabic numerals elsewhere. Abbreviations should be used sparingly and nonstandard abbreviations should be defined at their first occurrence. Metric system (SI) units should be used. Manuscripts that do not conform to the style of *Palliative & Supportive Care* will be returned without review. Authors of accepted manuscripts will be requested to provide the final text both as hard copy and on diskette. The diskette should be formatted in the latest version of MS Word for Macintosh or IBM compatible computers.

MANUSCRIPT ELEMENTS AND ORDER. Unless there are obvious and compelling reasons for variation (e.g. review articles, short communications), manuscripts should be organized as follows:

Title page. This is page 1. The title should be concise, informative, and free of abbreviations, chemical formulae, technical jargon, and esoteric terms. This page should include (a) the article's full title, (b) names and affiliations of all authors, (c) the name, mailing address, email address, and telephone number of the corresponding author, (d) the address for reprint requests if different from that of the corresponding author, (e) a short title of 50 characters or less, and (f) a list of the number of manuscript pages, number of tables, and number of figures.

Abstract and keywords page. This is page 2 and should include (a) the article's full title, (b) an abstract of no more than 300 words, and (c) up to 5 keywords or phrases that reflect the content and major thrust of the article. The abstract should give a succinct account of the objective, methods, results, and significance of the research.

Introduction. This section begins on page 3 and should clearly state the objective of the research in the context of previous work bearing directly on the subject. An extensive review of the literature is not usually appropriate.

Methods. This section should be brief but provide sufficient information to permit others to replicate the study. Pertinent details of species, apparatus and equipment, procedures and experimental design should be described.

All experiments involving human subjects must be conducted in accordance with principles embodied in the

Declaration of Helsinki (Code of Ethics of the World Medical Association). Experiments involving animal subjects must conform to the principles regarding the care and use of animals adopted by the American Physiological Society and the Society for Neuroscience. The editor may refuse papers that provide insufficient evidence of adherence to these principles.

Results. The results should be presented clearly and concisely, using figures and tables to summarize or illustrate the important findings. Quantitative observations are often more effectively displayed in graphs than in tables.

Discussion. The discussion should summarize the major findings and explain their significance in terms of the study's objectives and relationship to previous, relevant work. This section should present compact, clearly developed arguments rather than wide-ranging speculation or uncritical collation of earlier reports.

Acknowledgments. Use a separate page to recognize the contributions of individuals and supporting institutions.

References. In the text, references should be cited as follows:

as shown by Cella and Tusky (1990)
(Bloom et al., 2000)
(Cella & Tusky, 1990; Bloom et al., 2000)

The alphabetical list of references begins a new page, and must be typed double-spaced. Each in-text citation must have a corresponding reference and vice versa. List works by different authors who are cited within the same parentheses in chronological order, beginning with the earlier work. Journal titles should not be abbreviated. Only published articles and articles in press should appear in this list. Responsibility for the accuracy of references cited lies with the authors. Brief examples:

Journal article

Cella, D.F. & Tusky, D.S. (1990). Measuring quality of life today: Methodological aspects. *Oncology*, 4, 29–38.

Book

Tompar-Tiu, A. & Sustento-Seneriches, J. (1995). *Depression and Other Mental Health Issues: The Filipino American Experience*. San Francisco: Jossey-Bass.

Chapter in an edited book

Karnofsky, D.A. & Burchenal, J.H. (1949). The clinical evaluation of chemotherapeutic agents in cancer. In *Evaluation of Chemotherapeutic Agents in Cancer*, Macleod, C.M. (ed.), pp. 191–205. New York: Columbia University Press.

For more than one work by the same author(s) published in the same year, use (Jones, 1986a, 1986b) in text and likewise in the reference section.

Tables. Tables should be numbered consecutively with Arabic numerals and each should be typed double-spaced on a separate sheet. All tables are to be grouped together after the references. A short explanatory title and column headings should make the table intelligible without reference to the text. All tables must be cited and their approximate positions indicated in the text.

Figures and legends. The number of figures should be the minimum necessary to make the essential points of the paper. Figures should be supplied no larger than 8 × 10" (approx. 200 × 250 mm) and must be camera-ready. Photographs for halftone reproduction must be on white glossy paper. Figures should be composed to occupy a single column (8.3 cm) or two columns (17 cm) after reduction. Diagrams and illustrations must have a professional appearance and be typed or drawn with sharp, black lettering to permit reduction. To assure legibility, letters, numbers, and symbols on figures should have a minimum height of 1 mm when reduced. Photomicrographs must include a calibration bar; if symbols are used on micrographs, they must contrast sufficiently with the background to be clearly visible when printed. Photocopies of micrographs are not acceptable for review purposes.

Artwork should normally be in black and white; if authors have color figures, the publisher will provide a price quotation for the additional production costs. All figures must be identified on the back with the short title of the paper, figure number, and figure orientation (top or bottom). Preferably, figures should be mounted on heavy sheets of the same size as the manuscript. Four complete sets of figures should be carefully packaged in protective envelopes, one to accompany each copy of the manuscript. Each figure must be cited and its approximate position clearly indicated within the text.

Figures must be numbered consecutively with Arabic numerals and be accompanied by a descriptive caption typed double-spaced on a separate sheet. The captions, collected at the end of the manuscript, should concisely describe the figure and identify any symbols and/or calibration bars.

COPYEDITING AND PAGE PROOFS. The publisher reserves the right to copyedit manuscripts to conform to the style of *Palliative & Supportive Care*. The corresponding author will receive page proofs for final proofreading. No rewriting of the final accepted manuscript is permitted at the proof stage, and substantial changes may be charged to the authors. Page proofs can be distributed as PDF files by email, and authors are encouraged to choose this option.

Reducing Health Disparities in Quality Cancer Care:
Psychosocial Research, Practice and Outreach

www.apos-society.org

Mission

To advance the science and practice of psychosocial care for people with cancer

About APOS

The American Psychosocial Oncology Society was formed in 1986 to address the need for networking among the small numbers of professionals working in the psychosocial aspects of cancer and AIDS. In 2002, APOS developed a constitution that provided independence for the organization, encouraged multidisciplinary membership and firmly established itself as the single multidisciplinary organization in the U.S. devoted solely to psychosocial care in cancer. Members come to work together from the fields of oncology, psychiatry, psychology, social work, nursing, counseling, therapy and patient advocacy to improve the psychosocial care of patients and their families.

Member Benefits

- Reduced rates for the APOS Annual Conference and workshop trainings
- Online Subscription to *Psycho-Oncology*, (Wiley), Members-only reduced subscription rates to the hard copy edition of *Psycho-Oncology*, *Palliative and Supportive Care*, and the *Journal of Cancer Survivorship*
- Members-only discounts on major publications such as the *Psycho-Oncology Textbook* (Oxford)
- Access to the members-only website, which includes the following:
 - An online searchable membership directory
 - Information about Special Interest Groups and their focus areas
 - Presentations from the APOS Annual Conference
- APOS Advocate, a quarterly e-newsletter
- Opportunity to join member Special Interest Groups
- The opportunity to build bridges to, and a network with, other similar and complementary organizations and professions

Visit www.apos-society.org for more information.

Canadian Journal on Aging / Revue canadienne du vieillissement

Editor: Mark Rosenberg, *Queen's University, Canada*

The *Canadian Journal on Aging/La Revue canadienne du vieillissement (CJA/RCV)* promotes excellence in research and disseminates the latest work of researchers in the social sciences, humanities, health and biological sciences who study the older population of Canada and other countries; informs policy debates relevant to aging through the publication of the highest quality research; seeks to improve the quality of life for Canada's older population and for older populations in other parts of the world through the publication of research that focuses on the

broad range of relevant issues from income security to family relationships to service delivery and best practices; and encourages the exchange of the latest ideas in gerontological research through the publication of work by international scholars to the benefit of the Canadian and international scholarly communities as well as older adults in Canada and around the world.

PALLIATIVE & SUPPORTIVE CARE

Volume 9

September 2011

Number 3

CONTENTS

Guest Editorial

- BEN A. RICH 233 *Baxter v. Montana*: What the Montana Supreme Court said about dying, dignity, and palliative options of last resort

Original Articles

- XAVIER GÓMEZ-BATISTE, MONTSE BUISAN, PAU GONZALEZ, DAVID VELASCO, VERÓNICA DE PASCUAL, JOSE ESPINOSA, ANNA NOVELLAS, MARISA MARTÍNEZ-MUÑOZ, MARC SIMÓN, CANDELA CALLE, JAUME LANASPA, AND WILLIAM BREITBART 239 The “*La Caixa*” foundation and WHO Collaborating Center Spanish National Program for Enhancing Psychosocial and spiritual palliative care for patients with advanced diseases, and their families: Preliminary findings
- ANNA MILBERG AND PETER STRANG 251 Protection against perceptions of powerlessness and helplessness during palliative care: The family members’ perspective
- ANETTE HENRIKSSON, EVA BENZEIN, BRITT-MARIE TERNESTEDT, AND BIRGITTA ANDERSHED 263 Meeting needs of family members of persons with life-threatening illness: A support group program during ongoing palliative care
- JUDITH C. HAYS, LAURA WOOD, KAREN STEINHAUSER, MAREN K. OLSON, JENNIFER H. LINDQUIST, AND JAMES TULSKY 273 Clergy-laity support and patients’ mood during serious illness: A cross-sectional epidemiologic study
- KELLY PENZ AND WENDY DUGGLEBY 281 Harmonizing hope: A grounded theory study of the experience of hope of registered nurses who provide palliative care in community settings
- BIRGITTA WALLERSTEDT, EVA BENZEIN, AND BIRGITTA ANDERSHED 295 Sharing living and dying: A balancing act between vulnerability and a sense of security. Enrolled nurses’ experiences of working in the sitting service for dying of patients at home
- SHEILA N. GARLAND, JOSHUA LOUNSBERRY, GUY PELLETIER, AND OLIVER F. BATHE 305 ‘How do you live without a stomach?’: A multiple case study examination of total gastrectomy for palliation or prophylaxis

Review Articles

- ANNA-LEILA WILLIAMS AND RUTH MCCORKLE 315 Cancer family caregivers during the palliative, hospice, and bereavement phases: A review of the descriptive psychosocial literature
