The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

'SONERYL'

TRADE MARK

BRAND

butobarbitone

for insomnia and anxiety states

At the present time the practitioner is faced with an increasing number of patients suffering from insomnia and anxiety states. These cases are adequately treated by the discriminate prescribing of 'Soneryl.' Being rapidly eliminated, this product seldom gives rise to post-hypnotic dullness, and so enables the patient to go about his work refreshed in mind and body. 'Soneryl' may be taken over lengthy periods without the danger of habit formation.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

DROPPER ?

**DeVilbiss
ATOMIZERS**

ATOMIZER ?

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

A REVOLUTIONARY DEVELOPMENT IN
INTRANASAL SULPHONAMIDE THERAPY

'SULFEX'

'Sulfex'* combines, for the first time, in a single chemically stable preparation the potent bacteriostatic action of 'Mickraform'* sulphathiazole (5%) and the effective vasoconstriction of 'Paredrinex'* (1%). The minute crystals of 'Mickraform' sulphathiazole ensure: (1) Enhanced therapeutic effect; (2) Uniform coating over infected areas; (3) Prolonged bacteriostatic action; (4) Easy passage into the sinuses. 'Paredrinex' exerts a rapid, complete and prolonged shrinkage of the nasal mucosa, thus achieving maximum ventilation and drainage. Indicated in acute nasal and sinus conditions—especially those secondary to the common cold.

Available, on prescription only,
in 1-oz. bottles with dropper.
Retail price 4/6 + 7d. Purchase Tax.

*Sample and further details on
the signed request of physicians.*

We do not claim to provide the answer—even if one were required. We can however solve a more important problem: “**How deaf is your patient**”—for the Marconi Acuity Meter scientifically assesses the degree of each patient’s deafness. The original instrument, already adopted by leading otologists, represented a marked development in diagnostic technique. With the inevitable war-time increase in deafness, the production to-day of an improved design is appropriately timed. For present or post-war rehabilitation, a limited number of these instruments, type TF444A, are available, subject to the approval of the appropriate authority. Please write for further particulars.

CLINICAL INSTRUCTION

Clinical instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is given in the Out-patient Department of both Hospitals from 2 to 5 p.m. daily (except Saturdays) and in the In-patient Operating Theatres.

Practitioners and Medical Students are admitted to the practice of the Hospital as Post-Graduates. Clinical Assistants, whose duty it is to assist the staff, are appointed as vacancies occur. For further information apply to the Dean.

FOR ORAL MEDICATION

**KERFOOTS
Proflavine
LOZENGES**

enable the affected tissues to be bathed in a naturally buffered antiseptic solution.

Each contains
Proflavine Sulphate 3 mg.
In bottles of 30 and 500

**KERFOOTS
Sulphanilamide
LOZENGES**

are of special value in throat affections due to local streptococcal infection.

Each contains
Sulphanilamide gr. 1
In bottles of 50 and 500

Professional samples on request.

MEMORANDUM

Have you the latest
data on **AMPLIVOX High Fidelity HEARING AIDS?**

- 1 Crystal-type microphone with complete absence of inherent noise.
- 2 Three-valve amplifier provides frequency range from 100 to 5,000 c.p.s., which is adjustable to suit different types of deafness.

- 3 **AMPLIVOX** fidelity prevents the development of speech defects in the deaf person arising from distorted hearing over long periods and will help to correct such defects where they are already present.
- 4 The **AMPLIVOX** solves the problem of providing a high quality hearing aid with low upkeep costs and offers simplicity and reliability to those who want the smallest possible instrument. It will go into a gentleman's waistcoat pocket or lady's handbag with ease.

Descriptive literature will be sent on request.
