# CLAIMS OF ODOL SUBSTANTIATED

## Striking endorsement by "The Nursing Mirror"

"Both as a Mouthwash and a Dentifrice, most of the general public, also nurses, have long been familiar with the excellence of Odol. It is fragrant, antiseptic and efficient as a cleanser for natural and artificial teeth, and is largely used by dentists in their practice, and in surgery in certain operations on the mouth. 4% Odol in tepid water will kill the bacillus typhosus in less than 30 seconds, while a 2% solution will do the same in 2 minutes. The results of analysis of a sample of Odol by our experts showed that it contained about 12% of water, together with oils of peppermint and cloves and salicylic acid combined as salicylates, the principal solvent being an ester or esters with a combined saponification equivalent of 129.2, a boiling point 160-170°C., and a specific gravity 1.097 at 60°F. The Odol was neutral and retained its antiseptic properties for a considerable time.

"The following claims made by the makers of this product are, therefore, justified, namely, that Odol is a good mouth-wash, antiseptic, yet non-caustic; that it cannot harm the mouth, and is harmless if accidentally swallowed; and that it is good for artificial dentures and will neither discolour nor crack dental plates."—

*"Nursing Mirror and Midwives' Journal"*  
November 22, 1930.

# Odol

*Samples and literature will gladly be sent to any member of the Medical or Dental professions on application to:—*

### CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY, LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with a *spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

# DEAFNESS!

## *The Choice of Medical Men*

for their own deafness or to recommend to patients is the "Ardente" method, because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service by its originator—Mr R. H. Dent—not any mere selling agent or company. It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient, and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

### "Ardente" is the Choice of

**Prof. SIR AMBROSE FLEMING, Kt., M.A., B.Sc., F.R.S.**, and many leading medical men—professional etiquette makes it necessary for us to withhold their names. "ARDEnte" is shown and appreciated at every B.M.A. meeting, and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

"Ardente" is the choice of every important medical journal and "TRUTH," and for use at Hospitals and supplied through charities, Government Departments (also used by government officials).

Behind "ARDEnte" is a personality—his interest is yours, his success built by the recommendation of his users who chose "Ardente" on its merits—

"Ardente" can be tested Free at any of our Service Bureaux—the most complete in the whole deaf world—or at Doctors' surgeries or patients' homes any day, any time—week-ends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you if Deaf yourself or interested on behalf of patients.

#### "ARDEnte" STETHOSCOPE

Mr R. H. Dent makes a Stethoscope specially for members of the medical profession suffering from deafness. Many are in use, and excellent results are reported on the latest, as evidenced by the interest shown at the last B.M.A. Meeting.

Mr Dent is the inventor of "Ardente."

Mr Dent is the pioneer of individual ear-fitting.

Mr Dent is the originator of the "Free Home Test."

# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY  
WALTER HOWARTH

ASSISTED BY  
V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.
4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications should be addressed to "EDITOR, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."
7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.
8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.
9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

## UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & CO., 31-33 East 10th Street, New York.

## CANCER OF THE LARYNX

By SIR ST CLAIR THOMSON, M.D., F.R.C.S., F.R.C.P.,  
*Emeritus Professor of Laryngology in King's College Hospital,*  
*London,* and LIONEL COLLEDGE, M.B., F.R.C.S., *Surgeon*  
*to the Throat Department, St George's Hospital, London.* With  
109 coloured and other illustrations. 25s. net.

"A book on a subject that is exercising the minds of the profession supplies a definite need, and when its writers are foremost among those who have advanced our knowledge, a work such as this is sure to receive a generous welcome. Its authors present the results based on personal work and experience with admirable fullness and clearness. . . . The principles of treatment are fully laid down. . . . The authors have explored all aspects of the question, and their verdict will carry great weight. Their judgments are likely to stand the test of time. There are over a hundred admirable illustrations."—*British Medical Journal.*

# AIDS FOR THE DEAF

## HAWKSLEY'S AURICLES

The best non-electric aid for slight and moderate degrees of deafness.

### For Extreme Cases of Deafness HAWKSLEY'S "GREEN STRIPE" CONVERSATION TUBES

#### IMPORTANT NOTICE

We are the originators of an *independent* 10 days' free home trial, without obligation to purchase, of any of our Acoustic Aids. We daily hear most distressing tales from deaf people who have been coerced into purchasing expensive aids without a proper home trial.

We also stock all patterns of Electric Ear Phones.
