

# CAMBRIDGE – IMPORTANT BOOKS for Developmental Psychology and Psychopathology

## **The Psychiatric Team and the Social Definition of Schizophrenia**

An Anthropological Study of Person and Illness

**Rob Barrett**

Traces the evolution of the concept of schizophrenia, showing how contemporary theoretical constructs arise and become dominant. It reveals to mental health professionals many unspoken assumptions in their role, and confirms the power of the ethnographic approach in psychiatric research.

*Studies in Social and Community Psychiatry*

1995 c.220 pp. 41653-1 Hardback about \$49.95

## **Lifelines and Risks**

Pathways of Youth in Our Time

**Robert B. Cairns and Beverley D. Cairns**

Follows the pathways of 695 young people growing up in the 1980s and 1990s by focusing on the primary risks of youth in our time, and lifelines—the avenues by which redirection and help may be provided. The authors consider specific risks such as violence, school dropout, teenage parenthood, suicide, threats to self-esteem, and substance abuse.

1995 325 pp. 48112-0 Hardback \$54.95  
48570-3 Paperback \$19.95

## **Personality Disorders**

Recognition and Clinical Management

**Jonathan H. Dowson and Adrian T. Grounds**

Dispels the myth that personality disorder is simply a category for problem individuals for whom nothing can be done by describing the features of personality disorders and their management in clinical practice.

1995 c.375 pp. 45049-7 Hardback \$84.95

## **The Depressed Child and Adolescent**

Developmental and Clinical Perspectives

**Ian M. Goodyer, Editor**

Examines the nature and characteristics of depression in children and adolescents. Experts discuss the historical development of the concept and provide a synthesis of existing knowledge on the normal development of emotion in young children and the onset of depression in the older child.

*Cambridge Monographs on Child and Adolescent Psychiatry 1*

1995 378 pp. 43326-6 Hardback \$79.95

## **Theoretical Approaches to Obsessive-Compulsive Disorder**

**Ian Jakes**

Offers a critical discussion of the most important theories explaining this disorder and offers an entirely new approach to its definition.

*Problems in the Behavioral Sciences 14*

1995 224 pp. 46058-1 Hardback about \$44.95

## **Coercion and Punishment in Long-term Perspectives**

**Joan McCord, Editor**

Contributors examine the benefits and costs of coercion and punishment, considering such issues as mental health, antisocial and criminal behavior, substance abuse, and issues related to measurement and prediction.

1995 406 pp. 45069-1 Hardback

\$59.95

## **Psychosocial Disturbances in Young People**

Challenges for Prevention

**Michael Rutter, Editor**

Provides an overview of important areas in adolescence, ranging from delinquency to depression. Addresses key questions as to whether or not problems have multiple causes and what the influences of individual, family and societal factors are in the rise of problems.

1995 400 pp. 46187-1 Hardback \$44.95

## **Intellectual Development in Adulthood**

The Seattle Longitudinal Study

**K. Warner Schaie**

Analyzes the Seattle Longitudinal Study and raises important practical questions such as at what age developmental peaks occur, and what the generational differences and within-generation age changes are.

1995 424 pp. 43014-3 Hardback \$54.95

## Instructions for Contributors

*Development and Psychopathology* strongly encourages contributions from a wide array of disciplines because an effective developmental approach to psychopathology necessitates a broad synthesis of knowledge. Manuscripts will be considered that address, for example, the causes and effects of genetic, ontogenetic, biochemical, cognitive, or socioeconomic factors in developmental processes with relevance to various risk or psychopathological conditions. The journal also seeks articles on the processes underlying the adaptive and maladaptive outcomes in populations at risk for psychopathology.

### Manuscript Review Policy

Manuscripts will have a blind review by at least two scholars. Every effort will be made to notify authors within eight weeks of submission concerning the reviewers' recommendations and comments. Manuscripts will be promptly published upon acceptance. *Development and Psychopathology* has no page charges.

### Manuscript Submission

Four copies of each manuscript should be submitted to:  
Dante Cicchetti, PhD  
Department of Psychology  
Director, Mt. Hope Family Center  
University of Rochester  
187 Edinburgh Street  
Rochester, NY 14608, U.S.A.

### Manuscript Preparation and Style

**General.** All manuscripts must be typed on 8½" × 11" or A4 white bond paper with ample margins on all sides. The entire manuscript—including abstract, tables, and references—must be double-spaced. Manuscript pages must be numbered consecutively. Language of publication: English.

**Style and Manuscript Order.** Follow the general style guidelines set forth in the *Publication Manual of the American Psychological Association* (3rd ed.). The Editor may find it necessary to return manuscripts for reworking or retyping that do not conform to requirements. Manuscripts must be arranged in the following order:

**Title Page** (page 1). To facilitate blind review, all indication of authorship must be limited to this page; other pages must only show the short title plus page number at the top right. On the title page include (a) full article title; (b) name and affiliations of all authors; (c) mailing address and telephone number of the lead author; (d) address of where to send offprints, if different from the lead author; (e) short title of less than 50 characters.

**Abstract Page** (page 2). Include (a) full article title; (b) abstract of no more than 200 words; (c) up to 5 keywords for indexing and information retrieval.

**Acknowledgments** (page 2). These should be placed below the abstract. Use this section to indicate grant support, substantial assistance in the preparation of the article, or other author notes.

**Text** (page 3). Use a 5-character paragraph indent. Do not hyphenate words at the end of lines. Do not justify right margins.

**References.** Bibliographic citations in the text must include the author's last name and date of publication, and may include page references. Examples of in-text citation styling are: Brown (1983), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966),

(Peterson, Danner, & Flavell, 1972), and subsequently (Peterson et al., 1972). If more than one, citations must be in *alphabetical* order. Every in-text citation must be included in the reference section; every reference must be cited in the text. Examples of reference styling are:

#### Journal Article

Sroufe, L. A., & Rutter, M. (1984). The domain of developmental psychopathology. *Child Development*, 55, 17–29.

#### Book

Piaget, J. (1962). *Play, dreams, and imitation in childhood*. New York: Norton.

#### Chapter in an Edited Book

Cicchetti, D., & Poggie-Hesse, P. (1982). Possible contributions of the study of organically retarded persons to developmental theory. In E. Zigler & D. Balla (Eds.), *Mental retardation: The developmental-difference controversy* (pp. 277–318). Hillsdale, NJ: Erlbaum.

**Appendix** (optional). Use only if needed. May be useful for review, but not appropriate for publication.

**Tables.** Tables must appear as a unit following the reference section. Each table should be typed double-spaced on a separate sheet, numbered consecutively with an Arabic numeral, and given a short title. (Example: Table 5. Comparisons on language variables.) All tables must be cited in the text.

**Figures.** Figures must appear as a unit following the tables. Each figure must be numbered consecutively with an Arabic numeral and a descriptive legend. Legends must be typed together, double-spaced, on a separate sheet preceding the artwork. (Example: Figure 3. Progress in language development.) Figures must be supplied no larger than 8" × 10", be black and white, and be ready for photographic reproduction. Diagrams must be professionally rendered or computer generated. All labels and details must be clearly printed and large enough to remain legible at a 50% reduction. Artwork should be identified by figure number and short title and be carefully packaged in a protective envelope. All figures must be cited in the text.

### Copyediting and Page Proofs

The publisher reserves the right to copyedit manuscripts to conform to journal style. The lead author will receive page proofs for correction of typographical errors only. No rewriting of the original manuscript as submitted is allowed in the proof stage. Authors must return proofs to Cambridge within 48 hours of receipt or approval will be assumed.

### Offprints

The lead author will receive 25 free article offprints of his or her article. A form accompanying page proofs allows the lead author to order complete copies of the issue and/or purchase of additional offprints. All coauthor offprint requirements must be included on this form. Orders received after the issue is printed are subject to a 50% reprint surcharge.

### Copyright and Originality

It is a condition of publication that all manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. All authors must sign the Transfer of Copyright Agreement, available from the publisher, before an article can be published. Government authors whose articles were created in the course of their employment must so certify in lieu of copyright transfer. Authors are responsible for obtaining written permission from the copyright owners to reprint any previously published material included in their article.
