

# Glasgow Mathematical Journal

*Formerly Proceedings of the Glasgow Mathematical Association*

## CONTENTS

<b>Mario Petrich</b> , The translational hull of a completely 0-simple semigroup	1
<b>Mario Petrich</b> , Translational hull and semigroups of binary relations	12
<b>W. G. Leavitt</b> , Type radicals	22
<b>J. C. Cooke</b> , Note on a pair of dual trigonometric series	30
<b>Mumtaz K. Kassir</b> , The torsion of a semi-infinite elastic solid by an elliptical stamp	36
<b>W. D. Munn</b> , Regular $\omega$ -semigroups	46
<b>Ian N. Sneddon</b> , A procedure for deriving inversion formulae for integral transforms of a general kind	67

## GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 128 pages.

The prepaid subscription for each Volume is Forty Shillings (U.S.A. \$6.50), post free. Single parts may be supplied at a cost of Twenty Shillings each (U.S.A. \$3.25), net.

Copies may be ordered direct from the publishers or from any bookseller.

### *Information for Contributors*

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for off-prints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:

## CONTENTS

<b>Baker, J. W.</b> A note on the duality of locally compact groups . . . . .	87
<b>Berndt, B. C.</b> An identity for certain Dirichlet series . . . . .	79
<b>Cooke, J. C.</b> Note on a pair of dual trigonometric series . . . . .	30
<b>Gillespie, T. A. and West, T. T.</b> A characterisation and two examples of Riesz operators . . . . .	106
<b>Iyahen, S. O.</b> Semiconvex spaces . . . . .	111
<b>Kassir, Mumtaz K.</b> The torsion of a semi-infinite elastic solid by an elliptical stamp . . . . .	36
<b>Leavitt, W. G.</b> Type radicals . . . . .	22
<b>Lorch, Lee and Szego, Peter.</b> A Bessel function inequality connected with stability of least square smoothing, II . . . . .	119
<b>Lowengrub, M.</b> The solution of certain pairs of dual integral equations . . . . .	92
<b>McCool, James.</b> Elements of finite order in free product sixth-groups . . . . .	128
<b>Munn, W. D.</b> Regular $\omega$ -semigroups . . . . .	46
<b>Petrich, Mario.</b> The translational hull of a completely O-simple semigroup . . . . .	1
<b>Petrich, Mario.</b> Translational hull and semigroups of binary relations. . . . .	12
<b>Pym, John S.</b> Inductive and projective limits of normed spaces . . . . .	103
<b>Rayner, F. J.</b> An algebraically closed field . . . . .	146
<b>Rotkiewicz, A.</b> On the prime factors of the number $2^{p-1} - 1$ . . . . .	83
<b>Sneddon, Ian N.</b> A procedure for deriving inversion formulae for integral transforms of a general kind . . . . .	67
<b>Szego, Peter.</b> <i>See</i> Lorch, Lee and Szego, Peter	
<b>Tweddle, I.</b> Weak compactness in locally convex spaces . . . . .	123
<b>West, T. T.</b> <i>See</i> Gillespie, T. A. and West, T. T.
