

# CAMBRIDGE

## **Philosophical Papers**

*Volume 1: Realism, Rationalism and Scientific Method*

*Volume 2: Problems of Empiricism*

### **Paul K. Feyerabend**

The most important essays by Professor Feyerabend are collected here. Volume 1 presents papers on the interpretation of scientific theories, together with papers applying these views to particular problems in philosophy and physics. Volume 2 examines the legacy of empiricism for the philosophy of science and for methods of scientific research.

Volume 1 \$44.50 Volume 2 \$34.50

## **Puzzles, Problems and Enigmas**

*Occasional Pieces on the Human Aspects of Science*

### **John M. Ziman, F.R.S.**

In this collection of some of his writings, Ziman discusses challenging issues of our times including: What should scientists do about Soviet dissidents? Is war good for physics? Can scientific knowledge be treated as a commercial commodity? \$24.95

## **Empiricism and Geographical Thought**

*From Francis Bacon to Alexander von Humboldt*

### **Margarita Bowen**

Bowen traces the emergence of scientific empiricism from the seminal work of Bacon and Descartes and its impact on geographical thought from 1600 to 1800. Through a fresh examination of the positivist tradition and a reevaluation of Alexander von Humboldt's contribution to scientific reform, it offers new insights into today's search for an alternative theory of science. *Cambridge Geographical Studies 15* \$49.50

## **Realism and the Progress of Science**

### **Peter Smith**

This book examines the philosophical foundations of the realist view of the progress of science as cumulative. It argues that the central tasks for the realist are to rebut the relativist position and to construct a theory of reference for scientific terms. *Cambridge Studies in Philosophy* \$19.95

## **The Liberation of Life**

*From the Cell to the Community*

### **Charles Birch and John B. Cobb, Jr.**

The liberation of the concepts of both human and nonhuman life are discussed in this exciting challenge to conventional approaches to several disciplines. The authors reject the mechanistic model of life and develop an alternative "ecological model." \$34.50

*all prices subject to change*

**Cambridge University Press**

32 East 57th Street, New York, N.Y. 10022

### **Nature's Second Kingdom**

*by François Delaporte, translated by Arthur Goldhammer*

"This is a highly original study of great interest. It explores a subject of a time and period that have been seriously underrepresented in the history of science . . . in its special attention to the way in which particular investigators sought to understand the nature of plants by drawing on contemporary knowledge concerning animals, it illuminates the complex question of the role of analogies in scientific thought."—Richard W. Burkhardt, Jr., *ISIS*  
248 pp. illus. \$20.00

### **The Making of Technological Man:**

**The Social Origins of French Engineering Education**

*by John Hubbel Weiss*

"*The Making of Technological Man* is . . . a significant contribution to the history of European secondary and higher education, the history of science and technology, French economic history, and the social history of the European middle classes. Very few scholars, I believe, combine empirical precision with theoretical awareness so fruitfully as John Weiss does . . . his writing is consistently clear and lively."—Professor Fritz Ringer, Boston University  
384 pp. \$30.00

### **Bringing Aerodynamics to America**

*by Paul A. Hanle*

Theodore von Kármán and the development of theoretical aerodynamics at the California Institute of Technology are the subject of this book which tells of the literal transfer of technology and scientific expertise just before and during World War II.

224 pp. illus. \$20.00

### **Documents in American Industrial History**

#### **The Philosophy of Manufactures:**

**Early Debates over Industrialization in the United States**

*edited by Michael Brewster Folsom and Steven D. Lubar*

512 pp. \$45.00

#### **The New England Mill Village, 1790–1860**

*edited by Gary Kulik, Roger Parks, and Theodore Penn*

400 pp. illus. \$40.00

Copublished with the Merrimack Valley Textile Museum

### **Clipped Wings**

**The American SST Conflict**

*by Mel Horwitch*

A fascinating in-depth history of the bureaucratic intrigues, managerial inadequacies, economic difficulties, technical failures, and grassroots movements that played significant roles in terminating the SST.

432 pp. illus. \$25.00

28 Carleton Street  
Cambridge, MA 02142

Africa: P. O. Box 159, Ilaro, Ogun State, Nigeria**

Dear ABC,

Please tell me, without any obligation on my part, how I can order for myself and for my friends anywhere in the world any book in print, from any publisher, from any country, in almost any language.

Tell me in addition how I can save 20-40% on these books joining the ACADEMIC BOOK CLUB and paying a membership fee as low as 1.8¢ daily (\$6.50 annually).

I understand that one of the features of the club is that I am not now, nor will I ever be, under any obligation whatsoever to buy any particular book or quantity of books from Academic Book Club.

This important recent book takes a fresh look at an old problem—whether and to what extent the hand of an intelligent Creator can be discerned from the phenomena of the universe, as reflected overall in modern scientific fact and theory.

Spawned with the rising prestige of science during the Enlightenment, the controversy surrounding the argument from design has surfaced at various times in impassioned public debate, from arguments in the celebrated Scopes trial to recent attempts to have “scientific creationism” taught in the public schools. In *Chance or Design?* the argument over Evolution is seen as incidental only to the more basic inquiry on Design and Causation. In contrast to the rational skepticism of two leading figures of the Enlightenment, Hume and Kant, Horigan’s thesis is that significant advances in modern observation provide three separate empirical bases for the discovery of intended design in creation, each of which informs and verifies the others, as in the application of scientific method.

With this book the reader may now seriously question whether the “reason/belief” split, long held to be an insurmountable barrier between scientific and religious thought, continues to be legitimate in the post-Modern era.

# PHILOSOPHY OF SCIENCE

*Typescript.* Typescript, double-spaced, should be submitted (in triplicate) to Professor Robert E. Butts, Department of Philosophy, Talbot College, University of Western Ontario, London, Ontario, Canada N6A 3K7. Typescripts will not be returned unless return postage is prepaid by cheque, money order, International Reply Coupons or Canadian stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, *rather than by footnote*, the reference list by citing author and year of publication, e.g., Jones (1958) or (Smith 1974, p. 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript *Typescript should not exceed thirty-five double-spaced pages. Longer essays will be returned to the author(s) to be cut to the acceptable maximum. A summary abstract of approximately 100 words should accompany each article.* All illustrations must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{v}\right)^n}{1 + \frac{x}{v}} \qquad 1/x \prod_{n=1}^{\infty} (1 + 1/v)^n / 1 + x/v$$

*Page charges.* There is a two dollar per page publication charge for individuals who are not members of the Philosophy of Science Association.

*Copyright.* Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

*Reprints.* Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galley, the special order forms which they will find enclosed with their galley.

*Reviews.* Publications intended for review should be sent to Prof. William Demopoulos, at the address given above.

*Philosophy of Science* is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, Michigan State University, East Lansing, Michigan 48824.

*Membership and Subscriptions.* Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are \$30.00 a year and include subscription to the journal. Subscription price for non-members is \$32.50 U.S.A. (\$33.50 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$9.00). Subscriptions at a reduced rate of \$15.50 a year are available to qualified students; inquire of the Executive Secretary.
