The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR
LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgment must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for three years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. The annual subscription is five guineas sterling (U.S.A. \$15) post free, and payable in advance.

8. Single copies will be on sale at 12s. 6d. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

9. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

United States of America

Orders for this *Journal* may be sent through local booksellers, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent, England.

What clinicians say about ORBENIN

Clinicians have frequently testified to the success of Orbenin in the treatment of Gram-positive infections. World Literature now contains over 400 references to Orbenin.

Pneumonia Lung Abscess Tonsillitis Pharyngitis Acute bronchitis

Septicaemia

Boils Carbuncles Infected dermatoses

Osteomyelitis Osteitis

Post-operative wound infections Burns Skin graft protection

Acute endocarditis

Staphylococcal enterocolitis Staphylococcal urinary tract infections
Staphylococcal meningitis

Dosage

Adults: 500mg (2 capsules) four times daily, by mouth. 250mg (1 vial) by intramuscular injection, four times daily.

Children: Under 2 years—quarter adult dose. 2-10 years—half adult dose.

In severe infections the dosage may be increased.

Contra-indications

Orbenin should not be given to patients with a penicillin allergy or administered by subconjunctival injection.

Side-effects

As with other penicillins.

Additional information is available on request.

Orbenin (Regd.) (cloxacillin sodium BP) is a product of British research at **Beecham Research Laboratories** Brentford, England, originators of the new penicillins.

Specifically designed for you and your patients. Precision-engineered, functionally-built equipment for the Ear, Nose and Throat and other Specialists.

S.M.R. keeps you and your patients' comfort and satisfaction in mind. Whatever your needs . . . whether they be for one unit or a completely equipped treatment room, you are assured of the finest . . . a room that reflects professional good taste.

Picture shows what can be done with small treatment room areas. The rooms are complete from the compact treatment unit to the physician's stool. Yet, this equipment fits easily and functionally into a small area. This is just one of many room arrangements available from S.M.R.

STAINLESS STEEL POLISH

SMR Stainless Steel Polish cleans and preserves with superior results —ends fingerprints, watermarks and surface stains.

Announcing . . . an Audiometer of exceptional distinction

THE **AMPLIVOX** MODEL 103 DIAGNOSTIC AUDIOMETER

to ISO Specification R389:1964

A sophisticated design for the comprehensive evaluation of hearing acuity and the differential diagnosis of hearing impairments

- * Easy-to-use controls for all tests from simple clinical to advanced research levels
- * Narrow band masking for pure tone, wide band white noise for speech
- * Unique masking threshold indicator
- * Plug-in Adaptor for SISI and Lüscher Tests
- * Unique Patient's Signal assists subject's concentration
- * Photo-electric switching for noise-free operation
- * Twin channel facilities with multiple switching for dozens of tests
- * Plug-in circuit boards for ease of service
- * Output for free field audiometry

PETERS AP/5 CLINIC AUDIOMETER

WITH SYNCHRONOUS MASKING

This new clinic audiometer of very advanced design offers:

- A continuous frequency range with continuously variable attenuation accurate and readable to less than 1 db.
- Synchronous masking. A new, accurate and speedier masking technique, which is semi-automatic.
- Narrow band masking for pure-tone measurements and white noise for speech.
- Automatic loudness balance switching.
- The SISI Test, the Rainville B.C. Test, automatic pulsing.
- Full speech facilities.
- Interchangeable slide and plug in sub-chassis.
- Operator checks of output and threshold.

Five additional features are offered by the still more advanced
PETERS AP/6 CLINIC AUDIOMETER

Both audiometers can be used with the "PETERS" automatic
BÉKÉSY ACCESSORY

MÉNIÈRE'S DISEASE

Edited by: JACK L. PULEC, M.D.
The Mayo Clinic

This amazing new monograph will be of major interest to Otolaryngologists and Medical Libraries. It contains the proceedings of an outstanding symposium held at the Mayo Clinic on all important aspects of Ménière's Disease.

Topics range through aetiology, diagnosis and treatment. Sample discussions include: Vestibular Neuronitis—Radiographic Observations on the Vestibular Aqueduct—Pathophysiology of Hearing Loss in Ménière's Disease—Differential Diagnosis of Vertigo Resulting from Retrocochlear Lesions—Streptomycin Sulphate in Management of Ménière's Disease—Ultrasonic Treatment—Decompression of the Endolymphatic Sac for Hydrops—The Otic-Perotic Shunt. 715 pages. illustrated. Published: November 1968. £6 7s. 6d.

This is a special reprinting of the October issue of the Otolaryngologic Clinics of North America. These Clinics can be obtained by an annual subscription to three consecutive issues (June, October and February)
Price: £9 6s. 0d. (postage 6s. extra)

C I B A

The leading nasal decongestant

Otrivine®

xylometazoline hydrochloride

Now well established as being clearly superior to ephedrine

Exceptionally prolonged effect

In a clinical trial* the decongestant effects of Otrivine and ephedrine were compared, by measurement of nasal air flow in patients with acute rhinitis. From the diagram it can be seen that the duration of action of Otrivine (1:1000) is some three times greater than that of ephedrine (1:100).

The prolonged action of Otrivine means that at night, when nasal congestion is often most troublesome, a single application on retiring is likely to ensure a good night's sleep.

Comparison of the length of effect of Otrivine and ephedrine. *Svenska Iktdn. (1964) 61, 378 ▶

Remarkable freedom from rebound hyperaemia

During world-wide clinical use only very occasional instances of rebound congestion have been reported with Otrivine. Rebound phenomena have often been demonstrated with ephedrine, however, occurring after as little as 90-120 minutes.

No systemic effects

In contrast to ephedrine, which can sometimes produce deleterious effects on circulation, blood pressure, and cardiac activity, such effects are unlikely to occur following the use of Otrivine in the nose when used in the recommended dosage.

Basic NHS prices

0.1% Nasal spray and drops 1/2 fl. oz. 3s. 4d.
 Paediatric 0.05% 10ml 3s. 0d.
 (with special safety dropper)
