

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/19

Original Articles

- 705 GIOVANNI LUCA TORRISI AND EMILIO LEONARDI. Almost sure central limit theorems in stochastic geometry
- 735 CHRISTEL GEISS, CÉLINE LABART AND ANTTI LUOTO. Mean square rate of convergence for random walk approximation of forward-backward SDES
- 772 LEONARDO A. VIDELA. Out-of-equilibrium random walks
- 798 JIAMING XU AND YUAN ZHONG. Improved queue-size scaling for input-queued switches via graph factorization
- 825 MARTIN FRIESEN, PENG JIN, JONAS KREMER AND BARBARA RÜDIGER. Ergodicity of affine processes on the cone of symmetric positive semidefinite matrices
- 855 JOHAN SEGERS. One- versus multi-component regular variation and extremes of Markov trees
- 879 MANON COSTA, CARL GRAHAM, LAURENCE MARSALLE AND VIET CHI TRAN. Renewal in Hawkes processes with self-excitation and inhibition
- 916 FUQING GAO AND YUJING WANG. Functional central limit theorems and moderate deviations for poisson cluster processes
- 942 AJAY JASRA AND FANGYUAN YU. Central limit theorems for coupled particle filters
