OLD ILLUSTRATION BLOCKS

It is our custom to destroy blocks after three years. It may be that some authors would like to have their blocks for possible future use. In such case would they write Headley Brothers, Ashford, Kent, as soon as possible, and in any case within three years of their first being used.

ADVERTISEMENTS

POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides 3i grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.
