Nutrition Research Reviews

Volume 28, 2015 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at www.cambridge.org/nrr

Editor-in-Chief

J V Woodside, *Belfast, UK*

Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

Editorial Board

M Ashwell, *Baldock, UK*
E Bandera, *New Brunswick, USA*
D A Bender, *London, UK*
N Binns, *Drogheda, Ireland*
J L Black, *Warrimoo, Australia*
D Dardevet, *Theix, France*
C Edwards, *Glasgow, UK*
C Haskell-Ramsey, *Newcastle, UK*
J M Hibbert, *Atlanta, GA, USA*
T Hill, *Newcastle-upon-Tyne, UK*
J K Lodge, *Newcastle-upon-Tyne, UK*
H C Lukaski, *Grand Forks, ND, USA*
S McCann, *Buffalo, NY, USA*
M Pufulete, *Bristol, UK*
P Rogers, *Bristol, UK*
S Rutherford, *Palmerston North, NZ*
N W Solomons, *Guatemala City, Guatemala*
M Versteegen, *Wageningen, Netherlands*
C M Weaver, *West Lafayette, IN, USA*
K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Nutrition Research Reviews is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

Subscription information:

Volume 28 2015 (2 issues)
Internet/print package: £286/\$558 American only/€445 EU only
Internet only: £193/\$358 Americas only/€290 EU only

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Information for Authors: The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Professor Jayne Woodside
Centre for Public Health
Queen's University Belfast
Institute of Clinical Science B
Grosvenor Road
Belfast, BT12 6BJ
UK
Tel: 44(0)2890632585
Fax: 44(0)2890235900
Email: j.woodside@qub.ac.uk

Directions to Contributors: are available from the Editor-in-chief.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Vol. 28 No. 1 June 2015

Understanding meal patterns: definitions, methodology and impact on nutrient intake and diet quality <i>Rebecca M. Leech, Anthony Worsley, Anna Timperio & Sarah A. McNaughton</i>	
Introduction	1
Characterisation of meals	2
Meal definitions	2
Time-of-day	2
Participant-identified	3
Food-based classification	3
Neutral	3
Measurement of meals	4
Associations between meal patterns, nutrient intakes and overall diet quality	4
Characteristics of studies which examined associations between meal patterns and nutrient intakes	5
Meals v. snacks in relation to nutrient intakes	5
Eating frequency and nutrient intakes	12
Meal skipping and nutrient intakes	12
Meal timing and nutrient intakes	12
Studies examining meal patterns and overall diet quality	13
Eating frequency and diet quality	13
Meal skipping/regularity and diet quality	13
Meal timing and diet quality	13
Potential impact of different meal definitions on the characterisation of meal patterns and associations with nutrient intakes and diet quality	13
Discussion	17
Recommendations to advance the field	18
Conclusion	18
Acknowledgements	18
References	18
Nutritional regulation of the anabolic fate of amino acids within the liver in mammals: concepts arising from <i>in vivo</i> studies <i>T. J. Wester, G. Kraft, D. Dardevet, S. Polakof, I. Ortigues-Marty, D. Rémond & I. Savary-Auzeloux</i>	
Introduction	22
Net hepatic uptake of amino acids by the liver	23
Technical issues	23
How net amino acid hepatic uptake responds to supply and requirement: quantitative and qualitative data	23
Quantity of amino acids taken up by the liver relative to the quantity released by the portal drained viscera	23
When net amino acid hepatic uptake responds to net amino acid portal-drained viscera release	23
When the liver does not respond to supply	26
Hepatic protein synthesis	26
Impact of food intake	27
Effects of insulin and amino acids	27
Gluconeogenesis	28
Technical issues	28
Hepatic gluconeogenesis as a means for interorgan nutrient exchange	29
Sources of circulating glucose	30
Ruminants	30
Mammalian carnivores	30
Omnivorous mammals	32
Underlying mechanisms regulating amino acid uptake by the liver	32
When the liver responds to the supply	32
Direct impact of regulatory factors on the liver	32
Indirect regulatory mechanisms	33
What potential regulatory mechanisms could be involved when the liver does not respond to supply?	34

Contents

When the liver exerts priority relative to other body tissues	34
When requirements of the peripheral tissues are elevated	34
Regulation of gluconeogenesis	35
Conclusion	35
Acknowledgements	35
References	35
Towards microbial fermentation metabolites as markers for health benefits of prebiotics	
<i>Kristin A. Verbeke, Alan R. Boobis, Alessandro Chiodini, Christine A. Edwards, Anne Franck, Michiel Kleerebezem, Arjen Nauta, Jeroen Raes, Eric A. F. van Tol & Kieran M. Tuohy on behalf of the ILSI Europe Prebiotics Task Force Expert Group 'Microbial metabolism and fermentation'</i>	
Introduction	42
Metabolites produced by microbial fermentation	43
Beneficial and harmful effects of relevant metabolites	43
Products of carbohydrate fermentation	43
SCFA	43
Lactate and succinate	47
Products of protein metabolism	48
Phenol, <i>p</i> -cresol and indole	48
Ammonia	50
Hydrogen sulfide	50
Branched-chain fatty acids	51
Plant polyphenolic compounds/catabolites	52
Emerging metabolites	52
Factors that influence fermentation	52
Gaps and limitations	54
Where to measure: choice of the biomatrix	54
When to measure: snapshot analysis	55
More holistic approach	55
Functional analysis of faecal water	55
Metabolomics	56
Link to metagenome analysis	57
Conclusions	58
Acknowledgements	58
References	59
The impact of phosphorus on the immune system and the intestinal microbiota with special focus on the pig	
<i>Charlotte M.E. Heyer, Eva Weiss, Sonja Schmucker, Markus Rodehutschord, Ludwig E. Hoelzle, Rainer Mosenthin & Volker Stefanski</i>	
Introduction	67
The porcine immune system: a brief overview	68
The intestinal microbiota: composition and interaction with the immune system of the host	69
Dietary modulators affecting phosphorus digestibility and nutrient–phytate interactions	69
Phytate hydrolysis	69
Phytase activities	70
Carbohydrate–phytate interactions	70
Effects of phosphorus on the immune system	70
Lymphocyte proliferation	70
Activity of phagocytes	71
Lymphocyte distribution	72
Antibody response	72
Expression of intestinal cytokines	73
Conclusion and remarks on future research on phosphorus and immune function	73

Contents

Effects of phosphorus on the intestinal microbiota	73
Importance of phosphorus for bacterial metabolism with special emphasis on pathogens	76
Interactions between dietary phosphorus, intestinal microbiota and host health	77
Conclusions	77
Acknowledgements	78
References	78
