# THE ROYAL INSTITUTE OF NAVIGATION

## *Aims and Objects*

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

## *Membership*

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 74, 2021, which includes print and electronic access, is £737 (USA, Canada and Mexico US \$1329) and includes delivery by air; single parts are available at £134 (USA, Canada and Mexico US \$240) plus postage. The electronic-only price available to institutional subscribers is £570 (USA, Canada and Mexico US \$1041). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

# THE JOURNAL OF NAVIGATION

VOLUME 74 • NUMBER 5 • SEPTEMBER 2021

## CONTENTS

<b>Radio navigation systems: definitions and classifications</b> <i>Cezary Specht</i>	945
<b>Path planning method for unmanned underwater vehicles eliminating effect of currents based on artificial potential field</b> <i>Danjie Zhu and Simon X. Yang</i>	955
<b>Process design and network shape evaluation of multi-target collaborative navigation</b> <i>Rui Liu, Klaus Greve, Nan Jiang and Pengyu Cui</i>	968
<b>AIS-based near-collision database generation and analysis of real collision avoidance manoeuvres</b> <i>Arnstein Vestre, Azzeddine Bakdi, Erik Vanem and Øystein Engelhardtson</i>	985
<b>A new underwater positioning model based on average sound speed</b> <i>Yixu Liu, Xiushan Lu, Shuqiang Xue and Shengli Wang</i>	1009
<b>Stereo visual odometry with velocity constraint for ground vehicle applications</b> <i>Fei Liu, Yashar Balazadegan Sarvrood, Yue Liu and Yang Gao</i>	1026
<b>Ship-to-ship dialogues and agreements for collision risk reduction</b> <i>Reyes Poo Argüelles, Jesús A. García Maza, Felipe Mateos Martín and Marlene Bartolomé</i>	1039
<b>A bionic point-source polarisation sensor applied to underwater orientation</b> <i>Teng Zhang, Jian Yang, Lei Guo, Pengwei Hu, Xin Liu, Panpan Huang and Chenliang Wang</i>	1057
<b>Augmented reality for maritime navigation data visualisation: a systematic review, issues and perspectives</b> <i>Francesco Laera, Michele Fiorentino, Alessandro Evangelista, Antonio Boccaccio, Vito M. Manghisi, Joseph Gabbard, Michele Gattullo, Antonio E. Uva and Mario M. Foglia</i>	1073
<b>Compressed pseudo-SLAM: pseudorange-integrated compressed simultaneous localisation and mapping for unmanned aerial vehicle navigation</b> <i>Jonghyuk Kim, Jose Guivant, Martin L. Sollie, Torleiv H. Bryne and Tor Arne Johansen</i>	1091
<b>Macroscopic collision risk model based on near miss</b> <i>Yangyu Zhou, Jiaxuan Yang, Xingpei Bian, Lingqi Ma and Zhen Kang</i>	1104
<b>Experimental study on the effects of a single simulator-based bridge resource management unit on attitudes, behaviour and performance</b> <i>Stefan Röttger and Hannes Krey</i>	1127
<b>Comparative evaluation of Kalman filters and motion models in vehicular state estimation and path prediction</b> <i>Lu Tao, Yousuke Watanabe, Shunya Yamada and Hiroaki Takada</i>	1142
<b>A prediction model of vessel trajectory based on generative adversarial network</b> <i>Senjie Wang and Zhengwei He</i>	1161
<b>Seafarers' awareness-based domain modelling in restricted areas</b> <i>Hee-jin Lee, Yoshitaka Furukawa and Deuk-jin Park</i>	1172
<b>The effect of circadian rhythms on shipping accidents</b> <i>Juan Vinagre-Ríos, José-Manuel Pérez-Canosa and Santiago Iglesias-Baniela</i>	1189
