## The RAeS Library's photographic collections

The Royal Aeronautical Society's Library holds a very extensive photographic/glass lantern slide/lithographic collection of aviation images (over 100,000), from the early days of ballooning through to the modern technology aircraft, missiles and rockets of today, including a number of portrait photographs of aviation personalities. Prints from the collection can be supplied to members and non-members on a fee basis for reproduction in books, journals, CD-ROMs, Internet sites, lecture slides or for use as presentation prints.

**All enquiries regarding the Library should be addressed to:**

## Undergraduate research projects

A research project is often an important part of many university undergraduate courses.

The Royal Aeronautical Society has recently been approached regarding publication of papers from such projects in *The Aeronautical Journal*.

Our policy is that we welcome papers from any and every source, including papers resulting from undergraduate projects.

In this case we would normally expect the papers to be submitted jointly with the supervisor and they would be exposed to exactly the same refereeing process as all the other papers received.
