DR. M. A. A. ANSARI (*Pakistan*)

DR. M. F. CHANDRARATNE (*Ceylon*)

DR. K. B. LAL (*F.A.O.*)

DR. J. MELVILLE (*Australia*)

DR. A. H. MOSEMAN (*United States*)

PROFESSOR M. A. NOUR (*Sudan*)

DR. B. P. PAL (*India*)

DR. S. J. DU PLESSIS (*South Africa*)

**Experimental Agriculture** publishes the results of experimental work in animal and crop husbandry, with an emphasis on research carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

**Each annual volume** comprises four parts (published in January, April, July and October) plus an index.

**Subscriptions** may be sent to any bookseller or subscription agent or direct to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £5. net (including postage) for an annual volume (\$18.00 in the U.S.A.), payable in advance; separate parts cost 35s. net or \$5.00 each (plus postage).

**Back Volumes.** Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, 16 West Street, Farnham, Surrey. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of the Cambridge University Press.

## NOTES FOR CONTRIBUTORS

**Contributions** will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, Orchard House, Long Ashton, Bristol.

**Conditions of acceptance.** Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

**General lay-out.** Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 1000 words (2 pages) or longer than about 6000 words (12 pages including illustrations).

**Typescripts.** A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

**Title.** The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, makes it essential that the title of each paper should contain the maximum of relevant informa-

# JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry.

EDITOR: A. G. G. HILL

## Contents of Volume 23, No. 1, March 1968

- THE DISTRIBUTION OF LEAF AREA AND LIGHT INTENSITY WITHIN WHEAT CROPS DIFFERING IN ROW DIRECTION, ROW SPACING AND RATE OF SOWING; A CONTRIBUTION TO THE STUDY OF UNDER-SOWING PASTURE WITH CEREALS. *K. Santhirasegaram and J. N. Black.*
- SYSTEMATIC TESTING OF QUALITY IN GRASS VARIETIES. 2. THE EFFECT OF CUTTING DATES, SEASON AND ENVIRONMENT. *J. W. Dent and D. T. A. Aldrich*
- SOME SELECTIVE EFFECTS OPERATING ON WHITE- AND RED-CLOVER IN SWARDS. *A. H. Charles.*
- HEATHER REGENERATION FOLLOWING BURNING: A SURVEY. *Sheila A. Grant.*
- LIME AND PHOSPHATE TREATMENTS FOR RECLAMATION OF HEATHER MOORLAND. *R. J. Bennett, R. D. Russell and J. E. Watkin.*
- THE GRASSLANDS OF THE AZORES. *Luiz Vas do Rego and William Davies.*
- GRASSLAND RESEARCH ON BLANKET PEAT IN IRELAND. *M. A. O'Toole*
- GROWTH AND SEASONAL COMPOSITION OF NATURAL GRASSLAND IN ZAMBIA. *H. J. van Rensburg.*
- AMMONIA AS A SOURCE OF NITROGEN FOR GRASS SWARDS. *D. W. Cowling.*
- THE EFFECTS OF HEAVY DRESSINGS OF POTASH APPLIED TO THE SEEDBED OF A LEY COMPARED WITH ANNUAL DRESSINGS. *P. A. Gething, P. D. Jones and A. I. Ross.*
- NITROGENOUS FERTILIZATION OF ITALIAN RYEGRASS IN SPRING. *R. G. Heddle.*
- THE INFLUENCE OF THE QUANTITY OF HERBAGE OFFERED AND ITS DIGESTIBILITY ON THE AMOUNT EATEN BY GRAZING CATTLE. *J. Hodgson and J. M. Wilkinson.*
- THE EFFECTS OF LEVEL OF NITROGEN FERTILIZER ON BEEF PRODUCTION FROM GRAZED PERENNIAL-RYEGRASS/WHITE-CLOVER PASTURES. PART 3. AN EXPERIMENT WITHOUT IRRIGATION. *F. E. Alder, S. J. Cowlshaw, J. E. Newton and D. T. Chambers.*
- HEAD EMERGENCE IN FORAGE GRASSES IN RELATION TO FEBRUARY-MAY TEMPERATURES AND THE PREDICTING OF EARLY OR LATE SPRINGS. *A. R. Beddows.*
- PEDOMETER MEASUREMENTS OF THE DISTANCE WALKED BY GRAZING SHEEP IN RELATION TO WEATHER. *T. L. Powell.*

Published quarterly. Annual subscription £4, post free. Back numbers are still available, at the following prices; Volume 1, £1; volumes 2-17, £2 each; volumes 18-22, £3.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.

# AGRONOMY JOURNAL

This bimonthly publication, the official organ of the American Society of Agronomy, is respected throughout the world for its technical reports on basic and applied research in crop and soil science. Articles in past issues contributed information on the importance of soil aeration, moisture content, and root-zone temperature to the growth, development, and survival of forage crops; improved methods for determining seeding rates; techniques for estimating sugar quantities in plant extracts; a computer program for estimating parameters; and the effects of fertilizers and irrigation on crop yield, composition, and quality. *Publication is open to Society members.*

\$14.00 per year in U.S. and Canada  
\$15.00 per year elsewhere

# ANIMAL PRODUCTION

## Journal of the British Society of Animal Production

### Contents of Volume 10, Part 2, May 1968 include the following:

HINKS, NIELSEN and NIEMANN-SØRENSEN. The use of station and field tests for the improvement of milking performance in dairy cattle. II. Milking rate and time as indicators of a cow's milking ability. III. Breed difference in the yield of milk and butterfat from the fore and rear quarters of the udder.

BRAEND and KHANNA. Haemoglobin and Transferrin types of some West African cattle.

BOWMAN, MARSHALL and BROADBENT. Genetic parameters of carcass quality in Down Cross sheep.

HOLMES. Heat losses from young pigs at three environmental temperatures, measured in a direct calorimeter.

ELSLEY, MACPHERSON and LODGE. The effects of level of feeding of sows during pregnancy. III. Body composition.

SWAN and LAMMING. Studies on the Nutrition of ruminants. 3. The substitution of soya bean meal by urea in diets containing roughage and cereal.

HALLIDAY. Serum  $\gamma$ -globulin levels in dead lambs from hill flocks.

TAYLOR. Time taken to mature in relation to mature weight for sexes, strains and species of domesticated mammals and birds.

KAY, ANDREWS, MACLEOD and WALKER. Urea and cereals as supplements for ruminants offered barley straw.

IBRAHIM, EL-SHAZLY, KARAM and HAMADA. A note on the effect of diethylstilboestrol on the performance of lambs.

GRUNDER, ROLLINS, STORMONT and CASADY. A note on differential mortality rates in young rabbits of esterase phenotypes A, AB, and B.

PROCEEDINGS OF THE 47TH MEETING OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION, HARROGATE, 26-27 MARCH 1968.

The Journal is published quarterly in February, May, August, and November. The annual subscription rate is 90s, and in the U.S.A. \$14.00, single copy 25s. and in the U.S.A. \$4.00. Orders and subscriptions may be sent to any Bookseller or direct to:—

# The Annals of Applied Biology

Volume 61, Number 3. June 1968

- A. F. POSNETTE, R. CROPLEY AND A. A. SWAIT The incidence of virus diseases in English sweet-cherry orchards and their effect on yield
- R. CROPLEY Comparison of some apple latent viruses
- R. HULL Virus diseases of garden lupin in Great Britain
- G. E. RUSSELL The influence of foliar applications of sugars on the susceptibility of sugar beet to downy mildew
- P. R. MERRIMAN AND B. E. J. WHEELER Overwintering of *Sphaerotheca mors-uae* on black currant and gooseberry
- V. W. L. JORDAN The life-history and epidemiology of American gooseberry mildew on black currants
- J. E. KING AND J. R. COLEY-SMITH Effects of volatile products of *Allium* species and their extracts on germination of sclerotia of *Sclerotium cepivorum* Berk
- A. E. F. CHANDLER Some host-plant factors affecting oviposition by aphidophagous Syrphidae (Diptera)
- A. E. F. CHANDLER The relationship between aphid infestations and oviposition by aphidophagous Syrphidae (Diptera)
- A. E. F. CHANDLER Some factors influencing the occurrence and site of oviposition by aphidophagous Syrphidae (Diptera)
- K. G. GOSTICK AND PATRICIA M. BAKER Dieldrin-resistant cabbage root fly in England
- D. J. GALLEY A biological assay technique for the assessment and comparison of systemic insecticide residues
- J. H. STEVENSON Laboratory studies on the acute contact and oral toxicities of insecticides to honeybees
- A. KAARS SIJPESTEIJN, C. W. PLUIJGERS, A. VERLOOP AND A. TEMPEL Phenylazothioformamide, the active principle in the fungitoxic action of 1-phenylthiosemicarbazide
- R. J. NASH, T. A. SMITH AND R. L. WAIN Studies on plant growth-regulating substances. XXVII. The growth-regulating activity and metabolism of 2,4-dichlorophenoxyethylamine and related compounds in higher plants
- K. G. H. SETTY AND A. W. WHEELER Growth substances in roots of tomato *Lycopersicon esculentum* (Mill.) infected with root-knot nematodes (*Meloidogyne* spp.)
- GLYN L. JAMES The interrelationships of the causal fungus of brown root rot of tomatoes and potato root eelworm, *Heterodera rostochiensis* Woll.
- D. N. GREET, C. D. GREEN AND M. E. POULTON Extraction, standardization and assessment of the volatility of the sex attractants of *Heterodera rostochiensis* Woll. and *H. schachtii* Schm.

# The Journal of Agricultural Science

Volume 70, Part 3. June 1968

- R. K. CUNNINGHAM Cation-anion relationships in crop nutrition. VI. The effects of part, age and species of plant and some soil characteristics.
- J. B. OWEN and E. NIELSEN A study of factors affecting the efficiency of feed conversion in Red Danish heifers.
- S. DUBETZ and S. A. WELLS Reaction of barley varieties to nitrogen fertilizer.
- J. E. JACKSON and H. O. BURHAN Rotation responses of cotton in the Sudan Gezira. II. The effect of fertilizer nitrogen on the response to rotation.
- P. H. LE MARE Experiments on the effects of phosphate applied to a Buganda soil. I. Pot experiments on the response curve.
- P. H. LE MARE Experiments on the effects of phosphate applied to a Buganda soil. II. Field experiments on the response curve to a triple superphosphate.
- P. H. LE MARE Experiments on the effects of phosphate applied to a Buganda soil. III. A chemical study of the soil phosphate, the fate of fertilizer phosphate and the relationship with iron and aluminium.
- T. L. J. LAWRENCE High level cereal diets for the growing/finishing pig. III. A comparison with a control diet of diets containing high levels of maize, flaked maize, sorghum, wheat and barley.
- A. EDEN A survey of the analytical composition of field beans (*Vicia faba* L.).
- J. BOLTON and A. PENNY The effects of potassium and magnesium fertilizers on yield and composition of successive crops of ryegrass, clover, sugar beet, potatoes, kale and barley on sandy soil at Woburn.
- L. F. HANBURY and G. L. MAUGHAN Machine thinning of sugar beet: field trials with low seed rates.
- J. K. R. GASSER Mineralizable-N in the soil under various leys and its effect on the yields of following wheat.
- J. N. PEART Some effects of live weight and body condition on the milk production of Blackface ewes.
- W. D. THOMAS and ALEC LAZENBY Growth cabinet studies into cold-tolerance of *Festuca arundinacea* populations. I. Effects of low temperature and defoliation.
- W. D. THOMAS and ALEC LAZENBY Growth cabinet studies into cold-tolerance of *Festuca arundinacea* populations. II. Responses to pretreatment conditioning and to number and duration of low temperature periods.
- W. D. THOMAS and ALEC LAZENBY Growth cabinet studies into cold-tolerance of *Festuca arundinacea* populations. III. Cold tolerance of roots and shoots.
- T. F. GATELY The effects of different levels of N, P and K on the yields, nitrogen content and kernel weights of malting barley (var. Proctor).
- R. W. LANG and J. C. HOLMES Interaction of nutrient supply and plant density in relation to maximal yield of the swede crop.
- K. F. THOMPSON and J. P. TAYLOR Chemical composition and cold hardiness of the pith in marrow-stem kale.
- M. E. CASTLE and D. REID The effects of single compared with split applications of fertilizer nitrogen on the yield and seasonal production of a pure grass sward.
- K. J. CARPENTER and C. L. JOHNSON The metabolizable energy of field beans (*Vicia faba*) for poultry.
- G. M. MILBOURN and R. C. HARDWICK The growth of vining peas. I. The effect of time of sowing.
- D. A. BOND and GILLIAN TONYBEE-CLARKE Protein content of spring and winter varieties of field beans (*Vicia faba* L.) sown and harvested on the same dates.
- I. T. JONES and J. D. HAYES The effect of seed rate and growing season on four oat cultivars. II. Culm morphology and panicle conformation.
