ERRATA

Readers of this Journal should note the following list of errata for "Goodman, 'Grue' and Hempel," an article by C. A. Hooker which appeared in Volume 35, No. 3 (September 1968). The errors arose out of typographical changes over which the author had no opportunity (due to the Canadian mail strike at the time) to exercise the usual control. The first erratum is for an especially serious error which makes appear garbled the import of remarks on p. 237 in Section III of the essay.

(i) p. 235 line 7 should read

$$(D) \quad Grx \equiv Ex \cdot Gx \vee \neg Ex \cdot \neg Gx.$$

- (ii) The reference in footnote 5, p. 236, should be to footnote 4 and not to itself.
- (iii) The sentence in parentheses beginning on line 29 of p. 241 should read "To adjoin . . ." and not "To obtain . . .".
- (iv) The reference in footnote 15, p. 242, should be to footnote 3.
- (v) The symbol appearing in the last line of Section V, p. 245 should be E_1 and not E_2 .
