# WEED SCIENCE

*Published six times a year by the Weed Science Society of America*

William K. Vencill, *Editor*

The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for *Weed Science* include the biology and ecology of weeds in agricultural, forestry, aquatic, turf, recreational, rights-of-ways, and other settings; genetics of weeds and herbicide resistance; chemistry, biochemistry, physiology and molecular action of herbicides and plant growth regulators used to manage undesirable vegetation, and herbicide resistance; ecology of cropping and non-cropping systems as it relates to weed management; biological and ecological aspects of weed control tools including biological agents, herbicide resistant crops, etc.; effects of weed management on soil, air, and water. Symposia papers and reviews are accepted. Consult the editor for additional information.

## Associate Editors (Assignment Year)

**Muthukumar V Bagavathiannan**, Texas A&M, College Station, TX 77843 (2015)  
**Nicholas Basinger**, Department of Crop & Soil Sciences, University of Georgia, Athens, GA 30602 (2022)  
**Nathan Boyd**, University of Florida, Wimauma, FL 33598 (2021)  
**Caio Brunharo**, Department of Plant Science, Penn State University, University Park, PA 16801 (2022)  
**Ian Burke**, Washington State University, Pullman, WA 99164 (2019)  
**Carlene Chase**, Horticultural Sciences Department, University of Florida, Gainesville, FL 32611 (2016)  
**Bhagirath Singh Chauhan**, Queensland Alliance for Agriculture and Food Innovation (QAAFI), The University of Queensland, Queensland, Australia (2014)  
**Sharon Clay**, South Dakota State University Plant Science Department, Brookings, SD 57007 (2002)  
**Timothy Grey**, Department of Crop and Soil Science, University of Georgia, Tifton, GA 31793 (2009)  
**Erin Haramoto**, University of Kentucky, Lexington, KY 40506 (2020)  
**Prashant Jha**, Iowa State University, Ames, IA 50011 (2017)  
**Mithila Jugulam**, Kansas State University, Manhattan, KS 66506 (2019)  
**Vipin Kumar**, Kansas State University, Hays, KS 67601 (2020)  
**Ramon Leon**, Department of Crop and Soil Sciences, North Carolina State University, Raleigh, NC 27695 (2016)  
**Sara Martin**, Ag Canada, Ottawa, Canada (2018)  
**Chris Preston**, Australian Weed Management, University of Adelaide, PMB1, Glen Osmond, SA 5064, Australia (2003)  
**Dean Riechers**, Department of Crop Sciences, University of Illinois, Urbana, IL 61801 (2011)  
**Hilary Sandler**, University of Massachusetts–Amherst Cranberry Station, East Wareham, MA 02538 (2008)  
**Debalin Sarangi**, University of Wyoming, Powell, WY 82435 (2020)  
**Patrick J. Tranel**, Department of Crop Sciences, University of Illinois, 360 ERML, Urbana, IL 61801 (2002)  
**Te-Ming Paul Tseng**, Mississippi State University, Mississippi State, MS 39762 (2019)  
**Martin M. Williams II**, USDA-ARS Global Change and Photosynthesis Research, Urbana, IL 61801 (2008)  
Tracy Candelaria, *Managing Editor*

## Officers of the Weed Science Society of America

<http://wssa.net/society/bod/>

*Weed Science* (ISSN 0043-1745) is an official publication of the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234 (720-977-7940). It contains refereed papers describing the results of research that elucidates the nature of phenomena relating to all aspects of weeds and their control. It is published bimonthly, one volume per year, six issues per year beginning in January.

Membership includes online access to *Weed Science*, *Weed Technology*, *Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Weed Science* subscription page at <https://www.cambridge.org/core/journals/weed-science/subscribe>; Email: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) in USA, [journals@cambridge.org](mailto:journals@cambridge.org) outside USA.

*Weed Science* publishes six times a year in January, March, May, July, September, and November. Annual institutional electronic subscription rates: US \$441.00; UK £307.00.

Please use Editorial Manager to access manuscript submissions (<http://www.editorialmanager.com/ws>). Authors are asked to pay \$65 per page as a portion of the cost of publication, plus an additional processing charge of \$55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Weed Science* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique, propagative materials they might possess with other workers in the area who request such materials for the purpose of scientific research.

### On the Cover:

Palmer amaranth (*Amaranthus palmeri*) continues apace as one of the most serious weeds in the world when it comes to herbicide resistance. In this issue, there are three articles on novel cases or mechanisms of glufosinate (Carvalho-Moore et al.), *s*-metolachlor (Kouame et al.), and 2,4-D (Shyam et al.) resistance in *Amaranthus palmeri*. Photo: *Amaranthus palmeri* in a peanut field in Burke, Co. Georgia. Photo taken by William Vencill.

# WEED SCIENCE

Journal of the Weed Science Society of America

Volume 70 Number 4 July 2022

## MY VIEW

Weed science and the clock of the long now.

*Clarence J. Swanton* ..... 369

## RESEARCH ARTICLES

Unraveling the mechanism of resistance in a glufosinate-resistant Palmer amaranth (*Amaranthus palmeri*) accession. *Pamela Carvalho-Moore, Jason K. Norsworthy, Fidel González-Torralva, Jeong-In Hwang, Jinesh D. Patel, L. Tom Barber, Thomas R. Butts and J. Scott McElroy* ..... 370

Resistance of Palmer amaranth (*Amaranthus palmeri*) to S-metolachlor in the midsouthern United States. *Koffi Badou Jeremie Kouame, Matthew B. Bertucci, Mary C. Savin, Taghi Bararpour, Lawrence E. Steckel, Thomas R. Butts, Cammy D. Willett, Felipe G. Machado and Nilda Roma-Burgos* ..... 380

Resistance to 2,4-D in Palmer amaranth (*Amaranthus palmeri*) from Kansas is mediated by enhanced metabolism. *Chandrima Shyam, Dallas E. Peterson and Mithila Jugulam* ..... 390

The amino acid substitution Phe-255-Ile in the *psbA* gene confers resistance to hexazinone in hair fescue (*Festuca filiformis*) plants from lowbush blueberry fields. *Martin Laforest, Brahim Soufiane, Katherine Bisailon, Marianne Bessette, Eric R. Page and Scott N. White* ..... 401

Interaction between tolypyralate and atrazine for the control of annual weed species in corn. *John C. Fluttert, Nader Soltani, Mariano Galla, David C. Hooker, Darren E. Robinson and Peter H. Sikkema* ..... 408

Interaction between 4-hydroxyphenylpyruvate dioxygenase-inhibiting and reactive oxygen species-generating herbicides for the control of annual weed species in corn. *John C. Fluttert, Nader Soltani, Mariano Galla, David C. Hooker, Darren E. Robinson and Peter H. Sikkema* ..... 423

The importance of species selection in cover crop mixture design. *Andrew McKenzie-Gopsill, Aaron Mills, Ashley Nicolle MacDonald and Sylvia Wyand* ..... 436

Plant life span and persistence of soil seedbanks predict the emergence of herbicide resistance in noxious weeds. *Cynthia R. Hartway, Jacqueline P. Ott and Nancy E. Grulke* ..... 448

Impacts of drought intensity and weed competition on drought-tolerant corn performance. *Allyson M. Smith and Erin E. Burns* ..... 455

Development of a temperature-based seed germination model for silverleaf nightshade (*Solanum elaeagnifolium*). *Omer Kapiluto, Hanan Eizenberg and Ran Nisim Lati* ..... 463

Distinctive germination attributes of feather fingergrass (*Chloris virgata*) biotypes in response to different thermal conditions. *Het Samir Desai and Bhagirath Singh Chauhan* ..... 473

Interference of junglerice (*Echinochloa colona*) in mung bean. *Gulshan Mahajan and Bhagirath Singh Chauhan* ..... 481

Interference of morningglories (*Ipomoea spp.*) with 'Fascination' triploid watermelon. *Jeanine Arana, Stephen L. Meyers, Wenjing Guan and William G. Johnson* ..... 488

Using weed emergence and phenology models to determine critical control windows for winter-grown carinata (*Brassica carinata*). *Theresa A. Reinhardt Piskackova and Ramon G. Leon* ..... 495

Evaluation of imazapic and flumioxazin carryover risk for Carinata (*Brassica carinata*) establishment. *Manuel E. Camacho, Travis W. Gannon, Khalied A. Ahmed, Michael J. Mulvaney, Joshua L. Heitman, Aziz Amoozegar and Ramon G. Leon* ..... 503
