is fitted with
TYRES, WHEELS, BRAKES
and BRAKE OPERATING EQUIPMENT

by **DUNLOP**

WHEN AIRBORNE

The Bristol Type 173 Twin Rotor Helicopter relies on Layrub as the main driving elements between engines and rotors.

Rubber trunnion blocks are used giving a cushioned drive: there are no metal-to-metal contacts: no lubrication, therefore little maintenance.

A Post card will see full technical data on its way to you.

Laycock

Layrub serves shock-free without-lubrication

LAYCOCK ENGINEERING LTD., VICTORIA WORKS, MILLHOUSES, SHEFFIELD, 8

Lord Mancroft “ The Ministry of Supply have recently ordered a second Rotodyne prototype in order to accelerate this development, and we have high hopes that it will be able to compete successfully with any other helicopter in the world ”

Hansard 20 Oct 1954

Starters

This unit is one of the wide range of equipment, such as starters, generators, actuators, switchgear and booster coils and magnetos designed and manufactured by ROTAX for use in helicopters. Rotax service also includes full advisory facilities and a team of experienced engineers ready to go anywhere—at any time.

The heart of a good helicopter

A helicopter engine that works without driving shafts and driving gear—that's the Napier Oryx. It's a 750 gas h p turbo gas generator designed for helicopters propelled by jet reaction at the rotor blade tips. It weighs less, it's less complex and it's easier to maintain than conventional helicopter power systems. The Oryx is a step forward—and upward—in helicopter propulsion and an engine of great importance to helicopter operators.

LIGHT SERIES. These joints are designed specially for the aircraft industry and are of light alloy (Spec. L 40) anodised. Trunnion pins in hardened and ground steel, cadmium plated. They withstand some tension and compression loads and are available in a wide range of sizes.

Hooke's universal joints
for high speed dependability

Well suited to high speed drives these joints can be used where tension and compression loads occur and often eliminate the need for telescoping sleeves. They are made from 45-50 tons alloy steel to Air Board specification with hardened steel trunnion blocks.
