## How the Laws of Physics Lie

NANCY CARTWRIGHT, *Stanford University*. In these eleven philosophical essays about natural science, the author argues that the fundamental explanatory laws, the deepest and most admired successes of modern physics, do not in fact describe regularities that exist in nature.

1983 220 pp.; 13 illus.  
cloth \$22.50 paper \$9.95

## Space, Time, and Causality

An Essay in Natural Philosophy

J. R. LUCAS, *University of Oxford*. Assumptions are often made implicitly by working physicists, such as that the world is regular and causally connected, that a thing cannot be in two places at once, and that space and time are continuous, homogeneous, and isotropic. This book introduces the concepts of space, time, and causality to physicists so that their presuppositions may be explicitly articulated, examined, and justified.

January 1984 180 pp.  
cloth \$32.50 paper \$9.95

## The Concept of Evidence

Edited by PETER ACHINSTEIN, *Johns Hopkins University*. The concept of evidence employed in the empirical sciences has been widely discussed by philosophers. This anthology contains selections offering analyses of the "classificatory" concept of evidence rather than the quantitative "degree of confirmation." (*Oxford Readings in Philosophy*)  
December 1983 192 pp.; 3 figs.  
paper \$7.95

## The Nature of Explanation

PETER ACHINSTEIN, *Johns Hopkins University*. One of the aims of science is to produce explanations of phenomena. This book offers a new approach to defining the concept of scientific explanation. Unlike standard theories, it focuses on the act of explanation itself, asserting that a correct account of explanation an *act* must be the basis for a sound account of the *product* of that account, i.e., the explanation.  
1983 320 pp.; figs. \$24.50

## Aristotle's Physics Books I and II

Edited by W. CHARLTON, *University of Newcastle upon Tyne*. In the first two books of the *Physics* Aristotle discusses philosophical issues involved in the investigation of the physical universe. He introduces his distinction between form and matter and his fourfold classification of causes or explanatory factors and defends teleological explanation.

(*Clarendon Aristotle Series*)  
1983 170 pp. paper \$12.95

## Aristotle's Physics Books III and IV

Edited by EDWARD HUSSEY, *University of Oxford*. Books III and IV of the *Physics*, consisting of five essays on the subjects of change, the infinite, place, void, and time, provide not only one of the earliest surviving examples of the application of Aristotelian dialectic but also a classic expression of a durable philosophical treatment of these concepts.

(*Clarendon Aristotle Series*)  
1983 272 pp. cloth \$27.50  
paper \$12.95

# PHILOSOPHY OF SCIENCE

*Typescript.* Typescript, double-spaced, should be submitted (in triplicate) to Professor Robert E. Butts, Department of Philosophy, Talbot College, University of Western Ontario, London, Ontario, Canada N6A 3K7. Typescripts will not be returned unless return postage is prepaid by cheque, money order, International Reply Coupons or Canadian stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, rather than by footnote, the reference list by citing author and year of publication, e.g., Jones (1958) or (Smith 1974, p. 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript. *Typescript should not exceed thirty-five double-spaced pages. Longer essays will be returned to the author(s) to be cut to the acceptable maximum. A summary abstract of approximately 100 words should accompany each article.* All illustrations must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{a_n}\right)}{\left(1 - \frac{1}{b_n}\right)} \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

*Page charges.* There is a two dollar per page publication charge for individuals who are not members of the Philosophy of Science Association.

*Copyright.* Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

*Reprints.* Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galleys, the special order forms which they will find enclosed with their galleys.

*Reviews.* Publications intended for review should be sent to Prof. William Demopoulos, at the address given above.

*Philosophy of Science* is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, Michigan State University, East Lansing, Michigan 48824.

*Membership and Subscriptions.* Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are \$30.00 a year and include subscription to the journal. Subscription price for non-members is \$32.50 U.S.A. (\$33.50 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$9.00). Subscriptions at a reduced rate of \$15.50 a year are available to qualified students; inquire of the Executive Secretary.
