EJRR

EUROPEAN
JOURNAL OF
RISK
REGULATION 

A JOURNAL AT THE INTERSECTION OF LAW, SCIENCE AND POLICY

Today the most important and widespread form of EU regulation in the internal market is concerned with the government of risk to individuals' health and safety. The European Journal of Risk Regulation (EJRR) provides an innovative forum for informed discussion on how these risks are regulated across policy domains in Europe and beyond. The central focus of the journal is the European Law and Policy regulating *inter alia* product (chemicals, food, pharma), financial, insurance and lifestyle risks (nutrition, alcohol, tobacco) as well as risks emerging from technology and third-party threats such as terrorism. The journal adopts a wide definition of regulation, including also innovative forms such as self-, co-regulation and nudges. Its methods extend to disciplines such as law, sociology, political science, risk analysis, economics as well as psychology and cognitive studies.

EJRR strikes a balance between the interests of the practitioners, notably those increasingly engaged in regulatory drafting and advice to the industry, and a more theoretical focus, combining normative articles with timely contributions on legislative and judicial developments, new literature and relevant events.
