

Glasgow Mathematical Journal

CONTENTS

A. B. Thaheem , A bounded map associated to a one-parameter group of $*$ -automorphisms of a von Neumann algebra	135
N. J. Kalton , Convexity conditions for non-locally convex lattices	141
Karl Byleen , Embedding any countable semigroup in a 2-generated bi-simple monoid	153
C. H. Houghton and R. P. Sullivan , Completely zero-simple semigroups generated by nilpotent elements	163
Martin Lorenz , On the transcendence degree of group algebras of nilpotent groups	167
R. Beazer , On some small varieties of distributive Ockham algebras	175
R. Beazer , Injectives in some small varieties of Ockham algebras	183
Robert M. Guralnick , Generation of the lower central series II	193
S. Raghavan , On Ramanujan and Dirichlet series with Euler products	203
S. A. Jassim , Finite abelian surface coverings	207
J. Ahsan and E. Enochs , Rings all of whose torsion quasi-injective modules are injective	219
R. B. McFadden , Unit-regular orthodox semigroups	229
P. G. Trotter , Free completely regular semigroups	241
C. K. Fong , Range inclusion for normal derivations	255

GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 200 pages.

The prepaid subscription for each Volume is £19.50 in U.K., \$45.00 in U.S.A., post free. Single parts may be supplied at a cost of £10.00 in U.K., \$22.50 in U.S.A., net.

Copies may be ordered direct from the publisher or from any bookseller.

Information for Contributors

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, publisher, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of fifty; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
