

THE SOCIETY OF DAIRY TECHNOLOGY

SOCIETY PUBLICATIONS

The following publications are currently available from the Society's offices

Cream Processing Manual Price £2.25 incl. postage	UHT Processing of Dairy Products Price £1.50 incl. postage
Quality Control of Milk Products Price £2.30 incl. postage	Bottle Washing Booklet Price 35p incl. postage

All enquiries to the Secretary, Society of Dairy Technology, 172A Ealing Road, Wembley, Middlesex, HA0 4QD

The JOURNAL of the Society is published quarterly (January, April, July and October)

Subscription rates: £20.00 per volume of four issues, single issues £6.00 (USA and Canada \$40.00 per vol., single issues \$12.00). From the above address

THE INDIAN JOURNAL OF DAIRY SCIENCE

Vol. XXXII

No. 4

December 1979

SELECTED CONTENTS

- Genetic variation in birth weight of calves – HARPAL SINGH, S. S. TOMAR and P. S. MALIK
- First lactation performance of cross-bred and pure-bred exotic cattle in indo-gangetic plains – G. N. RAO and R. NAGARJENKAR
- Estimates of milk production and feed consumption in bovines around Karnal – K. N. S. SHARMA and S. B. AGARWAL
- A clinical note on buffalo calf mortality – M. K. BALI, I. J. JUNEJA, R. N. S. KHANNA and R. P. SINGH
- Diurnal and seasonal patterns of thermoregulation in early life of buffalo calves (*Bos bubalis*) with special reference to calf mortality – P. C. GANGWAR and C. S. BAHGA
- Relationship among traits of growth and milk production in jamnapari goat – J. P. MITTAL
- Serum gonadotrophins and prolactin levels in anoestrus buffaloes – D. D. HERANJAL, A. R. SHETH, K. B. WADADEKAR, RUPA DESAI and SHANTA S. RAO
- Serum progesterone concentration in pregnant buffaloes – A. AHMED, V. K. AGARWAL and S. P. AGARWAL
- Effect of rate of dilution and mode of transportation on the semen quality – G. P. BHATNAGAR, K. K. VYAS and P. K. PAREEK
- Isolation and characterization of buffalo rumen isolates under two different dietary regimes – R. V. SINGH, B. D. LAKHCHAURA and S. C. SUD

Short Communications

Subscription: Rs. 40/- (inland), £4.00 or \$10.00 (overseas)

Indian Dairy Association, IDA House, Sector IV, R.K. Puram, New Delhi 110022

DIRECTIONS TO CONTRIBUTORS

GENERAL

Two copies of manuscripts should be sent to Dr M. E. Sharpe (*The Journal of Dairy Research*), National Institute for Research in Dairying, Shinfield, Reading, RG2 9AT, England. Submission of a paper will be held to imply that it reports unpublished original work, that it is not under consideration for publication elsewhere, and that if accepted for the *Journal* it will not be published elsewhere in any language, without the consent of the Editors.

FORM OF PAPERS

The author should follow these directions carefully, and consult a current issue of the *Journal* for guidance on details of typographical and other conventions.

Every paper should be headed with its title, the names and initials of the authors (each author supplying one given name) and the name and address of the laboratory where the work was done.

Papers should be in English, using the spelling of the *Shorter Oxford English Dictionary*. They should be typed with double spacing, on one side only of the sheets, and with ample margins for editorial annotations.

Papers should in general be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. With some types of material headings other than (c), (d) and (e) may be preferable.

The use of footnotes should be avoided if possible. Underlining should be used only to indicate italics. Proper nouns, including trade names, should be given a capital initial letter. Wherever possible numerals should be used unless this leads to ambiguity. The typescript should carry the name and address of the person to whom the proofs are to be sent, and give a shortened version of the paper's title, not exceeding 45 letters and spaces, suitable for a running title in the *Journal*.

TABLES

Tables should be numbered and should carry headings describing their content. They should be comprehensible without reference to the text. They should be typed on separate sheets and their approximate positions in the text indicated. *To minimize the cost of printing, the number and size of tables should be kept to an absolute minimum.*

ILLUSTRATIONS

Line drawings and photographs, which must be originals, should be numbered as Figures in Arabic numerals. Drawings should be in Indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized piece of tracing paper, or translucent graph paper faintly lined in blue or grey, folded down the centre with the drawing on one half and the other half acting as a flyleaf.

Attached to every figure and plate there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure or plate number; (c) the figures and lettering,

which are intended to appear on the finished block, in the correct positions relative to the drawing underneath. Each paper should have a separate typed sheet listing figure and plate numbers with their legends, and the approximate positions of illustrations should be indicated in the text.

The photographs and diagrams should be about twice the size of the finished block and not larger overall than the sheets on which the paper itself is typed. For a figure measuring 250 mm × 150 mm all lines, axes and curves should be 0.4 mm thick, thus . Graph symbols in order of preference are ○ ●, △ ▲, □ ■, × +, and for a 250 mm × 150 mm graph the circles should be 3 mm in diam. The triangles should be equilateral of 3 mm side, and the squares also of 3 mm side. The crosses should have lines 3 mm long at right angles. Scale marks on the axes should be on the inner side of each axis and should be 3 mm long.

SHORT COMMUNICATIONS

Short communications or notes of not more than 2500 words or the equivalent space in print and without a summary will also be published.

REFERENCES

In the text, references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); (Arnold & Barnard, 1900). Give all the surnames of 3 authors at the first mention, but in subsequent citations and in all cases where there are more than 3 authors give only the first surname (e.g. Brown *et al.*) provided that there is no possible ambiguity.

References should be listed alphabetically at the end of the paper. Titles of journals should be given in full, authors' initials should be included, and each reference should be punctuated in the typescript thus: Arnold, T. B., Barnard, R. N. & Compound, P. J. (1900). *Journal of Dairy Research* 18, 158–165. References to books should include names of authors, year of publication, title, names of editors, town of publication and name of publisher in that order, thus: Arnold, T. B. (1900). *Dairying*. London: Brown and Chester.

It is the duty of the author to check all references.

UNITS, SYMBOLS AND ABBREVIATIONS

SI units must be used, as explained in British Standards Institution publication PD 5686:1972. *The use of SI units*. Until SI units are widely understood, it is permissible to give the equivalent value in other units in parenthesis. Symbols and abbreviations used are those of British Standard 1991: Part 1: 1967. *Letter Symbols, Signs and Abbreviations*.

DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH₂PO₄. The term '%' means g/100 g solution. For ml/100 ml solution the term '% (v/v)' should be used and for g/100 ml solution the correct abbreviation is '% (w/v)'.

OFFPRINTS

Order forms giving quotations for offprints are sent to authors with their proofs.

CONTENTS

ORIGINAL ARTICLES

- Effect of drought condition on the quality of camel milk
R. YAGIL and Z. ETZION *pages* 159-166
- Analysis of somatic cell volume distribution as an aid to the
diagnosis of mastitis
R. J. T. HOARE, R. F. SHELDRAKE, P. J. NICHOLLS,
G. D. MCGREGOR and V. E. WOODHOUSE 167-176
- The effect of 1α -hydroxycholecalciferol on the concentrations of calcium,
magnesium and inorganic phosphate in the plasma of parturient cows
F. WITWER and E. J. H. FORD 177-183
- Localization of glycosylated κ -casein in bovine casein micelles by
lectin-labelled gold granules
M. HORISBERGER and M. VONLANTHEN 185-191
- Formation of lysinoalanine from individual bovine caseins
W. MANSON and T. CAROLAN 193-198
- Heat stability of milk
D. F. DARLING 199-210
- Effect of selected amides on heat-induced changes in milk
P. F. FOX, B. M. NASH, T. J. HORAN, J. O'BRIEN and
P. A. MORRISSEY 211-219
- Preparation and properties of rennets from lamb's and kid's abomasa
E. ANIFANTAKIS and M. L. GREEN 221-230
- Effect of milk concentration on the rennet coagulation time
D. G. DALGLEISH 231-235
- Review of the progress of Dairy Science: Flavour impairment from
pre- and post-manufacture lipolysis in milk and dairy products
W. K. DOWNEY 237-252
