*Industrial and Labor Relations Review***

LABOR HISTORY

"There may be a cyclical phenomenon in the more formalistic of the social sciences by which, as the deductive mode reaches a temporary dead end, history attracts social scientists as an entrée back into the real world."

--David Brody

The October 1989 or January 1990 *ILR Review* will carry papers delivered at a labor history symposium held in spring 1988 at Cornell University. An explicit goal of the symposium was to stimulate discussion across disciplines, and those attending included scholars in labor history, industrial relations, political science, economics, and sociology. An introductory paper by David Brody, "Labor History, Industrial Relations, and the Crisis of American Labor," will lead off the issue.

**COMPENSATION POLICIES AND
FIRM PERFORMANCE**

A special supplementary number of the ILR Review, to be released on or about December 1989, will carry papers to be delivered at a May 1989 symposium on compensation policies and firm performance at Cornell University. The symposium will focus on how firms choose their compensation policies and whether those policies have the desired incentive effects at the individual or corporate level. This special issue is free with any subscription that includes the Jan. 1990 issue.

**THE
INDUSTRIALIZATION
OF SOVIET RUSSIA**
VOLUME IV: THE
SOVIET ECONOMY IN
TURMOIL, 1929-1930
R.W. Davies

In the spinal year of the first five-year plan, a vast investment program began the transformation of the Soviet Union from a peasant country into a great industrial power. This third volume of the unrivaled series *The Industrialization of Soviet Russia* reexamines the breakdown of the mixed economy.

Praise for the series:

"Eminently readable...the books can be profitably read by the non-specialist and specialist alike...A major contribution to the search for a fuller understanding of the roots of domestic Stalinism and the problems of Soviet agriculture."

RADICALISM IN
CHINA, 1968-1981**

David Zweig

"David Zweig...does a masterful job of lifting the veil on the political struggles over agricultural policy during and immediately after the Cultural Revolution. His carefully documented portrait of this period is critical to an understanding of the rapid abandonment of collectivization that occurred when this era of radicalism ended. His book is the definitive work on the subject."

AMERICAN NATIONAL BIOGRAPHY

To be published under the auspices of the AMERICAN COUNCIL OF LEARNED SOCIETIES

This new biographical dictionary, which will contain sketches of approximately 20,000 persons, will be published in twenty volumes by Oxford University Press.

It will cover the entire sweep of American history from the first explorations to the present, and include persons prominent in every field of human activity.

Already under consideration for inclusion are all persons in the *Dictionary of American Biography*, *Notable American Women*, and other important collections. But the editors are eager to locate significant people whose careers have not been described in these reference works. Readers of this journal who have come across such persons in the course of their research are urged to nominate them by writing to:

John A. Garraty, General Editor
American National Biography
Center for the Social Sciences
Columbia University
New York, NY 10027

Please include a brief explanation of why each nominee merits inclusion.

The editors are also eager to locate scholars who would be interested in writing biographies for *American National Biography*. Such persons should write to Mark C. Carnes, at the above address, indicating their fields of special competence. In particular the editors are hoping to locate scholars who would be willing to prepare sketches of persons in fields where there are relatively few academic experts.
