Plant Genetic Resources: Characterization and Utilization

Volume 8 2010 ISSN: 1479-2621

Aims and Scope

The journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants; and for the airing of wider issues relevant to plant germplasm conservation and utilisation. We particularly welcome multi-disciplinary approaches that incorporate both a technical and a socio-economic focus.

Technical aspects can cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Authors should note that the journal will not review submissions using the RAPD marker system, except where very large numbers of assays place a cost limitation on the analysis, or where RAPD data is combined with, and is co-analysed with other forms of descriptive data, which allows an objective means of assessing the credibility of the RAPDs.

Non-technical aspects can include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Plant Genetic Resources Characterization and Utilization

Contents

Genetic erosion in crops: concept, research results and challenges <i>Mark van de Wouw, Chris Kik, Theo van Hintum, Rob van Treuren and Bert Visser</i>	1
Genetic reticulation and interrelationships among <i>citrullus</i> species as revealed by joint analysis of shared AFLPs and species-specific SSR alleles <i>Padmavathi Nimmakayala, Yan R. Tomason, Jooba Jeong, Sathish K. Ponniah, Anoji Karunathilake, Amnon Levi, Ramasamy Perumal and Umesb K. Reddy</i>	16
Protecting and preserving traditional knowledge and plant genetic resources: is ASEAN there yet? <i>Jane G. Payumo, Raymond Jussaume and Howard D. Grimes</i>	26
Morphologic variation in the USDA/ARS rhubarb germplasm collection <i>Alberto Pantoja and Joseph C. Kuhl</i>	35
Short Communication SSR marker-based DNA fingerprinting and cultivar identification of rice (<i>Oryza sativa</i> L.) in Punjab state of India <i>Navraj K. Sarao, Yogesh Vikal, Kuldeep Singh, Monika A. Joshi and R. C. Sharma</i>	42
Identification of geographical gaps in the pearl millet germplasm conserved at ICRISAT genebank from West and Central Africa <i>H. D. Upadhyaya, K. N. Reddy, M. Irshad Ahmed, C. L. L. Gowda and B. I. G. Haussmann</i>	45
Short Communication Screening barnyard millet germplasm against grain smut (<i>Ustilago panici-frumentacei</i> Brefeld) <i>Arun Gupta, Deeksha Joshi, Vinay Mahajan and H. S. Gupta</i>	52
Selection of alfalfa cultivars adapted for tropical environments with repeated measures using PROC MIXED of SAS® System <i>G. M. L. de Assis, A. C. Ruggieri, M. E. Z. Mercadante, G. M. F. de Camargo and J. M. Carneiro Júnior</i>	55
Genetic relationships among napiergrass (<i>Pennisetum purpureum</i> Schum.) nursery accessions using AFLP markers <i>Karen Harris, William Anderson and Ravindra Malik</i>	63
Short Communication Assessment of oil content and fatty acid composition variability in different peanut subspecies and botanical varieties <i>M. L. Wang, C. Y. Chen, J. Davis, B. Guo, H. T. Stalker and R. N. Pittman</i>	71
Whole grain morphology of Australian rice species <i>S. Kasem, D. L. E. Waters, N. Rice, F. M. Shapter and R. J. Henry</i>	74
Morphological, ecological and genetic variability of <i>Lavandula hisieri</i> (Rozeira) Rivas-Martínez in central eastern Portugal <i>Fernanda Delgado, Sílvia Ribeiro, Álvaro Alves, Eliseu Bettencourt and Sónia Dias</i>	82

Publisher: Katy Christomanou

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by Cambridge University Press in April, August and December on behalf of NIAB. The online edition is available at journals.cambridge.org/pgr.

Special sales and supplements:

This Journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The Journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at the Cambridge address above.

Subscription information:

The subscription rates for Volume 8, 2010 (3 issues) are:

Institutional subscription

Internet/Print Package £300.00/\$576.00 (Americas only)

Internet only £240.00/\$463.00 (Americas only)

Print only £278.00/\$535.00 (Americas only)

Any **supplements** to this Journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CUP Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of

publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections Plant Genetic Resources USA address.

Information for Authors:

Please email manuscript (with any accompanying figures or tables) to the Journal Administrator Faye Kalloniatis at plantgeneticresources@googlemail.com

Notes for Authors are available on the internet at journals.cambridge.org/pgr

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
