

INTERNATIONAL BIOLOGICAL PROGRAMME

Volume 2

Crop Genetic Resources for Today and Tomorrow

Edited by O. H. FRANKEL
and J. G. HAWKES

This volume is concerned with one of the world's fastest disappearing natural resources – the invaluable reservoir of genetic variability in our cultivated plants. How to collect this variation, how to preserve it, how to evaluate and use it, and how to store and exchange information about it – these are some of the topics explored in this volume.

Paperback edition

Human Evolutionary Trees

E. A. THOMPSON

This book provides a detailed analysis of the way in which inference about evolutionary history of human populations may be made from genetic data of present populations (in particular the blood-group gene frequencies of present-day populations). A statistical model for the genetic evolution of populations is set up so that estimates of the evolutionary history may be made. Although any model is a simplification of the true processes involved, this account provides a description of the relation of major events of evolution to current genetic data. A book that will interest graduate students, teachers and research workers in human genetics, population genetics, statistical inference and applied statistics.

Pure Lectins

Cell surface studies

Lymphocyte stimulation

Chromosome analysis

Leucoagglutinin

Unlike crude preparations of PHA, Leucoagglutinin is an electrophoretically pure glycoprotein with potent lymphocyte stimulating activity but no erythroagglutinating activity.

ConA

Prepared by affinity chromatography on Sephadex[®]. Fully active and no further purification is required. Freeze-dried powder containing at least 99 % protein and less than 0.1 % carbohydrate.

STADLER GENETICS SYMPOSIUM

April 9–10, 1976

UNIVERSITY OF MISSOURI

David Apirion (Washington University, St Louis) : Genetic Approaches to a Cellular Organelle, the Ribosome.

James E. Carrel (University of Missouri, Columbia) : Aphrodisiacs and Antiaphrodisiacs : Better Loving Through Chemistry.

Anthony Cerami (Rockefeller University) : The Development of New Drugs for Genetic Diseases.

Arnold L. Demain (Massachusetts Institute of Technology) : Genetic Regulation of Fermentation Organisms.

John W. Drake (University of Illinois, Urbana) : Mutagenic Mechanisms in Bacteriophage T4.

Alfred Loeblich III (Harvard University) : Dinoflagellates: Genetics and DNA Characterization.

David E. Pettijohn (University of Colorado, Denver) : Tertiary Structure of the Bacterial Nucleoid.

Drew Schwartz (Indiana University, Bloomington) : Regulation of Alcohol Dehydrogenase Genes in Maize.

O. P. Sehgal (University of Missouri, Columbia) : RNA: Protein and Protein:Protein Interactions in the Virions of Southern Bean Mosaic Virus.

Detailed Program can be obtained from Conferences and Short Courses, University of Missouri, 347 Hearnes Bldg., Columbia MO 65201.

Proceedings of this and of previous Symposia can be ordered from Stadler Genetics Symposia, 117 Curtis Hall, University of Missouri, Columbia MO 65201, USA. Price is \$5.00 per volume plus 50c per order for postage and handling.

Wellcome® Phytohaemagglutinin

To facilitate recognition of
congenital and acquired anomalies.

A mitogenic agent that helps you predict the future...today.

Wellcome Phytohaemagglutinin is a mitogenic agent that facilitates cytogenic studies of human and other animal chromosomes.

• Predictable • Dependable • Easy-to-use

International Conference on Environmental Mutagens

The Second International Conference on Environmental Mutagens will be held in Edinburgh from 11 to 15 July 1977 under the patronage of H.R.H. The Duke of Edinburgh, K.G., K.T.

Full details will be circulated to members of the American, European, Japanese, and Indian Environmental Mutagen Societies.

Other interested parties may obtain further information from

ANNOTATED BIBLIOGRAPHIES

These are duplicates of bibliographies prepared on request at the Commonwealth Bureau of Animal Breeding and Genetics, The King's Buildings, West Mains Road, Edinburgh, EH9 3JX, Scotland. In addition to the full title reference, the abstract published in *Animal Breeding Abstracts* is reproduced. Supplementary Bibliographies (marked A and B) are prepared from time to time to bring some of the earlier ones up to date. The bibliographies can be obtained on application to the Director. The prices quoted include postage by ordinary mail, and the remittance should be sent with the order *unless you want it posted by air mail*. If the material is to be sent by air mail, do not send money with your request; you will receive an invoice which includes air mail postage.
