Health Economics, Policy and Law

Published in association with LSE Health

Editor-in-Chief

Adam Oliver, *London School of Economics and Political Science, UK*

International trends highlight the confluence of economics, politics and legal considerations in the health policy process. *Health Economics, Policy and Law (HEPL)* provides a forum for inter-disciplinary health policy studies, and will be of use to academics, policy makers, health care managers and professionals. *HEPL* is international in scope, publishing both theoretical and applied work, with articles on all aspects of health policy. *HEPL* is particularly interested in publishing innovative ideas that promise to contribute to improving health and healthcare policy. Considerable emphasis is placed on rigorous conceptual development and analysis, and on the presentation of empirical evidence that is relevant to the policy process. Review articles and debate sections bring readers in touch with current research developments and issues.

Cover Artwork

Green Mountain, Chinese pigments on Jinho paper by Vina Yang

Ms. Vina Yang is a board member of the Wisconsin Regional Artists Association and a cofounder of the Chinese Fine Art Association in Madison, Wisconsin (www.cfaamadison.org).

As an artist, she strives to capture the sense of harmony and peace within the images of nature. Vina's artworks focus on applying Chinese brush painting techniques to rice paper and silk, although she also works with pastel, acrylic, and gouache. She is passionate about both Western and Eastern art.

Vina's works, exhibited in solo and group shows locally and internationally, have received many honors and awards. Her long scroll artworks have earned special honors at the annual Japan International Sumi-e Society contests (www.ifacasumi-e.org).

Professionally, Vina is a research scientist. Her interests in both art and science complement one other and bring inspiration to her art. Vina's art can be viewed at the two group websites mentioned above, or contact her at vyang@aol.com.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
