## AGRONOMY JOURNAL

(formerly the JOURNAL of the  
American Society of Agronomy)

Vol. 43 March 1951 No. 3

The Broad Interpretation and Application of  
Soil Test Information, by *F. W. Parker, W. L.  
Nelson, Eric Winters* and *I. E. Miles*. The  
Effect of Maturity and Other Factors on Stands  
of Corn at Low Temperatures, by *G. E. Rush*  
and *N. P. Neal*. Inheritance of Awns in Barley,  
by *S. C. Lutzenberger* and *John M. Green*. Urea-  
form: Greenhouse Studies with Perennial Rye-  
grass, by *W. H. Armiger, K. G. Clark, F. O.  
Lundstrom* and *A. E. Blair*. The Vegetative  
Propagation of *Sansevieria*, by *J. Frank Joyner*,  
*Edward O. Gangstad* and *Charles C. Seale*.  
*also other articles concerned with research in  
crops and soils*

Published by  
The American Society of Agronomy  
2702 Monroe Street  
Madison 5, Wisconsin

Price, outside U.S. and Canada: \$11.00  
per year

## THE EMPIRE JOURNAL OF EXPERIMENTAL AGRICULTURE

THIS JOURNAL offers agricultural research workers a medium for disseminating the records and results of their investigations on the feeding and management of live stock, cultivation and manuring of crops, trial of farm machinery, agricultural economics, and experimental technique.

Vol. XIX. No. 73

CONTENTS

January 1951

- G. AP GRIFFITH: Factors influencing Nitrate Accumulation in Uganda Soil.  
L. G. VALLANCE: Recent Advances in Sugar-cane Culture in Queensland. With Plate 1.  
R. E. ALTONA and N. J. MENTZ: The Control of Weeds in Maize with Selective Plant-growth Regulators.  
D. J. HALLIDAY and W. G. TEMPLEMAN: Field Experiments in Selective Weed Control by Plant-growth Regulators. III. Weed Control in Grassland.  
G. HASKELL and P. DOW: Studies with Sweet Corn. V. Seed-settings with Distances from Pollen Source.  
S. BARTLETT, E. S. BAXTER, R. BRAUDE and K. G. MITCHELL: The Nutritive Value of Conophor Cake-meal for Young Dairy Stock and Fattening Pigs.  
G. P. HUGHES and T. A. EVANS: Response of an Established Sheep Ley to Dressings of Sulphate of Ammonia. Pt. I. Yields and Botanical Composition of Herbage cut for Silage and for Hay.

OXFORD UNIVERSITY PRESS, Amen House, LONDON, E.C. 4

A DIRECTOR OF RESEARCH is required to become head of the Research Organisation of a leading Group of Plantation Companies in Malaya. This key post calls for a Scientist with a general training, of which the emphasis is towards Chemistry, Soils, and Plant Physiology. It offers exceptional scope for personal direction and initiation of research of the first importance to industries which are vital to the economy of the sterling area. It will, accordingly, be highly remunerated. Suitably qualified candidates are requested to write in confidence with full details of career and qualifications to **Box 110, Dorland Advertising, 18-20 Regent Street, S.W.1.**

A SENIOR RESEARCH OFFICER (Geneticist) is required for Malaya by a prominent Group of Plantation Companies. The post calls for a scientist with experience of genetical work on tropical cultures, if possible with special emphasis on oil palms. Exceptional opportunity to use large research resources at own initiative for work on the frontiers of present knowledge in this field. The appointment will carry a high remuneration. Write with full details to **Box 926, Dorland Advertising, 18-20 Regent Street, S.W.1.**

## FABER BOOKS

### Fertility Farming

F. NEWMAN TURNER

RALPH WIGHTMAN says, 'I am wholeheartedly with Mr Turner in believing that most of our cultivated soils need more organic matter—stimulating, interesting and very readable—This is not a book for the ignorant nor for the weak-minded.'—*B.B.C.* 'Mr Turner is a heretic, but he is very far from being a crank; for he has put every one of his theories to the test of practical experiment, and the transformation achieved at Goosegreen Farm in 10 years is so remarkable that not even official orthodoxy can ignore it.'—*Truth.*

*Fully illustrated.* 16s.

### Food, Farming and the Future

FRIEND SYKES

This revolutionary book by the author of *Humus—and the Farmer* is 'a bold challenge to traditional methods and should be read by officers of the Department of Agriculture and by all engaged in the technical education of the farmer.'—*Irish Independent.*

*Well illustrated.* 21s.

### Breeding for Production

BRIAN BRANSTON

Students of agriculture as well as working farmers will profit from this simply written study of genetics that a farmer can apply in his animal breeding. The author is a *B.B.C.* Talks Producer specialising in Agricultural Broadcasts.

*Illustrated.* 12s. 6d.

### English Husbandry

ROBERT TROW-SMITH

'An authoritative work on the agriculture of England, from the first rudimentary scratchings of the soil to the highly mechanised farm of today.'—*Daily Telegraph.* 'Practically every page provides food for thought and discussion, and the chapter on modern times is a masterly appraisal of the present position.'—*Countryman.*

*Fully illustrated.* 18s.

### The New Farming

D. H. ROBINSON

'Makes plain the essential partnership of the farmer and the scientist in modern farming, traces how that partnership has sprung up and been knit together, and gives the reader much food for thought about future possibilities.'—*Field.*

*Illustrated.* 16s.

### Land Potential

T. W. EVANS

'A contribution to modern farming through which the informed agriculturist will want to read if he wishes to retain his claim to being informed.'—*Scotsman.* *Illustrated.* 12s. 6d.

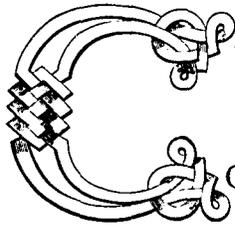

### The Weed Problem:

#### *A New Approach*

F. C. KING

Based on investigations into plant ecology, this study maintains that a healthy weed crop is essential to both farm and garden. 8s. 6d.

## FABER BOOKS

CONSTANT research in the science of  
machine milking has done much to increase the  
quality of milk, and the economy of its production  
throughout many parts of the world. Much has yet  
to be done and Gascoignes are working for  
universally better milk production  
under ideal conditions.
