SLAVONIC ENCYCLOPEDIA

Edited by JOSEPH S. ROUCEK, Ph.D.

THE Slavonic Encyclopedia opens the door to the Slavonic world, the largest kindred group of people in the world, divided into several distinct nations, each with its own tongue, its national literature, its independent history, and its peculiar civilization—but all tied together by a general consciousness that they all belong to a single and great family of Slavonic peoples. Their existence has been and will be of supreme importance to the course of world history, as indicated by the implications of such popular phrases as Europe behind the “iron curtain,” a “Sovietized Europe,” the “Pan-Slavonic Danger,” etc.

This Encyclopedia covers the most important developments of the history of the Slavic peoples (including those living outside the territorial limits of the Slavic states as well as those who have joined the stream of America's civilization as the “new” immigrants) and of the various ramifications of their contemporary life and problems.
