

SUBJECT INDEX
VOLUME 48, 2006

- ¹⁴C dating, 109–116, 127–166, 259–266, 267–283, 285–293, 315–323, 325–336, 421–434, 451–458, 459–467, 473–484
¹⁴CO₂, 61–68, 355–372
⁹⁰Sr, 197–204
- Accelerator mass spectrometry [AMS], 17–29, 109–116, 219–226, 253–258, 259–266, 267–283, 285–293, 325–336, 355–372
Age, 83–100
Alpine, 227–236
Archaeology, 227–236, 237–240, 409–419, 459–467
Atmospheric ¹⁴CO₂, 355–372
- Balearic Islands, 421–434
Benzene, 485–491
Biofuel, 315–323
Bomb ¹⁴C, 1–15, 305–313
Bone dating, 117–121, 179–195, 241–242
Brazil, 459–467
Bronze, 83–100
- Canada, 435–450
Cemeteries, 127–166
Cerenkov counting, 197–204
Chernobyl, 451–458
Chronology, 83–100, 101–107, 373–386, 409–419
Coastal upwelling, 45–60
- Dentine, 305–313
Deposition, 197–204
- Early Bronze Age, 101–107
Early Upper Paleolithic, 253–258
Ejina Basin, 219–226
El Niño, 17–29
Enamel, 305–313
Evasion, 61–68
- Fjords, 31–43
Fossil bone, teeth, 109–116
Foraminifera, 17–29
Forensic, 305–313
Forest fires, 435–450
Forest litter, 451–458
Fuel, 315–323
- Gomer Glacier, 69–82
Gran Sasso Massif, 167–175
Graphite, 325–336, 451–458
Gulf of Alaska, 1–15
- Hawaii, 227–236
High-accuracy, 355–372
High-precision, 285–293, 387–400
- Holocene, 45–60
Humic acid, 337–353
Humin, 337–353
Hunter-gatherers, 127–166
- Ice, 69–82
Interlaboratory comparison, 485–491
Iron, 83–100
Iron Age, 373–386
Italy, 127–166, 473–484
- Japan, 401–408
- Korea, 259–266, 267–283
- Lacustrine deposits, 219–226
Levant, 253–258, 373–386
Lithic site, 237–240
Loess, 109–116
LSC, 167–175, 315–323, 401–408
- Marine reservoir correction, 387–400
Marine shells, 45–60, 387–400
Middle Holocene, 127–166, 237–240
Molecular sieve, 61–68
Monsoon, 17–29
- North Pacific Intermediate Water, 1–15
Northwest coast (USA), 237–240, 469–472
NW China, 109–116, 219–226
- Organic matter, 109–116
- Paleoecology, 337–353
Paleoproductivity, 17–29
Paleosol, 109–116
Particulate organic carbon (POC), 69–82
Point Barrow, 355–372
Portugal, 45–60
Prehistoric residential site construction, 409–419
Prehistory, 421–434
- Radioisotope, 325–336
Raqefet Cave, 253–258
Reservoir effect, 31–43, 45–60
- Santa Barbara Channel, 387–400
Shell artifacts, 387–400
Siberia, 127–166
Site contemporaneity, 409–419
Small samples, 69–82
Society Islands (Central Eastern Polynesia), 409–419
Soil, 451–458
South Pole, 355–372
Stable isotopes, 387–400

Stratigraphy, 337–353

Subalpine, 227–236

Surface water, 61–68

Teeth, 305–313

Tell el-Hesi, 101–107

Teotihuacan, Mexico, 485–491

TL-IRSL-OSL dating, 219–226

Tree rings, 205–217, 401–408

Tributyl phosphate, 197–204

Volcanic ash soil, 337–353

Wheat, 197–204
