

PROCEEDINGS OF THE DESIGN SOCIETY

the **Design Society**
a worldwide community

CAMBRIDGE
UNIVERSITY PRESS

INTERNATIONAL CONFERENCE ON ENGINEERING DESIGN, ICED25

11-14 AUGUST 2025, DALLAS, TX

Editor-in-Chief

Kilian Gericke
University of Rostock, Germany
kilian.gericke@uni-rostock.de

Programme Committee

Kilian Gericke, University of Rostock (**Programme Committee Chair**)
Stefan Zorn, University of Rostock (**Programme Committee Co-Chair**)
Paul Egan, Texas Tech University, United States
Ola Isaksson, Chalmers University of Technology, Sweden
Pascal Le Masson, Mines Paris - PSL, France
Zhenghui Sha, University of Texas at Austin, United States
Vishal Singh, IISC Bangalore, India
Joshua Summers, University of Texas at Dallas, United States
Noe Vargas-Hernandez, University of Texas Rio Grande Valley, United States

Organising Committee

Joshua Summers, University of Texas at Dallas, United States (**Conference Chair**)
Anne Balsamo, University of Texas at Dallas, United States
Wei Chen, Texas A&M University, United States
Emily Choi, University of Texas at Dallas, United States
Stephen Ekward-Osire, Texas tech University, United States
Seth Orsborn, Southern Methodist University, United States
Yanwen Xu, University of Texas at Dallas, United States
Jie Zhang, University of Texas at Dallas, United States

Scientific Advisory Board

Audrey Abi Akle, ESTIA, France
Shakuntala Acharya, Indian Institute of Technology Guwahati, India
Sofiane Achiche, Polytechnique Montréal, Canada
Oredola Adebayo, The University of Texas at Dallas, United States
Taiwo Adedeji, University of Strathclyde, United Kingdom
Marina Fernandes Aguiar, University of São Paulo, Brazil
Ahmad Al khatib, ECAM Rennes - Louis de Broglie, France

Albert Albers, Karlsruhe Institute of Technology (KIT), Germany
 Janet Allen, The University of Oklahoma, United States
 Lars Almefelt, Chalmers University of Technology, Sweden
 Theresa Ammersdörfer, Technische Universität Clausthal, Germany
 Puja Anand, Pearl Academy, India
 Gokula Annamalai-Vasanth, Edinburgh Napier University, United Kingdom
 Améziane Aoussat, ENSAM, France
 Abdelmalek Arrouf, Laboratoire d'Etude et de modélisation des phénomènes architecturaux
 et urbains, de l'idée à l'usage (LEMPAU), Batna 1 University, Algeria
 Amir Attia, California State University - Monterey Bay, United States
 Alexander Atzberger, Webasto, Germany
 Marco Aurisicchio, Imperial College London, United Kingdom
 Ehsan Baha, University of Montreal, Canada
 Kristin Bartlett, University of Kentucky, United States
 Marcel Bartz, TU Dortmund University, Germany
 Weston Lyle Baxter, Imperial College London, United Kingdom
 Niccolo Becattini, Politecnico di Milano, Italy
 Kamran Behdinan, University of Toronto, Canada
 Sanja Bencetic, University of Zagreb Faculty of Architecture, Croatia
 Beate Bender, Ruhr University Bochum, Germany
 Estelle Berger, Strate School of Design, France
 Elsa Berthet, INRAE, France
 Alessandro Bertoni, Blekinge Institute of Technology, Sweden
 Marco Bertoni, Blekinge Institute of Technology, Sweden
 Eric Blanco, French Air Force Academy - Ecole de l'Air, France
 Graziana Blandino, Politecnico di Torino, Italy
 Oliver Bleisinger, University of Kaiserslautern-Landau, Germany
 Lucienne Blessing, None, Germany
 Samuel Boahen, University of Michigan, United States
 Nenad Bojcetic, University of Zagreb, Croatia
 Monica Bordegoni, Politecnico di Milano, Italy
 Jonathan Borg, University of Malta, Malta
 Yuri Borgianni, Free University of Bolzano-Bozen, Italy
 Jean-François Boujut, Grenoble INP - University Grenoble Alpes, France
 Arindam Brahma, Chalmers University of Technology, Sweden
 Spencer Breiner, National Institute of Standards and Technology (NIST), United States
 Matthieu Bricogne, Université de Technologie de Compiègne, France
 Ross Brisco, University of Strathclyde, United Kingdom
 Eric Reynolds Brubaker, Virginia Tech, United States
 Nikola Bursac, Hamburg University of Technology (TUHH), Germany
 Colin Reginald Burvill, The University of Melbourne, Australia
 Nicklas Bylund, Sandvik Coromant, United States
 Nicholas Caldwell, University of Suffolk, United Kingdom
 Felician Campean, University of Bradford, United Kingdom
 Marco Cantamessa, Politecnico di Torino, Italy
 Federica Cappelletti, Università Politecnica delle Marche, Italy
 Giandomenico Caruso, Politecnico di Milano, Italy
 Gaetano Cascini, Politecnico di Milano, Italy
 Philip Cash, Northumbria University, United Kingdom
 Rebecca Castagnoli, Università degli Studi di Torino, Italy
 Djari Chahinez, University of Batna1, Algeria
 Amaresh Chakrabarti, Indian Institute of Science, India
 Sushil Chandra, BML Munjal University, India
 Christos Chantzaras, Frankfurt University of Applied Sciences, Germany

Carole Charbuillet, ENSAM, France
 Filippo Chiarello, Università di Pisa, Italy
 Peter R.N. Childs, Imperial College London, United Kingdom
 P. John Clarkson, University of Cambridge, United Kingdom
 Francois Cluzel, CentraleSupélec, Université Paris-Saclay, France
 Samuele Colombo, University of Strathclyde, United Kingdom
 Franziska Conrad, University of Southampton, United Kingdom
 Jan Conrad, Hochschule Kaiserslautern – University of Applied Sciences, Germany
 Aykut Coskun, Koc University, Turkiye
 Daniel Coutellier, Université Polytechnique Hauts de France, France
 Steve Culley, University of Bath, United Kingdom
 Jaap Daalhuizen, TU Delft, Netherlands
 Andreas Dagman, Chalmers University of Technology, Sweden
 Enrique D’Amico, Universidad Nacional de La Plata, Argentina
 Roland De Guio, INSA Strasbourg, France
 Elies Dekoninck, University of Bath, United Kingdom
 Barbara Del Curto, Politecnico di Milano, Italy
 Niels Demke, Helmut Schmidt University, Germany
 Agnes D’Entremont, The University of British Columbia, Canada
 Marion Deshoulières, Mines PSL University, France
 Suman Devadula, JAIN (Deemed-to-be University), India
 Steve Diasio, University of South Florida, United States
 Andy Dong, Oregon State University, United States
 Koffi Dotche, University of Technology Troyes, France
 Roman Dumitrescu, Fraunhofer Institute for Mechatronic Systems Design IEM, Germany
 Henrikke Dybvik, University of Bristol, United Kingdom
 Claudia Eckert, The Open University, United Kingdom
 Ian Marcus Edgecomb, University of Strathclyde, United Kingdom
 Paul Egan, Texas Tech University, United States
 Tobias Eifler, Technical University of Denmark, Denmark
 Sindre Wold Eikevåg, Norwegian University of Science and Technology, Norway
 Boris Eisenbart, Swinburne University of Technology, Australia
 Asko Uolevi Ellman, Tampere University, Finland
 Christer W. Elverum, Norwegian University of Science and Technology, Norway
 Torsten Erbe, ASML BV, Netherlands
 Zuhail Erden, Atilim University, Turkiye
 Åsa Ericson, Luleå University of Technology, Sweden
 Yvonne Theresia Eriksson, Mälardalen University, Sweden
 Benoit Eynard, Université de Technologie de Compiègne, France
 Nuša Fain, Carleton University, Canada
 Jan Falter, University of Stuttgart, Germany
 Mario Fagnoli, Sapienza University of Rome, Italy
 Philip Farrugia, University of Malta, Malta
 Jenny Faucheu, Mines Saint-Etienne, France
 Claudio Favi, Università degli Studi di Parma, Italy
 Tu-Anh Fay, Technische Universität Berlin, Germany
 Mohammad Fazelpour, University of Maryland, United States
 Harry James Felton, University of Bristol, United Kingdom
 Antonio Fernandes, University of Porto, Portugal
 Francesco Ferrise, Politecnico di Milano, Italy
 Kenton Blane Fillingim, Oak Ridge National Laboratory, United States
 Susan Finger, Carnegie Mellon University, United States
 Lorenzo Fiorineschi, University of Florence, Italy

Xavier Fischer, ESTIA, France
 Sven Forte, CONTACT Software, Germany
 Clement Fortin, Skolkovo Institute of Science and Technology (Skoltech), Russia
 Eckart Frankenberger, Airbus, Germany
 Mark Fuge, ETH Zürich, Switzerland
 Kikuo Fujita, Osaka University, Japan
 Shuichi Fukuda, Keio University, Japan
 Raoudha Gaha, Université de Technologie de Compiègne, Tunisia
 Carlos García-García, Universitat Jaume I (UJI), Spain
 Mickael Gardoni, École de Technologie Supérieure (ÉTS) / INSA Strasbourg, Canada
 Nicolas Gebhardt, thyssenkrupp Marine Systems GmbH, Germany
 Georgi V. Georgiev, University of Oulu, Finland
 Kilian Gericke, University of Rostock, Germany
 Thierry Gidel, Sorbonne Universités, Université de technologie Compiègne, France
 Agathe Gilain, MINES ParisTech, France
 Jens Christian Göbel, TU Kaiserslautern, Germany
 Dietmar Göhlich, Technische Universität Berlin, Germany
 Mehmet Goker, Aionics, United States
 Gabriela Goldschmidt, Technion - Israel Institute of Technology, Israel
 Milene Gonçalves, Delft University of Technology, Netherlands
 Shayne Gooch, University of Canterbury, New Zealand
 James Gopsill, University of Bristol, United Kingdom
 Kosa Goucher-Lambert, University of California, Berkeley, United States
 Serena Graziosi, Politecnico di Milano, Italy
 Amy Grech, University of Strathclyde, United Kingdom
 Andrea Luigi Guerra, UTC, Sorbonne Universités, France
 Matthias Guertler, University of Technology Sydney, Australia
 Ravi Kumar Gupta, National Institute of Technical Teachers' Training & Research, BHOPAL, India
 Daniel Guzzo, Technical University of Denmark, Denmark
 Georg Hackenberg, University of Applied Sciences Upper Austria, Austria
 Carly Hagins, University of Kentucky, United States
 Sophie Hallstedt, Chalmers University of Technology, Sweden
 Ji Han, University of Exeter, United Kingdom
 Claus Thorp Hansen, Technical University of Denmark, Denmark
 Armand Hatchuel, MINES ParisTech, France
 Peter Hehenberger, University of Applied Sciences Upper Austria, Austria
 Jeffrey Herrmann, The Catholic University of America, United States
 Ben Hicks, University of Bristol, United Kingdom
 Alexander 'Freddie' Holliman, University of Strathclyde, United Kingdom
 Gunnar Holmberg, Linköping University, Sweden
 Katja Hölttä-Otto, The University of Melbourne, Australia
 Bryan Howell, Brigham Young University, United States
 Ada Hurst, University of Waterloo, Canada
 Stephan Husung, Technische Universität Ilmenau, Germany
 Horea Ilies, University of Connecticut, United States
 David Inkermann, TU Clausthal, Germany
 Kika Ioannou Kazamia, University of Nicosia, Cyprus
 William Ion, University of Strathclyde, United Kingdom
 Ola Isaksson, Chalmers University of Technology, Sweden
 Santosh Jagtap, Indian Institute of Technology Guwahati, India
 Marija Jankovic, CentraleSupélec, Université Paris-Saclay, France
 Camille Jean, École nationale supérieure d'arts et métiers (ENSAM), France
 Glenn Johansson, Lund University, Sweden
 Christian Johansson, Blekinge Institute of Technology, Sweden

Christian Johansson Askling, Blekinge Institute of Technology, Sweden
 Julie Irene Johnson, University of Waterloo, Canada
 Ingo Jonuschies, University of Rostock, Germany
 Iestyn Jowers, The Open University, United Kingdom
 Tero Sakari Juuti, Tampere University, Finland
 Udo Kannengiesser, Johannes Kepler University Linz, Austria
 Lennart Karlsson, Anske AB, Sweden
 Daniela Kattwinkel, Westfälische Hochschule, Germany
 Simeon Keates, University of Chichester, United Kingdom
 Troels Keldmann, Keldmann Healthcare A/S, Denmark
 Sonal Keshwani, IIIT-D, India
 Mohammed Rajik Khan, National Institute of Technology Rourkela, India
 Jonathan Max Kiessling, University of Stuttgart, Germany
 Harrison Kim, University of Illinois at Urbana-Champaign, United States
 Seoyoung Kim, Stanford Center at the Incheon Global Campus, Stanford University, South Korea
 Yong Se Kim, Tongji University, China
 SuKyoung Kim, Sapporo City University, Japan
 Timoleon Kipouros, University of Cambridge, United Kingdom
 Eckhard Kirchner, TU Darmstadt, Germany
 Alexander Koch, University of the Bundeswehr Munich, Germany
 Edwin Koh, Singapore University of Technology and Design, Singapore
 Christian Köhler, htw saar - Saarland University of Applied Sciences, Germany
 Michael Kokkolaras, McGill University, Canada
 Georgios Koronis, Product and Systems Design Engineering, Greece
 Srinivas Kota, Birla Institute of Technology and Science Pilani, India
 Dieter Krause, Hamburg University of Technology, Germany
 Gordon Krauss, Harvey Mudd College, United States
 Matthias Kreimeyer, Universität Stuttgart, Germany
 Per Kristav, Lund University, Sweden
 Robin Kromer, I2M, France
 Petter Krus, Linköping University, Sweden
 Nicolette Lakemond, Linköping University, Sweden
 Guillaume Lamé, Paris Saclay University, France
 Tobias Larsson, Blekinge Institute of Technology, Sweden
 Pascal Le Masson, MINES ParisTech-PSL, France
 Boyeun Lee, University of Exeter Business School, United Kingdom
 Jeremy Legardeur, ESTIA, France
 Torben Anker Lenau, Technical University of Denmark, Denmark
 Yann Leroy, CentraleSupélec, France
 Kemper Lewis, University at Buffalo, United States
 Ting Liao, Stevens Institute of Technology, United States
 André Liem, Norwegian University of Science and Technology, Norway
 Julie Linsey, Georgia Institute of Technology, United States
 Ying Liu, Cardiff University, United Kingdom
 Pavel Livotov, Offenburg University of Applied Sciences, Germany
 Iban Lizarralde, ESTIA, France
 Joaquim Lloveras, Universitat Politècnica de Catalunya, Spain
 Helen Lockett, The Open University, United Kingdom
 Jianxi Luo, City University of Hong Kong, Hong Kong
 Morad Mahdjoub, Université de Technologie de Belfort-Montbéliard, France, France
 Anja Maier, University of Strathclyde, United Kingdom
 Marco Mandolini, Università Politecnica delle Marche, Italy
 Nicolas Maranzana, Arts et Métiers ParisTech, France
 Giulia Marcocchia, CY école de design, France

Marco Marconi, Università degli Studi della Tuscia, Italy
 Tucker Marion, Northeastern University, United States
 Dorian Marjanovic, University of Zagreb, Croatia
 Hazar Taissier Marji, University of Strathclyde, United Kingdom
 Franck Marle, CentraleSupélec, Université Paris-Saclay, France
 Tomislav Martinec, University of Zagreb, FSB, Croatia
 Janaina Mascarenhas, University of São Paulo, Brazil
 Cédric Masclet, Université Grenoble Alpes, France
 Vincenzo Maselli, “Sapienza” University of Rome, Italy
 Akane Matsumae, Kyushu University, Japan
 Nada Matta, University of Technology of Troyes, France
 Jason Anthony Matthews, University of the West of England, United Kingdom
 Sven Matthiesen, Karlsruhe Institute of Technology (KIT), Germany
 Santosh Kumar Maurya, Hitachi Ltd., R&D Group, Japan
 Emile Mazerant, Delft University of Technology, Netherlands
 Tim McAloone, Technical University of Denmark, Denmark
 Stig McArthur, University of Strathclyde, United Kingdom
 Alison McKay, University of Leeds, United Kingdom
 Christopher McMahon, University of Bristol - Engineering, United Kingdom
 Mirko Meboldt, ETH Zurich, Switzerland
 Sebastiaan Meijer, KTH Royal Institute of Technology, Sweden
 Mounib Mekhilef, University of Orleans, France
 Yaroslav Menshenin, Grenoble INP, France
 Christophe Merlo, Bordeaux University, ESTIA Institute of Technology, France
 Jörg Miebling, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
 Nicolas Misdariis, IRCAM, France
 Greg Mocko, Clemson University, United States
 Stefan Moehring, Simon Moehring Anlagenbau GmbH, Germany
 Francesca Montagna, Politecnico di Torino, Italy
 Giovana Monteiro Gomes, DTU - Technical University of Denmark, Denmark
 Teresa Monti, Politecnico di Torino, Italy
 Seung Ki Moon, Nanyang Technological University, Singapore
 Hosana Cristina Morales Ornelas, Delft University of Technology, Netherlands
 Federico Morosi, Politecnico di Milano, Italy
 Niels Henrik Mortensen, Technical University of Denmark, Denmark
 Markus Mörtl, Technical University of Munich, Germany
 Damien Motte, Lund University, Sweden
 Krestine Mougaard, Technical University of Denmark, Denmark
 Elena Mulet, Universitat Jaume I, Spain
 Tamotsu Murakami, University of Tokyo, Japan
 Alexander R. Murphy, Florida Polytechnic University, United States
 Ester Rachele Mussari, Alma Mater Università di Bologna, Italy
 Ponaravind Muthaiah, S-E-A, United States
 Yakhoub Ndiaye, University of Arkansas, United States
 Oscar Nespoli, University of Waterloo, Canada
 Yutaka Nomaguchi, Osaka University, Japan
 Axel Nordin, Lund University, Sweden
 Margareta Norell Bergendahl, KTH Royal Institute of Technology, Sweden
 Christian Chijioke Obieke, Queen's University Belfast, United Kingdom
 Elin Olander, Lund University, Sweden
 Prasad Onkar, Indian Institute of Technology Hyderabad, India
 Ciarán J O'Reilly, KTH Royal Institute of Technology, Sweden
 Kevin Otto, The University of Melbourne, Australia
 Stig Ottosson, Norwegian University of Science and Technology, Sweden

Lukas Paehler, Karlsruhe Institute of Technology (KIT), Germany
 Kristin Paetzold, TU Dresden, Germany
 Massimo Panarotto, Politecnico di Milano, Italy
 Neven Pavkovic, University of Zagreb, Croatia
 Nicolas Perry, Arts et Metiers - I2M, France
 Jean-François Petiot, Ecole Centrale de Nantes, France
 Vrushank Phadnis, Google LLC, United States
 Daniela Pigosso, Technical University of Denmark, Denmark
 Romain Pinquié, Grenoble INP, France
 Benedikt Plaumann, HAW Hamburg, Germany
 Olivier Potier, CNRS, France
 Rohan Prabhu, Lafayette College, United States
 Patrick Pradel, Loughborough University, United Kingdom
 Raghu Vasu Prakash, Indian Institute of Technology Madras, India
 Bastian Quattelbaum, HS Niederrhein University, Germany
 Charlie Ranscombe, Swinburne University of Technology, Australia
 Poul Martin Ravn, 3Shape A/S, Denmark
 Francisco Regateiro, Instituto Superior Técnico / Universidade de Lisboa, Portugal
 Yoram Reich, Tel Aviv University, Israel
 Allan Edward Watson Rennie, Lancaster University, United Kingdom
 Oskar Rexfelt, Chalmers, Sweden
 Caterina Rizzi, University of Bergamo, Italy
 Vincent Robin, University of Bordeaux, France
 Antony John Robotham, University of Plymouth, United Kingdom
 Daniel Roth, University of Stuttgart, Germany
 Martin Roth, Chalmers University of Technology, Sweden
 Federico Rotini, University of Florence, Italy
 Marta Royo, Universitat Jaume I, Spain
 Roham Sadeghi Tabar, Chalmers University of Technology, Sweden
 Kristina Säfsten, School of Engineering, Jönköping University, Sweden
 Tomohiko Sakao, Linköping University, Sweden
 Vahid Salehi, Munich University of Applied Sciences, Germany
 Chloe Salembier, INRAE, France
 Filippo Salustri, Toronto Metropolitan University, Canada
 Olga Sankowski, Hamburg University of Technology, Germany
 Prabir Sarkar, Indian Institute of Technology Ropar, India
 Ricardo Marques Sastre, Federal University of Rio Grande do Sul, Brazil
 Michael Schabacker, Otto-von-Guericke University Magdeburg, Germany
 Benjamin Schleich, Technical University of Darmstadt, Germany
 Sven-Olaf Schulze, LEIxCN / INCOSE, Germany
 Warren Seering, Massachusetts Institute of Technology, United States
 Bahar Şener, Middle East Technical University, Türkiye
 Andi Setiawan, Universitas Sebelas Maret, Indonesia
 Zhenghui Sha, The University of Texas at Austin, United States
 Sara Shafiee, Technical University of Denmark (DTU), Denmark
 Sanjiv Sharma, Imperial College, United Kingdom
 Jinjuan She, Miami University, United States
 Tripp Shealy, Virginia Tech, United States
 Arlindo Silva, Singapore University of Technology and Design, Singapore
 Ravindra Singh, Delhi Technological University, India
 Vishal Singh, Indian Institute of Science, India
 Stanko Škec, University of Zagreb, Croatia
 Chris Snider, University of Bristol, United Kingdom
 Ricardo Sosa, The University of Sydney, Australia
 Julie Stal-Le Cardinal, CentraleSupélec, Université Paris-Saclay, France

Tino Stankovic, ETH Zurich, Switzerland
 Rainer Stark, Technische Universität Berlin, Germany
 Carsten Stechert, Ostfalia University of Applied Sciences, Germany
 Torjus Lines Steffensen, Norwegian University of Science and Technology, Norway
 Martin Steinert, Norwegian University of Science and Technology, Norway
 Ralf Stetter, University of Applied Sciences Ravensburg-Weingarten, Germany
 Milan Stevanovic, Markot.tel. Ltd., Croatia
 Roland Stolt, Jönköping University, Sweden
 Mario Storga, University of Zagreb, Faculty of Mechanical Engineering and Naval Architecture, Croatia
 Helena Strömberg, Chalmers University of Technology, Sweden
 Kostas Styliadis, Chalmers University of Technology, Sweden
 Eswaran Subrahmanian, Carnegie Mellon University, United States
 Eun Suk Suh, Seoul National University, South Korea
 Alexandre Sukhov, Karlstad University, Sweden
 Brendan Sullivan, Politecnico di Milano, Italy
 Joshua Summers, University of Texas at Dallas, United States
 Erik Sundin, Linköping University, Sweden
 Sagar Suresh Kumar, University of Strathclyde, United Kingdom
 Mathias Szpirglas, Université Gustave Eiffel, France
 Khadija Tahera, The Open University, United Kingdom
 Linus Tan, Swinburne University of Technology, Australia
 James Ah Kat Tan, Ngee Ann Polytechnic, Singapore
 Yuki Taoka, Tokyo Institute of Technology, Japan
 Joze Tavcar, Lund University, Sweden
 Klaus-Dieter Thoben, University of Bremen, Germany
 Virginia Tiradentes Souto, University of Brasilia, Brazil
 Carl Nils Konrad Toller Melén, Blekinge Institute of Technology, Sweden
 Tetsuo Tomiyama, International Professional University of Technology in Tokyo, Japan
 Peter Törlind, Luleå University of Technology, Sweden
 George Edward Torrens, Loughborough University, United Kingdom
 Jakob Trauer, :em engineering methods AG, Germany
 Yusuke Tsutsui, Okayama Prefectural University, Japan
 Gregory-Jamie Tüzün, University of Stuttgart, Germany
 Barbara Tversky, Stanford University, United States
 Sharifu Ura, Kitami Institute of Technology, Japan
 Lewis William Robert Urquhart, University of Strathclyde, United Kingdom
 Svetlana Usenyuk-Kravchuk, Arctic Design School, Kyrgyzstan
 Andres Felipe Valderrama Pineda, Aalborg University, Denmark
 Filip Valjak, University of Zagreb, Faculty of Architecture, Croatia
 Flore Vallet, CentraleSupélec-Université Paris-Saclay, France
 Wilhelm Frederik van der Vegte, Delft University of Technology, Netherlands
 Tom Henricus Jozef Vaneker, University of Twente, Netherlands
 Sudhir Varadarajan, Indian Institute of Information Technology, Design and Manufacturing,
 Kancheepuram, India
 Noe Vargas Hernandez, UTRGV, United States
 Srinivasan Venkataraman, Indian Institute of Technology Delhi, India
 Enrico Vezzetti, Politecnico di Torino, Italy
 Sonia Liliana da Silva Vieira, Alasala College of Architecture and Design, Saudi Arabia
 Michael Vielhaber, Saarland University, Germany
 Thomas Vietor, Technische Universität Braunschweig, Germany
 Harald Voelkl, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
 Nikola Vukašinić, University of Ljubljana, Faculty of Mechanical Engineering, Slovenia
 Manika Walia, School of Design and Creative Arts, Vedatya, India
 Johan Wall, Blekinge Institute of Technology, Sweden

Pontus Wallgren, Chalmers, Sweden
 Yan Wang, Georgia Institute of Technology, United States
 Yue Wang, The Education University of Hong Kong, Hong Kong
 Anders Warell Warell, Lund University, Sweden
 Sandro Wartzack, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
 Matilda Watz, Blekinge Tekniska Högskola, Sweden
 Christian Weber, Technische Universität Ilmenau, Germany
 Benoit Weil, MINES Paris PSL Research, France
 Philipp Weissgraeber, University of Rostock, Germany
 Robert Wendrich, Rawshaping Technology RBSO, Netherlands
 Renee Wever, Linköping University, Sweden
 Ian Whitfield, University of Strathclyde, United Kingdom
 Paul Martin Winkelman, The University of British Columbia, Canada
 Andrew James Wodehouse, University of Strathclyde, United Kingdom
 Kristin Wood, CU Denver, United States
 David Wynn, University of Auckland, New Zealand
 Hideyoshi Yanagisawa, The University of Tokyo, Japan
 Bernard Yannou, CentraleSupélec, Université Paris-Saclay, France
 Ali Yassine, Stevens Institute of Technology, United States
 Unal Yildirim, University of Leicester, United Kingdom
 Shahrman Zainal Abidin, Universiti Teknologi MARA, Malaysia
 Wim Zeiler, TU Eindhoven, Netherlands
 Yong Zeng, Concordia University, Canada
 Dragan Zezelj, University of Zagreb, Croatia
 Yan Zhang, BTH, China
 Wendy Zhang, University of Canterbury, New Zealand
 Zai Fang Zhang, Shanghai University, China
 Markus Zimmermann, Technische Universität München, Germany
 Francesco Zirpoli, Università Ca' Foscari Venezia, Italy
 Stefan Zorn, University of Rostock, Germany

INTERNATIONAL CONFERENCE ON ENGINEERING DESIGN, ICED25

11-14 AUGUST 2025, DALLAS, TX

TABLE OF CONTENTS

A community-driven database for the dynamic representation of approaches, processes, methods, and tools for multidisciplinary product development Bilal, M., Eynard B., Guérineau, J.	pp. 1 - 10
A comparative analysis of synchronous and asynchronous computer-supported collaborative design Maxwell, H., Brisco, R.	pp. 11 - 20
A compass to navigate the multiple dimensions of prototyping Lomba., R., Herman, B., Raucent, B.	pp. 21 - 30
A configurable dynamometer to evaluate vehicle and battery performance of micromobility devices Muthaiah, P., Zagorski, S., Kress, A., Bartholomew, M., Helber, N., Andreatta, D., Heydinger, G.	pp. 31 - 40
A data-driven framework for engineering design research: combining virtual and physical testing Liewerenz, O., Becker, A., Hemmerich, J., Wittig, C., Grauberger, P., Matthiesen, S.	pp. 41 - 50
A dual DfAM worksheet to assess design opportunities and restrictions in additive manufacturing Tüzün., G. J., Kreimeyer, M.	pp. 51 - 60
A dual perspective on validation during early development projects - insights from literature and industry Schwarz, S. E., Weiß, S., Spekker, M. W., Albers, A.	pp. 61 - 70
A framework for analyzing goal alignment and social relevance of research papers to identify impact of women in design research communities Parkinson, B., Kiani, G. F., Frecker, M., Toh, C.	pp. 71 - 80
A framework for the continuous simulation of the manufacturing and assembly process of composites considering fiber angle variations Freitag, S., Goetz, S., Wartzack, S.	pp. 81 - 90
A framework of AI collaboration in engineering design (AICED) Obieke, C. C., Bridgeman, J., Han, J.	pp. 91 - 100
A Game-Theoretic Research Platform for Team-based Design Decisions under Competition Li, X., Chen, S., Bayrak, A. E., Sha, Z.	pp. 101 - 110
A generic framework for the collaborative and creative generation of lightweight and sustainable products König, K., Zeidler, S., Kößler, F., Fleischer, J., Vielhaber, M.	pp. 111 - 120
A graph-theoretic approach for assessing the alignment of circular economy principles with integrated product development and supply chain design Darmian, S. M., Sgarbossa, F., Welo, T.	pp. 121 - 130
A hypothesis-based method for building specific design knowledge for robust design Li, J., Luening, J., Grauberger, P., Matthiesen, S.	pp. 131 - 140

A knowledge framework of environment reconstruction methods for mixed reality prototype applications Kukreja, A., Trombini, M., Cox, C., Snider, C.	pp. 141 - 150
A machine learning algorithm to predict changes in the upper airway during mouth opening to support the design of a video laryngoscope blade Mourya, H., Dhariwal, J., Mukherjee, K., Gupta, N.	pp. 151 - 158
A machine learning approach towards automated classification of modal analysis results Köring, T., Gerhard, D., Neges, M., Seddik, F., Kömm, L., Paetzold-Byhain, K.	pp. 159 - 168
A maturity based data management integration in engineering research projects Wawer, M. L., Mueller, L., Khaled, J. B., Stauß, T., Wurst, J., Mozgova, I., Lachmayer, R.	pp. 169 - 178
A mixed-method approach in ergonomic analysis utilising personalised data dashboards Ormerod, I., Shortt, N., Fraser, M., Snider, C.	pp. 179 - 188
A motion-based taxonomy for lattice structures in additive manufacturing: geometry-driven classification for dynamic deformation Air, A., Wodehouse, A.	pp. 189 - 198
A new approach to ontological harmonisation in design Harrison, N. A. W., Whitfield, R. I., Powell, A., Holliman, A. F.	pp. 199 - 208
A new design method to account for interlaminar stresses in laminated composites using machine learning Gadinger, M., Deutschmann, T., Krause, D., Wartzack, S.	pp. 209 - 218
A practical use case and IRR based validation of concept maps coding scheme Kumar, P., Summers, J.	pp. 219 - 228
A procedure model to manage requirements for topology optimization and additive manufacturing Soika, J., Endress, F., Schenk, J., Zimmermann, M.	pp. 229 - 238
A product transformation approach to exploit existing production assets applied to the automotive supplier industry Zapfe, L., Hohnbaum, K., Mörtl, M., Zimmermann, M.	pp. 239 - 248
A Quantitative Analysis of Rational Decisions Under Uncertainty in Engineering Systems Design Mutlu, K., Javadpour, N., Sha, Z., Emrah Bayrak, A.	pp. 249 - 258
A scalable framework for demand-oriented model-based systems engineering application: the MBSE Cube Kizgin, U. V., Vietor, T.	pp. 259 - 268
A study on representation of services using the SAPPHIRE model of causality Bhattacharya, K., Chakrabarti, A.	pp. 269 - 278
A systematic approach to deriving links between product models in engineering design research Paehler, L., Li, J., Matthiesen, S.	pp. 279 - 288
A systematic description of twinning levels of measured data and models in digital twins Schulte, S. N., Grunenwald, C. P., Schulze, P., Breiten, T., Stark, R.	pp. 289 - 298
A systematic literature review on emerging technology risks in Industry 4.0/5.0: identification, clustering and developing mitigation strategies Fuchs, D., Kuys, B., Eisenbart, B., Gericke, K.	pp. 299 - 308
A team of three: the role of generative AI in the development of design automation systems for complex products Gomez, A. P., Kretzschmar, M., Paetzold-Byhain, K., Isaksson, O.	pp. 309 - 318
Abilities of design professors to distinguish design assignments generated by students and AI Yin, Y., Wang, B., Zuo, H., Liu, R., Vohra, S. I., Haydon-Rowe, S., Childs, P. R. N.	pp. 319 - 328

Adapting the engineering design process to develop a business model for service-oriented living labs: a case study of PISCES Majumder, A., Fahriss, T. R., Gerassimidou, S., Yudoko, G., Jobling, S., Iacovidou, E., Singh, V., Chakrabarti, A.	pp. 329 - 338
Advancing in-process innovation metrics: a framework for navigating uncertainty Marion, T., Fixson, S.	pp. 339 - 348
Advancing prosthesis design: ontology driven multi-disciplinary framework for evolving amputee needs Patiniott, N., Borg, J. C., Farrugia, P., Casha, O., Gatt, A., Mercieca, A.	pp. 349 - 358
Advancing systems engineering with artificial intelligence: a review on the future potential, challenges and pathways Poulsen, V. V., Guertler, M., Eisenbart, B., Sick, N.	pp. 359 - 368
Advancing technology readiness level of sustainable food preservation technology through experimental design - increasing food shelf life by dissolving CO ₂ Øvrebø, H. H., Esmailian, S., Lerfall, J., Steinert, M., Olsen, A.	pp. 369 - 378
Affordance-based design strategies to support well-being: a case study of university of transportation Wilburn, O. M., Oswald, M., Rucker II, R., Mabey, C. S., Burleson, G.	pp. 379 - 388
Agile design process for additive manufacturing, an exploratory study Pisanu, A., Kleine, K., Sommer, A. F.	pp. 389 - 398
Agile performance measurement - an impact model to describe improvements in design processes Müller, J., Mehwald, N. L., Klitzing, S. v., Düser, T., Albers, A.	pp. 399 - 408
AI as an element to overcome creative fixation in design teams Sattele, V., Ortiz, J. C.	pp. 409 - 418
AI at the Fuzzy Front End - creative iteration in design Burgess, J., Ward, A., McLening, C., Cutler, J.	pp. 419 - 428
AI vs. human: exploring the potential of generative AI as a feedback tool to support ideation in design education Schmitt-Fumian, T. K., Tauscher, S., Thoring, K.	pp. 429 - 438
AI-augmented systems engineering: conceptual application of retrieval-augmented generation for model-based systems engineering graph Hanke, F., Bitá, I. M., Heißen, O. v., Julian, W., Aschot, H., Roman, D.	pp. 439 - 448
AI-Based Management and Generation Of Non-Functional Requirements in Vehicle Development and Integration Bazzal, M., Lungu, A., Kruse, B., Bernijazov, R., Dumitrescu, R.	pp. 449 - 458
AI-driven feedback for improving teamwork and learning in collaborative engineering design Farshad, S., Fortin, C.	pp. 459 - 467
AI-led design innovation: understanding design-centric AI methods and assistance types Lee, B., Kim, J.	pp. 469 - 478
AI-powered inventive design: idea funnelling, concept creation, and hybrid problem-solving teams Livotov, P., Mas'udah, M.	pp. 479 - 488
An approach for continuous monitoring of product properties between strategic foresight and the product engineering process Thümmel, C., Ebi, S., Schlegel, M., Siebe, A., Düser, T., Albers, A.	pp. 489 - 498
An attempt to estimate the creative state during co-creation by using a hidden Markov model Shoji, K., Sawai, K., Motomura, Y., Matsumae, A.	pp. 499 - 508
An examination of system clustering behavior: influence of product identification Murphy, A. R., Patel, A. R.	pp. 509 - 518

An exploration into identifying assumption-making: pilot study and early insights Kashyap, K., Singh, V.	pp. 519 - 528
An innovative quality function deployment approach to manage design requirements in a team design Danis, A., Rath, M., Kumar, V. N., Roshandeivendra, D., Saklecha, S. N., Sharma, I., Winkle, C., Thayyil, N., Abdoli, S.	pp. 529 - 539
An integrative perspective on digital technologies and circular economy: a systematic literature review Scholtysik, M., Rasor, A., Petzke, L., Koldewey, C., Dumitrescu, R.	pp. 541 - 550
An ontology-based framework for reusing decisions in product development processes Pickel, J., Goetz, S., Wartack, S.	pp. 551 - 560
Analysing designer-GenAI interactions: characterizing designers' behaviours during inspiration and ideation Ranscombe, C., Tan, L., Gopsill, J.	pp. 561 - 570
Analysing influences on design space exploration: insights from testing a new study design Yamashita, K., Zorn, S., Schabacker, M., Kokoschko, B., Gericke, K.	pp. 571 - 580
Analyzing organizational capability using the TASKS framework Yang, J., Cao, H., Wang, X., Zeng, Y.	pp. 581 - 589
Application of Scenario Technique Analysis for Anticipating Future Impacts of Service Robots Grahle, A., Gupta, A., Kelesoglu, P., Göhlich, D.	pp. 591 - 600
Approach for a shape decomposition process to reduce material waste of structural sheet metal components Kömm, L., Paetzold-Byhain, K.	pp. 601 - 610
Approach for investigation of CFRP tribological stressed interfaces through levels of abstraction Bischof, F. D., Inselmann, P., Krause, D.	pp. 611 - 620
Artificial creativity in design: a theory-based framework for implementation Zhu, Q., Luo, J.	pp. 621 - 630
Artificial intelligence (AI) in the design process – a review and analysis on generative AI perspectives Choudhury, M. M., Eisenbart, B., Kuys, B.	pp. 631 - 640
Artificial Intelligence in engineering design: an industry perspective Edgecomb, I. M., Brisco, R., Gunn, K., Holliman, A. F.	pp. 641 - 650
Assessing competencies in engineering design education with an automatically evaluable digital exam format Kossack, F., Uttich, E., Bender, B.	pp. 651 - 660
Assessing the engineering design costs to meet environmental regulations: the case of packaging Deshoulières, M., Cogez, H., Le Masson, P., Weil, B.	pp. 661 - 670
Augmented design automation: leveraging parametric designs using large language models Schöfer, F., Seibel, A.	pp. 671 - 680
Automatic generation of product architectures with application to prototyping in mechatronics Amm, J. M. M., Zimmermann, M.	pp. 681 - 690
Automating the assessment of CAD drawings and solid models Nobes, D. S.	pp. 691 - 700
Balancing safety and sustainability: quality assurance in re-sterilization of single-use medical devices Dhondt, K., Bois, E. D., Watts, R.	pp. 701 - 710

Behaviour change design for reducing plastic usage by perceived similarity nudge Ehkirch, Q., Raharja, F., Samaranayake, U., Sawai, K., Matsumae, A.	pp. 711 - 720
Beyond 3D tic-tac-toe: from O to ball and X to boX Rajath, S., Thomas, J., Bagewadi, M., Singh, V.	pp. 721 - 730
Beyond human perception: designing nonhuman material affordances for ecological reintegration de Urquijo Isoard, J., Grover, S., Cotsaftis, O.	pp. 731 - 739
Bio-inspired vision intelligence in the middle school curriculum: a capstone design project Pidaparti, R., Jayasuriya, S.	pp. 741 - 749
Brain-derived neural networks distinguish design representations in different media Colombo, S., Kim, N., Gero, J.	pp. 751 - 760
Bridging design, engineering, and medicine: lessons from the WeBreath development process Usta, C., Aktaş, İ., Şener, B., Yılmaz, A. O.	pp. 761 - 769
Bridging disciplines: an analysis of collaboration and communication in technical drawings based on geometrical product specifications (GPS) Sersch, A., Hamadamin, M., Gust, P.	pp. 771 - 779
Bridging the gap in engineering creativity evaluations: exploring novice eye-gaze behavior across design modalities Ka, D., Motamedi, S., Ahmed, F., Tehranchi, F., Miller, S.	pp. 781 - 790
Bridging the gap: streamlining life cycle assessment for practical application in product development Rosa Selhorst, R. d., Silva, A.	pp. 791 - 801
Bridging the gap: the role of designer's awareness in co-design with people with lived experience Van Dyck, H., Brosens, L., Selçuk, M. Ö., Ostuzzi, F., Vaes, K.	pp. 803 - 810
Bridging theory and practice in software design management: insights from practitioners Johnson, J., Hurst, A., Safayeni, F.	pp. 811 - 820
"Build Back Better" for war-torn Ukraine: dual strategies for integrating circularity in post-disaster recovery Shevchenko, T., Yannou, B., Saidani, M.	pp. 821 - 830
CAD in Virtual Reality: Integration of Solid Modeling in Standalone VR Application Prinz, A., Lee, K. Y., Gupta, A., Park, S., Göhlich, D.	pp. 831 - 840
Can AI estimate product impressions? Comparison of consumers', designers', and AI model's ratings of car wheels Yamaguchi, T., Ichikawa, H., Sakai, H.	pp. 841 - 850
Can I catch up later? Design of personalized intervention for online learning using eye-tracking-based video reconstruction and replay Li, C., Liao, T.	pp. 851 - 860
Can large language models support machine learning implementation in product development? A comparative analysis and perspectives Sonntag, S., Luttmer, J., Nagarajah, A.	pp. 861 - 870
Case study: is there a space for TRIZ in the era of ChatGPT? Čok, V., Samsa, L., Brojan, M., Tavčar, J., Vukašinović, N.	pp. 871 - 880
Challenges and opportunities in the integration of generative AI with computer-aided design Berger, E., Dammann, M. P., Mehlstäubl, J., Saske, B., Braun, F., Paetzold-Byhain, K.	pp. 881 - 890
Challenges experienced by disabled people when traveling on and interacting with an autonomous bus Faig, J., Tüzün, G. J., Roth, D., Kreimeyer, M.	pp. 891 - 900

Challenges in addressing sustainability within product development Zumach, K., Wehrend, S., Krause, D.	pp. 901 - 910
Challenging dating and gender stereotypes in Indian digital advertising: a semiotic analysis Akanksha, A., Kalita, P.	pp. 911 - 920
ChAx: a RAG-based chatbot for CAx education Steininger, S., Kezer, S., Rief, J., Spicker, E., Preis, S., Fottner, J.	pp. 921 - 930
Circular product design: a literature-based identification of challenges from the perspective of product designers Jagnow, J., Stoehr, B., Bernijazov, R., Koldewey, C., Dumitrescu, R.	pp. 931 - 940
Clinical diagnosis is complex, but why? Identifying factors contributing to diagnostic complexity of infectious diseases in emergency medicine Dey, S., Joshi, S., Mishra, P. R., Khadilkar, P.	pp. 941 - 949
Co-creating a justice-centered product design specifications tool Das, M., Estrada, T., Atwood, S., Yang, M. C., Breazeal, C., D'Ignazio, C., Ostrowski, A. K.	pp. 951 - 960
Codesign and AI: AI-assisted clustering of perception patterns of seniors on ageing and technology in Singapore Siew, W., Silva, A., Lee, B., Wee, K., Mok, J., Lua, J., Rai, B.	pp. 961 - 970
Co-intelligence in design: the importance of trust in artificial intelligence Lelli, C., Chiarello, F., Giordano, V.	pp. 971 - 980
Comparative Analysis of Conformal Prediction: Split, Full, and Adaptive Approaches for Statistical and Neural Network Models Zong, Y., Xu, Y.	pp. 981 - 990
Comparing physical and virtual reality product models in industrial design education Pratt, K., Palacios-Ibáñez, A., Bartlett, K.	pp. 991 - 1000
Component classification for modularization of passenger vehicles for enabling lifetime extension within a circular economy Hasenkrug, J., Peters, S.	pp. 1001 - 1010
Computational analysis of overhang surface roughness effects on self-supporting channels Seidler, A., Holtzhausen, S., Paetzold-Byhain, K.	pp. 1011 - 1020
Consideration of values in design methodologies for value-driven design Persehais, A., Gidel, T., Fayemi, P.-E.	pp. 1021 - 1030
Consumer electronic redesign for automated disassembly using general-purpose robots Akkawi, M., Talami, F., Romero, M., Modugno, V., Jiang, P., Gaz, C.	pp. 1031 - 1040
Crafting the 'dream' design brief: smells like team spirit Acharya, S., Rao, M. N.	pp. 1041 - 1050
Creating design catalog from patent documents with large language model for design concept generation Nomaguchi, Y., Kuroishi, K., Syamimi, A., Tanaka, D., Okamoto, K., Fujita, K.	pp. 1051 - 1060
Current challenges in the development of products for additive manufacturing - an interview study Günther, F. J., Tüzün, G. J., Kreimeyer, M., Koch, A.	pp. 1061 - 1070
Customer engagement, digitalization, and business performance: a model for digital startups Zacharias, I. S., de Sousa Mendes, G. H., da Costa Fernandes, S., Seles, B. M. R. P., Lizarelli, F. L., Carvalho, M. M., Mascarenhas, J.	pp. 1071 - 1080
Data-driven decision support in the design and controlling of systems engineering transformation: a maturity model Graessler, I., Grewe, B., Felgen, L.	pp. 1081 - 1090

Data-driven design: predicting functional attributes in early-stage automotive engineering Rahn, M., Göhlich, D., Fay, T.-A., van Ho, K.	pp. 1091 - 1099
Data-driven simulation method for strategic decision-making in circular economy business design Tsurusaki, Y., Hwangbo, Y., Matsushima, S., Kimita, K.	pp. 1101 - 1110
Data-driven system modelling in the system generation engineering Wagenmann, S., Krause, A., Weidinger, F., Bursac, N., Albers, A.	pp. 1111 - 1120
Decoding the grammar of design theory for large language models: the case of axiomatic design theory Giordano, V., Consoloni, M., Losanno, M., Chiarello, F., Fantoni, G.	pp. 1121 - 1130
Defining technical creativity: iterative development of a shared understanding Albers, A., Bastian, A., Düser, T., Voelk, T. A., Kuebler, M.	pp. 1131 - 1140
Design and mechanics of 3D printed synthetic organ tubules for biomedical applications Tomori, M., Egan, P. F.	pp. 1141 - 1151
Design exhibitions as spaces for controlled experiments Dreyer, S., McTeague, C., Liu, S., Thoring, K.	pp. 1153 - 1163
Design for circularity: applications and implications for a factory in space Abdulhamid, F., Sullivan, B. P., Terzi, S.	pp. 1165 - 1174
Design framework for circular and sustainable packaging design Pathan, R. K., Aurisicchio, M.	pp. 1175 - 1184
Design logic visualizations as boundary objects in design Knight, A., White, L. M., Rask, J., Bond, K., Frankforter, E., Bowes, A., Miller, A., Stancliff, M., Fuller, D., Logan, M., Brubaker, E. R.	pp. 1185 - 1194
Design of a framework for categorizing and describing use cases for data-driven model-based systems engineering Tissen, D., Tiggemann, B., Bernijazov, R., Dumitrescu, R.	pp. 1195 - 1204
Design of a lightweight skateboard truck: a framework for optimizing sports equipment under real conditions Pfister, F., Bartz, M., Wartzack, S.	pp. 1205 - 1214
Design of a personalised electrode sleeve for differentiation of finger muscle activity in sEMG biofeedback therapy Sure, C., Selkmann, S., Kossack, F., Neumann, M., Bender, B.	pp. 1215 - 1224
Design of a Reconfigurable Crawler based on Waterbomb Origami Kong, L., Zhao, Y. F.	pp. 1225 - 1234
Design of a wireless sensor network for load and deformation reconstruction for technical inheritance of gentelligent structural components Meyer zu Westerhausen, S., Haußmann, S., Stauß, T., Wawer, M. L., Wurst, J., Lachmayer, R.	pp. 1235 - 1244
Design of boundary objects to improve communication in pediatric care Barbazi, N., Shin, J. Y., Hiremath, G., El-Bokl, A., Lauff, C. A.	pp. 1245 - 1254
Design of internal structures to enhance the thermal performance of additively manufactured heat exchangers Meyer, I., Kahlfeld, R., Messmann, C. O., Oel, M., Stauss, T., Kabelac, S., Lachmayer, R.	pp. 1255 - 1264
Design opportunities for daily emotion regulation to enhance young adults' emotional well-being Cha, J., Kim, C.	pp. 1265 - 1274
Design research approaches from the perspective of philosophy of technology Xu, J., Jiang, Z., Xu, J.	pp. 1275 - 1284

Design tool for topology and particle damping optimization of additively manufactured parts Oel, M., Roeder, A., Meyer, I., Lachmayer, R.	pp. 1285 - 1294
Design-for-decarbonization: a framework for decarbonizing cyber-physical production systems at the design stage Schreiner, N., Cowen, A., Volling, T., Dumitrescu, R.	pp. 1295 - 1304
Designing a compatibility evaluation framework for integration of 3PL warehouse clients in warehouse systems: an action design research study in a Danish 3PL company Nielsen, F. H., Hermann, A. S., Mortensen, N. H.	pp. 1305 - 1314
Designing a method-testbed for planning upgradeable mechatronic systems - an interview study Kuebler, M., Gruetzner, J. L., Düser, T., Albers, A.	pp. 1315 - 1324
Designing an Embodiment - a design methodology perspective Eifler, T., Andreasen, M. M.	pp. 1325 - 1334
Designing for Machine Longevity - A Literature Survey Rice, S. E., Sannar, B. C., Mattson, C. A., Anderson, M. L.	pp. 1335 - 1344
Designing user-oriented wearables: integration of a thermoelectric module into a motorcycle protective jacket regarding aspects of functionality, perceived safety, and usability Riedel, J., Luccarelli, M., Klippel, A.	pp. 1345 - 1354
Development and evaluation of the documentation templates to support the design thinking process Bhatt, A. N., Chakrabarti, A.	pp. 1355 - 1364
Development of a communication model for the efficient exchange of information between user and designer Paetzold, K., Stoiber, L.	pp. 1365 - 1374
Development of an intelligent tutoring system for design education: personalised learning support in engineering Becker, C., Hoppe, L. V., Plappert, S., Herrmann, K., Gembarski, P. C., Lachmayer, R.	pp. 1375 - 1384
Digital engineering transformation for sustainability: an approach to systematically integrate sustainability data in engineering processes Wyrwich, F., Könemann, U., Tissen, D., Bohnenkamp, T., Hovemann, A., Dumitrescu, R.	pp. 1385 - 1394
Driving circularity—An approach to identify potentials for circular design of automotive electronics Peitzmeier, H., Tebruegge, C., Bouattour, G., Seibel, A.	pp. 1395 - 1404
Dynamic eye-tracking on large screens: a 3D printed adjustable guide rail platform Acharya, S., He, L., Tehranchi, F.	pp. 1405 - 1414
Early engagement in co-designing mixed reality assembly instructions in manufacturing industry Strineholm, A., Von Axelson, J., Köping Olsson, B., Erlands, N.	pp. 1415 - 1424
Effective management support for design: towards a model of managerial competence Stoehr, B., Koldewey, C., Bernijazov, R., Dumitrescu, R.	pp. 1425 - 1434
Effective system-of-systems simulation in a VUCA world: lessons learned for design decision-makers Toller Melén, C. N. K., Bertoni, M., Johansson Askling, C.	pp. 1435 - 1444
Effects of new ways of working in product development - a systematic evaluation in an engineering simulator Ritzer, K., Mithani, R., Bursac, N.	pp. 1445 - 1453
Efficient product portfolio optimization with SAT-based association rule mining using Apriori algorithm Schmidt, T., Marbach, S., Mantwill, F.	pp. 1455 - 1464

Emotional interactivity of products: a literature review Pandey, A., Vaidya, G. V.	pp. 1465 - 1473
Emotional responses to the design of multisensory interior spaces McTeague, C., Dreyer, S., Liu, S., Kizilkaya, A., Thoring, K.	pp. 1475 - 1484
Employing network analysis to identify research topic evolution Xiao, S., McAdams, D. A.	pp. 1485 - 1494
Enabling data-driven design by deriving consumer appliance use from household energy data Morris, N., Gopsill, J., Eikevåg, S., Valero, M., Hicks, B.	pp. 1495 - 1503
Engineering-based DfA approach for automation-compatible design of hydrogen electrolyzer stacks Yorgun, I., Müller, S., Lamers, L., Kuhlenkötter, B., Lemmerz, K., Westermann, A.	pp. 1505 - 1514
Enhancing computer-aided design with deep learning frameworks: a literature review Steininger, S., Zhao, J., Fottner, J.,	pp. 1515 - 1524
Enhancing end-of-life sustainability through modularity and interface design in product development Inselmann, P., Deutschmann, T., Krause, D.	pp. 1525 - 1534
Enhancing knowledge transfer through LLM-based applications: a preliminary study Schlegel, A. P., Koch, A.	pp. 1535 - 1544
Enhancing numerical simulation analysis with the use of explainable artificial intelligence and large language models: a case study on vehicle side crash optimization Mathieu, J., Kronwitter, S., Pfahler, J., Di Roberto, M., Vielhaber, M.	pp. 1545 - 1554
Enhancing product design with digital twins: framework and application in an industry case study Stauss, T., Wolniak, P., Tergeist, M., Wurst, J., Lachmayer, R.	pp. 1555 - 1564
Enhancing the process sustainability of metal additive manufacturing: a proposal of design framework applied to filament fusion fabrication with metal injection molding Mrabet, O., Gaha, R., Marteau, J., Eynard, B.	pp. 1565 - 1574
Establishing a practical coding scheme computationally measure concept maps Kumar, P., Summers, J.	pp. 1575 - 1584
Evaluating ChatGPT's role in collaborative CAD task completeness Šklebar, J., Martinec, T., Škec, S., Štorga, M.	pp. 1585 - 1594
Evaluation of self-directed usage of parallel and iterative prototyping strategies by first-year engineering students Sjolund, K., Brito, B., Murphy, A., Linsey, J.	pp. 1595 - 1604
Evaluation of virtual prototypes: literature and empirical findings Jaiswal, S., Srinivasan, V.	pp. 1605 - 1614
Expanding data usage in systems: an empirical study of combined model-based and data-driven development in complex intelligent systems (CoIS) Balachandran, A., Subrahmanian, E.	pp. 1615 - 1624
Exploring decision-making in manufacturing process selection: an interview study Wittig, C., Hemmerich, J., Matthiesen, S.	pp. 1625 - 1634
Exploring design trade-offs among sustainability, performance, and manufacturability when considering integration of new technologies Bonde, J. M., Isaksson, O., Kipourous, T., Kokkolaras, M., Andersson, P.	pp. 1635 - 1644
Exploring differences in design context construction within social innovation collaborative initiatives Cao, T.	pp. 1645 - 1654

Exploring dynamic movement representations in context using generative AI: effects of media types on the evaluation of service robot morphology Ghim, Y. G.	pp. 1655 - 1664
Exploring generative design in context of mass personalization Kosec, P., Huic, I., Martinec, T., Škec, S.	pp. 1665 - 1674
Exploring LLM-based agents for need analysis of knowledge management practice Su, Y., Mirafzal, R., Cardinal, J. S.	pp. 1675 - 1684
Exploring Problem Framing activity using BERTopic Litster, G., Moore, E.	pp. 1685 - 1694
Exploring sustainable consumer behavior: the Circular Behavior Integration Framework (CBIF) Mascarenhas, J., Freitas, D. R., Fernandes, S. d. C.	pp. 1695 - 1703
Exploring the link between students' MBTI personality types and design team performance Hendra, I., Blessing, L. T. M., Silva, A., Ang, R.	pp. 1705 - 1714
Exploring the product carbon footprint through gamification: a learning tool for children Osterod, J. O., Ali, U., Schleich, B.	pp. 1715 - 1724
Exploring the relationship between stakeholder identification and divergent thinking on design teams Campbell, J., Ndiaye, Y., Tull, J.	pp. 1725 - 1732
Exploring the role of aesthetic interaction in controlling music playback and user experience Kim, C., Yoon, J.	pp. 1733 - 1742
Exploring the Role of Human Data in Data-Driven Design Johnson, K., Ahmed-Kristensen, S.	pp. 1743 - 1752
Exploring the role of layer variations in ANN Crowd behaviour and prediction accuracy Adebayo, O., Summers, J.	pp. 1753 - 1762
Exploring the sensory impact in second-hand clothing shopping through visceral, behavioural, and reflective design Das, M., Moons, I., Du Bois, E., Van Rooy, D.	pp. 1763 - 1772
Exploring the use of LLMs to evaluate design creativity Zhang, J., Han, J., Ahmed-Kristensen, S.	pp. 1773 - 1782
Extracting FMEA information from publicly available datasets using large language models Renu, R. S.	pp. 1783 - 1792
Facing the future: trends in development environments that enable engineers to thrive Ritzer, K., Dernbach, F., Kempf, C., Albers, A., Bursac, N.	pp. 1793 - 1802
Finding optimal solution principles in conceptual design Rosenthal, P., Liebert, A., Niggemann, O.	pp. 1803 - 1812
Findings from a field study of prototyping digital engineering workflows in operational settings James, T. M., McGowan, A. M.	pp. 1813 - 1822
First experiences from using CADdrive with digital LEGO for product design and systems engineering education Hackenberg, G., Zehetner, C.	pp. 1823 - 1832
Flexibility evaluation of modules with a focus on interfaces Beibl, J., Küchenhof, J., Berschik, M. C., Krause, D.	pp. 1833 - 1842
Focused competencies in higher education for engineering product development and its different activities Dillenhöfer, F., Kossack, F., Sersch, A., Künne, B., Bender, B., Gust, P.	pp. 1843 - 1852
Food printing design approach for fabricating overhang structures with starch and protein inks Khalil, M. I., Kondabathula, Y. K., Pal, R., Maleky, F., Egan, P. F.	pp. 1853 - 1862

Formulating a decision parameter for implementation of product innovation ideas Chandra, S.	pp. 1863 - 1872
Forward tools to enhance creative performance based on neurobiological foundations and implications: bridging divergent and convergent thinking Kokoschko, B. R., Schabacker, M. K., Wiesner, M. T.	pp. 1873 - 1882
Framework for circular AI-driven model-based systems engineering Mollahassani, D., Becker, M., Eickhoff, T., Pickel, J., Goetz, S., Wartzack, S., Göbel, J. C.	pp. 1883 - 1892
From text to design: a framework to leverage LLM agents for automated CAD generation Schüpbach, A., San Miguel, R., Ferchow, J., Meboldt, M.	pp. 1893 - 1902
From theory to practice: derivation of the application domain card for supporting AI system development Müller, B., Roth, D., Kreimeyer, M.	pp. 1903 - 1912
Functional decomposition of technical products based on large language models and Monte Carlo tree search Haddad, M.-S., Seibel, A.	pp. 1913 - 1922
Function-oriented system design for resilience and sustainability Pulm, U., Stetter, R.	pp. 1923 - 1932
Generating preinventive structures: AI-driven creativity in product repurposing Kwon, E., Goucher-Lambert, K.	pp. 1933 - 1942
Generative AI-powered parametric modeling and BIM for architectural design and visualization Ko, J., Ajibefun, J., Yan, W.	pp. 1943 - 1952
Generative design as a means of effective communication in multidisciplinary teams: a systematic review Esparza, M. M., Blanco M. d. R. M., Sánchez, L. O. S.	pp. 1953 - 1962
Graph-Based Social Impact Diffusion Optimization across a Theoretical Socio-Technical System McKinnon, S. A., Mattson, C. A.	pp. 1963 - 1972
Harnessing digital vs physical design for sustainable behavior strategies: A review Goridkov, N., Goucher-Lambert, K.	pp. 1973 - 1982
How to deal with products in circular economy: an approach to model specific design knowledge illustrated at the example of a circular factory for angle grinders Hemmerich, J., Kirn, A., Walter, G., Wittig, C., Grauberger, P., Matthiesen, S.	pp. 1983 - 1992
How well can we reflect? Examining the quality and content of novice designers' reflections on social identity Brown, E., Prabhu, R.	pp. 1993 - 2002
I cast the drains down in Africa: AM-augmented casting as an enabler for the African manufacturing industry Sulleiman, M., Ahmed, R., Kay, M., Manogharan, G., McComb, C.	pp. 2003 - 2012
Identifying break points in early product family design using an integrated VDD approach Boggs, J. M., Robinson, T. T., Kirkl, F., Price, M.	pp. 2013 - 2022
Identifying measures to improve sustainability using the double diamond: a case study of industrial digital printers Hohnbaum, K., Schröder, P., Fill, A., Mörtl, M., Zimmermann, M.	pp. 2023 - 2032
Identifying the needs for a Requirements Authoring Design Enabler Edwards, S., Adebayo, O., Summers, J.	pp. 2033 - 2042
Identifying the needs of low-income angioplasty patients and caregivers to inform the design of a support platform Sardar, S. R., Jagtap, S., Goswami, P., Karve, J.	pp. 2043 - 2052

Impact of team size on requirement quantity Nonso-Anyakwo, K., Summers, J.	pp. 2053 - 2061
Impact, benefits and challenges of agile development – an explorative study on physical products Siewert, L., Gericke, K., Siller, N., Rusin, J., Göhlich, D.	pp. 2063 - 2072
Improving the quality of data in the World Café method: the crucial role of the table hosts Klatt, A., van Zeeland, E., Henseler, J.	pp. 2073 - 2082
Incorporating contextual factors in back-end design stages: development and pilot testing of the Contextual Product Testing protocol Serrano, C., Burleson, G.	pp. 2083 - 2092
Information management for the digital product passport: a 150% approach Trienens, M., Orłowski, V., Schröder, L., Hovemann, A., Dumitrescu, R.	pp. 2093 - 2100
Innovating products in the humanitarian sector: how to ensure adequate response in a challenging ecosystem Becattini, N., Bossink, B., Cantamessa, M., Ibrahim, W., McManus, P., Nigra, M., Pathiraja, M.	pp. 2101 - 2110
Integrating Life Cycle Assessment in Product Service System Design: Use Case for Robots in Waste Management Gupta, A., Syré, A., Okhovat, R., Göhlich, D.	pp. 2111 - 2120
Integrative and Integrated product and production system development: a taxonomy for managing dependencies and processes Disselkamp, J. P., Seidenberg, T., Westphal, S., Lick, J., Ptock, L., Wyrwich, F., Hovemann, A., Dumitrescu, R.	pp. 2121 - 2130
Interactive machine learning framework enabling affordable and accurate prototyping for supporting decision-making Li, Q., McAdams, D.	pp. 2131 - 2140
Investigating data-driven requirements management for smart PSS development Paliyenko, Y., Simon, C., Roth, D., Kreimeyer, M.	pp. 2141 - 2150
Investigating Engineering Design Tasks - Iterative Testing in Large-Scale Engineering Courses Batora, M., Liewerenz, O., Grauberger, P., Enseroth, N., Wolter, M., Matthiesen, S., Bursac, N.	pp. 2151 - 2160
Investigating relationships between performance and workload in CAD tasks Lukačević, F., Becattini, N., Škec, S.	pp. 2161 - 2170
Investigating support strategies for users in repair activity of household appliances Bhatt, A. N., Inkerman, D., Gericke, K.	pp. 2171 - 2180
Investigating the design-roughness-performance relationship using additive manufacturing design artefacts Obilanade, D., Åkerfeldt, P., Svahn, F., Törlind, P., Kajberg, J.	pp. 2181 - 2190
Key elements to navigate sustainable product development in aerospace Léonard, P. L. Y., Hallstedt, S. I., Isaksson, O., Kipouros, T., Mallalieu, A.	pp. 2191 - 2200
Large language models for combinatorial optimization of design structure matrix Jiang, S., Xie, M., Luo, J.	pp. 2201 - 2210
Leveraging AR/VR technologies to teach industry 5.0 principles to students and practitioners through learning factories Dehbozorgi, M. H., Rossi, M., Sullivan, B. P.	pp. 2211 - 2220
Leveraging GenAI for technology foresight Ellermann, K., Seidenberg, T., Asmar, L., Knepler, J., Dumitrescu, R.	pp. 2221 - 2230
Leveraging generative AI tools for design method support: insights, challenges, and best practices Sankowski, O., Inselmann, P., Krause, D.	pp. 2231 - 2240

Leveraging knowledge graphs in virtual product development for enhanced collaboration Lehmacher, C., Engstler, L., Suchomel, N., Staeves, J., Paetzold-Byhain, K.	pp. 2241 - 2250
Leveraging large language models for enabling design by analogy: a computational framework Joshi, R., Mitra, R., Sahadevan, V., Borg, K., Singh, V., Muhammed, B., Babu Beemaraj, S., Joshi, A.	pp. 2251 - 2260
Lightweight design optimization of an electrified Cross Skate Wartzack, S., Goetz, S., Freitag, S.	pp. 2261 - 2270
Lightweighting using shells: An exploration of generatively designed hollow structures Peckham, O., Mogg-Walls, H., Al Amri, A. A., Hicks, B., Goudswaard, M.	pp. 2271 - 2280
Linguistic effects in background music on creativity using Vocaloid Matsumae, A., Wakabayashi, K., Sawai, K.	pp. 2281 - 2290
Looking around: comparing saccades and fixations among designers with and without ADHD Kimball, R., Prabhu, R.	pp. 2291 - 2300
Making Space for Designers at Hackathons: Uncovering Developer-Designer Tensions in Hackathon Teams Flus, M., Hurst, A.	pp. 2301 - 2310
Managing complexity in smart product systems - the case of nature-based systems Markey, C. L., Ahmed-Kristensen, S.,	pp. 2311 - 2320
Managing design heritage - grandfather rights as a precursor for creative preservation Lakemond, N., Holmberg, G.	pp. 2321 - 2330
Map to safety: longitudinal examination of psychological safety in engineering capstone students Peng, A., Fang, W., Menold, J., Moore, R., Miller, S.	pp. 2331 - 2340
Mapping AI applications in design: support and activities across the product development process Jonuschies, I., Siewert, L., Michaelsen, E., Gericke, K.	pp. 2341 - 2350
Mapping project alignment: a case study of using concept maps to analyse shared understanding in a multi-disciplinary long-term creative practice project Kumar, P., Gowda, A., Cooley, H. R., Summers, J.	pp. 2351 - 2361
Mastering the list of requirements: a demand or a wish? Acharya, S., Venkatesh, K., Prasanna, M., Doshi, D.	pp. 2363 - 2372
Material selection methods: brittleness filter are often too strict Hedvard, M., Jonuschies, I., Eichler, M., Weißgraeber, P.	pp. 2373 - 2380
Meta-level design parameters for bio-inspired impact resistance: a case study in helmet design Velivela, P. T., Letov, N., Fiona Zhao, Y.	pp. 2381 - 2390
Methodological support in sustainable engineering through data-driven design of mechatronic systems Krause, A., Teicht, A., Wagenmann, S., Albers, A., Bursac, N.,	pp. 2391 - 2400
Methodology for consideration of different load cases in the design of a sensor-integrating, gentelligent antenna Galfione, A., Meyer zu Westerhausen, S., Stauß, T., Wawer, M. L., Ameduri, S., Totaro, G., Esposito, M., Lachmayer, R., Gherlone, M.	pp. 2401 - 2410
Methodology for design and additive manufacturing of radiotherapy bolus using 3D scanning: a low-cost alternative Brito Arrieta, M. S., Orellana, M. J. C., Maldonado G, F. A., Amaya-Rivas, J. L., Zambrano, G. A. M., Saldarriaga, C., Hurel, J., Helguero, C. G.	pp. 2411 - 2420
Methodology for transferring topology optimization results into a production- and lightweight-oriented differential design Busch, P., Lorenz, M., Schleicher, P., Bauernhansl, T.	pp. 2421 - 2430

Mindfulness and the unseen: understanding the impact of dark patterns in mindfulness applications Özkürkçü, E., Doğanay, D.	pp. 2431 - 2440
Misunderstand me correctly - comprehensibility in interdisciplinary collaboration Voelk, T. A., Gesmann, L., Götze, S., Feichtinger, K., Schwarz, S. E., Düser, T., Reussner, R., Albers, A.	pp. 2441 - 2450
Model-driven scope 3 upstream (procurement) CO ₂ emission calculation for the design space exploration of maritime vessels Rehman, M. U., Bertoni, A.	pp. 2451 - 2460
Modeling constraint-based manufacturing networks: theory, application and best practices Herrmann, K., Pusch, F., Becker, C., Gembarski, P. C., Lachmayer, R.	pp. 2461 - 2470
Modeling data flows in a complex stakeholder network - a case study on autonomous public transportation Langner, C., Paliyenko, Y., Roth, D., Kreimeyer, M.	pp. 2471 - 2480
Modeling Stochastic Yield Rates in Disassembly Processes for Green Profit Maximization Jiang, Y., Kim, H.	pp. 2481 - 2490
Modeling variability in product line engineering (PLE) for systems engineering (SE) Lameh, J., Dubray, A., Jankovic, M.	pp. 2491 - 2500
Multimodal generative AI for conceptual design: enabling text-based and sketch-based human-AI conversations Baudoux, G., Guo, C., Goucher-Lambert, K.	pp. 2501 - 2510
Museum mobile APP design based on user experience Zhang, Y., Wu, H., Zhong, M., Zhou, X.	pp. 2511 - 2520
Narrative experience design: integrating narrative-driven approaches into service design Hayama, Y.	pp. 2521 - 2530
Navigating viewpoints in MBSE: challenges, potential and pathways for stakeholder participation in industry Förster, F., Koldewey, C., Bernijazov, R., Dumitrescu, R., Bursac, N.	pp. 2531 - 2540
On the potential of the Quality Information Framework (QIF) standard driving the interoperability in variation simulation Roth, M., Goetz, S., Dharmaraj, M. R. R., Wärmefjord, K., Söderberg, R.	pp. 2541 - 2550
Opportunities and challenges of AI in design: a practical study from the manufacturing industry Han, J., Jiang, P., Ahmed-Kristensen, S.	pp. 2551 - 2560
Optimising AI-driven solutions without trade-offs: predicting and preventing potential failures in sustainable innovation Mas'udah, M., Livotov, P., Hartmann, N., Kokoschko, B. R., Xu, W., Nugroho, S., Bhowmick, S., Meral, B.	pp. 2561 - 2570
Paradigmatic design thinking: how generative AI changes the role of human designers Clay, J., Sha, Z.	pp. 2571 - 2579
Personalization for the clinic: a review of spinal fusion cage design Karki, B., Reilly, R., Mena, A., Habib, A. K. M. A., Yang, J., Egan, P. F.	pp. 2581 - 2590
PhylOrg: towards an efficient organizational design method by adapting phylogenetic analysis Bertrand, O., Gardoni, M., Burrows, M., Cardinal, J. S.	pp. 2591 - 2600
Player profile as tool for communities of practice animation Miroite, P., Proulx, G. A., Gardoni, M.	pp. 2601 - 2610
Prepare for the unexpected: design with a non-linear payoff function Panarotto, M., Eckert, C., Cascini, G.	pp. 2611 - 2620

Pre-registering a case study: requirements and narrative alignment in teams Edwards, S. L., Summers, J., Deering, L. R., Ferguson, S.	pp. 2621 - 2630
Principles of positive sum design Gonsher, I., Rutter, W., Krishnaswami, A., Schmidt, R.	pp. 2631 - 2639
Print fidelity assessment for 3D food printed designs using manual and automated approaches Habib, A. K. M. A., Khalil, M. I., Maleky, F., Pal, R., Egan, P. F.	pp. 2641 - 2650
Probabilistic Methods for Evaluating Human and LLMs During Design Problem-Solving Bruggeman, R., Chehade, E. C., Marion, T., Ciuccarelli, P.	pp. 2651 - 2660
Prompt engineering study: comparing pre-service engineers to large language models in requirements generation Edwards, S., Nonso-Anyakwo, K., Summers, J., Adebayo, O.	pp. 2661 - 2670
Quantitative metrics for validation and decision-making in digital twins: a comparative study on a railway braking system Ershenko, D., Derbysheva, G., Panayi, A., Fortin, C.	pp. 2671 - 2680
Reconciling data-enabled design and clinical trials: conceptual phases for eHealth development Ornelas, H. C. M., Kleinsmann, M., Kortuem, G., van Deutekom, A. W.	pp. 2681 - 2690
Redefining interfaces: a generic interface architecture for complex system integration Aron, D., Reich, Y.	pp. 2691 - 2700
Redesigning reusable surgical gowns: usability and innovation for sustained adoption Harding, C., Watts, R., De Win, G., Moons, I., Du Bois, E.	pp. 2701 - 2710
Reducing uncertainties in data & information - an ontological approach to support satellite development projects Gadzo, E., Koch, A.	pp. 2711 - 2720
Re-examination of design exercises in a materials engineering course Krauss, G.	pp. 2721 - 2730
Regenerative Responsibility: a strategy for design education Contreras, L. M. G.	pp. 2731 - 2740
ReqGPT: a fine-tuned large language model for generating requirements documents Schiller, K. A., Haddad, M. S., Seibel, A.	pp. 2741 - 2750
Requirements to balance risk and multi-user experience: the case of pharmaceutical packaging design Bianco, A., Farrugia, P., Pizzuto, M. A.	pp. 2751 - 2760
Research on the Sanxingdui cultural and creative product design based on an AIGC design framework Wu, H., Zhong, M., Chen, S., Zhang, Y., Zhou, X.	pp. 2761 - 2769
Research topic evolution: a comparative analysis of human and machine approaches Xiao, S., McAdams, D. A.	pp. 2771 - 2779
Resilience-By-Design: Standard-based definition of Resilience and identification of action fields for the systems design of mobility system Bitá, I. M., Hovemann, A., Dumitrescu, R.	pp. 2781 - 2790
Reusing used components in new product generations - a systematic literature review on challenges and future research Meyer, J., Inkermann, D.	pp. 2791 - 2800
Revealing axiomatic design relations in patent documents with natural language processing (NLP) Losanno, M., Giordano, V., Consoloni, M., Chiarello, F., Fantoni, G.	pp. 2801 - 2810
Roadmap to enable sustainable and circular designs in collaborative automotive ecosystems Isaksson, O., Hallstedt, S. I., Watz, M. S., Mallalieu, A., Björklund, H.	pp. 2811 - 2820

Robust design as a team sport – mastering upcoming challenges in modern product development Goetz, S., Campean, F., Eifler, T., Husung, S., Roth, M., Schleich, B., Söderberg, R., Wärmefjord, K.	pp. 2821 - 2830
Scaling generative design for production through the use of standard parts Raines, J., Barton, D., Hicks, B.	pp. 2831 - 2840
Scenario to specification: promises and pitfalls of AI in developing user-centered engineering specifications with interdisciplinary teams Ismatullaev, U. V. U., Kim, K.	pp. 2841 - 2850
Scenario-based planning of design method validation studies and the associated effort Sankowski, O., Paehler, L., Wittig, C., Uereten, S., Eisenmann, M., Matthiesen, S., Krause, D.	pp. 2851 - 2860
Second life product strategies leading to LCA ambiguity: challenges for sustainable design Becattini, N., Panarotto, M., Cascini, G.	pp. 2861 - 2870
Semantic and network analysis of design protocols to reveal design framing phenomena Kelly, N., Gero, J. S.	pp. 2871 - 2880
Silent streets and smart signals: insights for the design of future electrical autonomous vehicle interface Monti, T., Blandino, G., Montagna, F.	pp. 2881 - 2890
Smart services in manufacturing - approaches for the organizational design of technical service organizations for smart service delivery Wagner, L., Humbeck, I. P., Koerner, T., Rolle, M., Wagenmann, S.	pp. 2891 - 2900
Spatial computing in design: opportunities and challenges of a new technological paradigm Snider, C., Kukreja, A., Cox, C.	pp. 2901 - 2910
Standards as Discourse Collard, J., Subrahmanian, E., Breiner, S., Sriram, R. D.	pp. 2911 - 2920
Streamlining design cycles with a flexible geometry reconstruction method Mayer, J., Wartzack, S.	pp. 2921 - 2929
Supporting medical phantom design through a comprehensive design catalogue for phantom materials Wegner, M., MacMillan, N., Krause, D.	pp. 2931 - 2940
Supporting parent-child bonding and attachment practices in the NICU: designing and evaluating a non-intrusive health monitoring solution Yarlagadda, H., Sandbulte, J., Wang, S., Clarke-Sather, A.	pp. 2941 - 2950
Supporting structured reflection in engineering design by chatbots: potentials and concept for a reflection chatbot Ammerdörfer, T., Inkermann, D.	pp. 2951 - 2960
Sustainability in product engineering –a guide to initiate targeted sustainability action Jäckle, M., Does, E., Tusch, L., Albers, A.	pp. 2961 - 2970
Sustainable design approaches for thermoplastics in additive manufacturing Evans, A., Renter, W., Egan, P. F.	pp. 2971 - 2980
Sustainable legume-based foods: from collaborative diagnosis to co-creative concepts Voisin, R., Espinosa-Brisset, L., Saint-Eve, A., Pénicaut, C.	pp. 2981 - 2990
Systems Engineering of AI-based systems from perspective of design teams Bleisinger, O., Keil, M., Eigner, M.	pp. 2991 - 3000
Teaching sustainability in higher engineering education: a structured approach to sustainable product development Jung, D., Quernheim, N., Zafar, A. N., Schleich, B.	pp. 3001 - 3010
Teaching value-based participatory design of complex socio-technical systems Abou Eddahab-Burke, F. Z., van Langen, P., Slingerland, G., Brazier, F.	pp. 3011 - 3020

Teamwork in design - a case study on how digital visual planning software addresses barriers to efficient project communication Hagström, M. H., Isaksson, O., Bergsjö, D., Wahrén, H., Panzar, E.	pp. 3021 - 3030
Test-oriented Resilient Requirements Engineering (ToRRE): extending model-based effect chain analysis to verification objectives Graessler, I., Ebel, M.	pp. 3031 - 3040
The impact of complexity on new product development in the engineer-to-order context: a case study from the aerospace industry Visagie, J. G., Whitfield, R. I., Evans, D.	pp. 3041 - 3050
The influence of aesthetic taste on product choice: does mode of evaluation impact decision making? Asuzu, C. M., Olechowski, A.	pp. 3051 - 3060
The normative body and 'stupid AI': challenging compulsory able-bodiedness in human-AI interaction Han, J. R., Balsamo, A.	pp. 3061 - 3069
The pioneering role of Stanford DesignX and legacy of Larry Leifer on the field of engineering design Carleton, T., Cockayne, W. R., Feland, J.	pp. 3071 - 3080
The role of design problem presentation in shaping neural activity and learning in engineering students Kado, C. J., Kames, E. M.	pp. 3081 - 3090
The twelve ways to convey engineering information visually Bettig, B. P., Fu, W. H., Lamb, D. A.	pp. 3091 - 3100
The unique feature of designing with digital twin uncovered by design theory Mercat, F., Le Masson, P., Weil, B.	pp. 3101 - 3110
The use of configurators to support warehouse service design: a case study of a logistics service provider Strøm, E. M., Hvam, L., Haug, A.	pp. 3111 - 3119
Toward a conceptual framework for AI and robotics in aging in place: insights from constructivist grounded theory Lee, S. H., Liddell, D., Yang, M., Coughlin, J. F., de Weck, O. L.	pp. 3121 - 3129
Towards a new understanding: building a shared mental model for design teams Edgecomb, I. M., Brisco, R., Wodehouse, A.	pp. 3131 - 3140
Towards a readiness level-based development of methodical approaches (MxRL) Köhler, C., Mahl, T., Mohke, J.	pp. 3141 - 3150
Towards an indicator for assessing the potential for geometric standardization in the development of variant lightweight products Christiansen, F. H., Schellhorn, J., Krause, D.	pp. 3151 - 3160
Towards an integrative approach for designing for cybersecurity in systems engineering Harris, M. A., Hale, M. L., Toh, C. A.	pp. 3161 - 3170
Towards automated video-based human behavior analysis: leveraging AI capabilities for spatial behavior detection Liu, S., McTeague, C., Dreyer, S., Thoring, K.	pp. 3171 - 3180
Towards design for cross-generational remanufacturing: guidelines to enable a forward-looking circularity Tusch, L., Nußbaumer, S., Jäckle, M., Düser, T., Albers, A.	pp. 3181 - 3190
Towards Fostering Human Ownership in GenAI-Assisted Design Jun, J., Wang, Y.	pp. 3191 - 3200

Towards improving the information management of aircraft cabin retrofits by processing quantity-on-hand documents Laukotka, F. N., Berschik, M. C., Krause, D.	pp. 3201 - 3210
Towards precision in bolted joint design: a preliminary machine learning-based parameter prediction Boujnah, I., Afifi, N., Wettstein, A., Matthiesen, S.	pp. 3211 - 3220
Towards proactive design for sustainability in industry 4.0/5.0 Marconnet, B., Gaha, R., Eynard, B.	pp. 3221 - 3230
Training as an affordable and powerful lever to stimulate the evolution dynamics of a newly designed technology platform at the frontier between academia and industry Gilain, A., Aknin, P., Balan, C., Le Masson, P., Abadi, M. L., Weil, B.	pp. 3231 - 3240
Training for transforming: design theory-based training for managing the unknown Bordas, A., Gilain, A., Le Masson, P., Thomas, M., Valibhay, C., Weil, B.	pp. 3241 - 3250
Uncovering collaboration dynamics in design projects using network analysis and log data Sever, L., Martinec, T., Mueller, M., Škec, S.	pp. 3251 - 3260
Uncovering the limits of visual-language models in engineering knowledge representation Consoloni, M., Giordano, V., Galatolo, F. A., Cimino, M. G. C. A., Fantoni, G.	pp. 3261 - 3270
Understanding barriers in the design process for elderly's positive emotion regulation Park, Y. J., Kim, C., Yoon, J.	pp. 3271 - 3280
Understanding ChatGPT's impact on student-team ideation outcomes for new product development Bunn, B. J., Howell, B. F., Wright, G.	pp. 3281 - 3289
Understanding prototype testing: how student designers structure sessions and ask questions with stakeholders Vang, P. C., Lauff, C. A.	pp. 3291 - 3300
Understanding VR-mediated empathy in design: measurement approaches, inconsistencies and implications Hu, X., Casakin, H., Georgiev, G. V.	pp. 3301 - 3310
Undisciplined design: risks, challenges, limitations and strategies for navigating through chaos Lee, Y., Gowda, A.	pp. 3311 - 3320
Unlocking product ecosystem insights: analyzing customer sentiment and interoperability through video reviews Lin, K., Kim, H.	pp. 3321 - 3330
User-informed LLM learning: identifying effective design features for sustainable behavior through AI perception Wilson, S. L., Yang, M. C.	pp. 3331 - 3340
Using agent-based modelling to explore the impact of social events, labour dynamics, and human factors on food production: apple harvesting as a case study Nie, Y., Sparks, A., Hicks, B., Nassehi, A., Valero, M.	pp. 3341 - 3350
Using design principles as a lens to interpret user needs: a case study using a new 3D tic-tac-toe game Thomas, J., S, R., Sankar, B., Bagewadi, M., Singh, V.	pp. 3351 - 3359
Using statistical clustering of trajectory data to support analysis of subject movement in a virtual environment Avila, M. G., Timmer, D., Butler, A.	pp. 3361 - 3370
Validating a process model for future-robust product portfolios - two cases Schlegel, M., Kempf, C., Thümmel, C., Düser, T., Albers, A.	pp. 3371 - 3380
Visual communication in engineering design: impact of line work in explanative sketching Nakamura, S., Li, D., Linsey, J.	pp. 3381 - 3390

What is the value of design theory? Reich, Y., Lavi, E., Shoham, K.	pp. 3391 - 3400
What makes a top-tier internship: ranking internships in industrial design Hagins, C., Barnhart, B.	pp. 3401 - 3406
